FRENCH FINANCIERING.

In an interesting illustrated article on financiering in Paris, published in the current number of The Manufacturer and Industrial Gazette, Holyoke, Mass., a detailed description of the ways of the Bourse is given. Concerning inflation in the French stock market it says:

"Of all the financial papers published in Paris not one seems to take a bearish view of things. They will all talk of France economizing 300,000,000 francs per year or 800,000 francs per day, and putting a good share of this into "values of the first order;" but the other side, the inflation bubble which has doubled and trebled the prices of all kinds of securities is left to expand, as long as it can—and then burst. Hence everybody being educated to hold on, the brokers and large financial establishments profit by this circumstance to "carry over" their customers' stocks to the next month at rates of interest ranging from 5 to 11 per cent per annum; and in order to keep the public in good humor a new rise is generally engineered directly after each liquidation. Of course this enables the financial institutions to unload to a certain extent the contents of their portfolios—which seem specially full of 3 and 5 per cent rentes just now—and thus everybody is made happy all round. As the broker charges a regular commission for "carrying over," it is to his interest to keep up the bull tendencies in his customer, because when the particular stock is finally liquidated he is always sure of his selling commission. Quite a number of the brokers, through their co-partners in the value of the seat within the corbeille, do almost the whole of the carrying over for their customers themselves.

"Although a broker has seldom more than seven or nine direct partners, yet these latter not seldom admit their friends into a sub-share of the part of the charge they hold, and thus there may be 40 or 50 persons indirectly represented in one of these 2,000,000 franc seats. Naturally most of these are capitalists, who are glad enough to get a high interest for their money by loaning it for a month, and a broker is thus enabled to carry over several millions worth of stocks without so much as going out of his office. Of course, as a bear is an animal to be extirpated, a seller is not allowed, like the buyer, to discount his operation by offering delivery of the stock cash. He must await the liquidation, and if, say, he should have sold 100 Suez at 1,800 and before the close of the month canal stock should drop to 1,300, thus endangering, may be, the execution of his contract, all he can do is to get his buyer to sell him back the same quantity of Suez as he has disposed of, and immediately dump it out again through another broker. In this way the more or less shaky buyer will owe him a difference of just so much, and the seller is in a somewhat better position than if he waited to the end of the month before calling for his settlement.

"The Germans, who are generally recognized everywhere as the best boursiers and arbitragistes, figure very largely on the Paris Bourse—most of them going under the name of Alsatians, and thus enjoying all the privileges bestowed upon that favored race in France. While there is at present a movement going on for placing Texas lands stock on the Bourse, yet that institution has, so far, not listed a single American railroad. There is quite a fair business, however, doing in U. S. bonds, the bulk of it being done by the Seligmans, Ballins and Raphael Behr. The French, when they speak of "Le dollar," never forget to add that between September 1, 1874, and April 1, 1881, the United States imported over $8,000,000 worth of paintings, statuary, bronzes, books and engravings from France."

MANUFACTURING IRON IN AFRICA.

During the coldest months, that is to say, June and July, the Gonzellos miners leave their homes and take up their abode in extentensive encampments near the iron mines, which are abundant in the country. In order to extract the ore they dig circular holes or shafts of about 10 to 13 feet in diameter, but not more than six or seven feet deep. This arises most probably from their want of means to raise the ore to a greater elevation. I examined several of these shafts in the neighborhood of the Cubango, and found them all of a similar character. As soon as they have extracted sufficient ore for the work of the year they begin separating the iron. This is done in holes of no great depth, the ore being mixed with charcoal, and the temperature being raised by means of primitive bellows, consisting of two wooden cylinders about 1 foot in diameter, hollowed out to a depth of 4 inches, and covered with two tanned goat skins, to which are fixed two handles 30 inches long and half an inch thick. By a rapid movement of these handles a current of air is produced which plays upon the charcoal through two hollow wooden tubes attached to the cylinders, and furnished with clay muzzles. By incessant labor, kept up night and day, the whole of the metal becomes transformed, by ordinary processes, into spades, axes, war-hatchets, arrow-heads, assegais, nails, knives, and bullets for fire-arms, and even occasionally fire-arms themselves, the iron being tempered with ox-grease and salt. I have seen a good many of these guns carry as well as the best pieces made of cast-steel.—[How I Crossed Africa, Pinto.

AN ENGLISH OPINION OF AMERICAN LOCOMOTIVES.

R. M. Brereton an English engineer, says concerning American locomotives: "I argue that the greater duty done by the American motor is due to the better design and better system of working the locomotives. The American builder excels in the system of framing and counterbalancing, and in designs of crank axles, etc., so that the engine may run remarkably easy and without jar round sharp curves, and work not only on the light roads, but also diminish the wear and tear on the solid roads, and at the same time increase the effective tractive force. The English engine is a very heavy affair, and in running it not only wears and tears itself very rapidly, but also the roadway, and by its unsteadiness and jar it greatly fatigues the drivers and firemen. I have ridden hundreds of miles on engines in India, in

France and in the United States, and have always found the American engine most easy and comfortable; but I never did the English or the Continental engines. It is almost impossible to give these engines their full hauling power, simply because the greater portion of the weight cannot be thrown on the driving wheels."

Change of Gauge.

The work of changing the gauge of the Chicago, St. Louis and New Orleans Railroad, extending from Cairo to New Orleans, 550 miles, exclusive of sidings, together with the Kosciusco branch of 21 miles, from 5 feet to 4 feet 8½ inches, was completed on the 28th ult. between the hours of 4 a. m. and 3 p. m. Over 3,000 men were employed, and the estimated cost of the work is about $300,000. This is said to be the greatest feat yet accomplished in gauge changing, and to Col. L. P. Brien, Assistant General Manager, is the success mainly due. At 3 p. m. trains were running in all directions.

The gauge of the Mississippi and Tennessee Railroad, running from Memphis, Tenn., to Grenada, Miss., 100 miles was changed on the 30th ult. from 5 feet to 4 feet 8½ inches. The work was successfully done in ten hours, without interruption to south bound trains and the traffic of the road.

The track of the Port Jervis and Monticello Railroad, (a branch of the New York, Lake Erie and Western Railroad,) 23 miles in length, was changed on the 30th ult. from the broad or 6 feet gauge to the standard or 4 feet 8½ inch gauge. The road is owned by the Union Trust Company of New York. There is talk of continuing the road next spring to Fallsburg, five miles distant, where it would strike the New York, Ontario and Western Railroad.

The Rochester branch of the New York, Lake Erie and Western Railroad was also changed from the broad to the ordinary gauge on the 30th ult. It is 94 miles in length, extending from Corning to Rochester. With the exception of the branches from Suffern to Piermont and the Northern Railroad which is leased to this company and runs from Bergen to Nanuet, the work of making the track a narrow gauge is now completed.

A statement of the canal business of Buffalo shows that the amount of tolls collected in July, 1881, was $55,541 92, against $105,541 26 in July, 1880, a decrease of $49,999 34; and from the opening to August 1, 1881, $150,151 52, against $348,063 83 for the corresponding period in 1880, a decrease of $197,912 31. The number of boats cleared for the season to August 1, 1881, was 2,811; do. in 1880, 4,957, a decrease of 2,146. The canals were opened for business on the 17th of May, 1881, and on the 15th of April, 1880. The comparative shipments from the opening of navigation for the two seasons were as follows: in 1881, flour, none; wheat, bushels, 6,855,205; corn, 7,258,830; oats, 132,250; rye, none; in 1880, flour, bbls., 2,073; wheat, bushels, 13,969,542; corn, 18,431,861; oats, 809,947; rye, 125,868—total bushels in 1881, 14,246,285; in 1880, 33,337,158. There was also shipped in 1880, 105,489 bushels of barley malt, and in 1881, 193,172 bushels.

Imports and Exports of the United States.

The Chief of the Bureau of Statistics at Washington in his twelfth monthly statement for the fiscal year just closed, of the imports and exports of the United States reports that the excess of exports of merchandise was as follows:

Month ended June 30, 1881, $4,541,931; month ended June 30, 1880, $11,617,741; twelve months ended June 30, 1881, $259,726,254; twelve months ended June 30, 1880, $167,683,912.

The excess of exports and of imports of gold and silver coin and bullion, was as follows:

Month ended June 30, 1881 (excess of exports), $1,022,152; month ended June 30, 1880 (excess of imports), $177,860; twelve months ended June 30, 1881 (excess of import), $91,168,650; twelve months ended June 30, 1880 (excess of imports), $75,891,891.

During the last fiscal year the value of the exports of merchandise amounted to $902,319,473, being larger than ever before in the history of the country. The value of the imports of merchandise amounted to $642,593,219, and was larger than during any preceding year, with the exception of the year ended June 30, 1880. The total value of the foreign commerce of the United States—imports and exports of merchandise—amounted to $1,544,912,692, and exceeded that of any prevoius fiscal year.

The excess of exports over imports during the last fiscal year was larger than during any preceding year, with the exception of the fiscal year 1879.

Since the year ending June 30, 1875, the total excess of the value of the exports of merchandise from the United States over that of the imports of merchandise into the United States has amounted to the sum of $1,180,681,641.

The value of the exports of merchandise during the last fiscal year exceeded the value of such exports during the preceding fiscal year $66,680,815, an increase of 7.89 per cent.

The value of the imports of merchandise during the last fiscal year was $25,861,527 less than the value of such imports during the preceding fiscal year, a decrease of 3.95 per cent.

Mr. Nimmo also calls attention to the rapid increase in the value of the exports of merchandise from the United States during the last ten years, viz: from $442,820,178 during the year 1871 to $902,319,473 during the year 1881.

The exports of specie exceeded the imports during each fiscal year from 1862 to 1879, but during the last two fiscal years the imports of specie exceeded the exports thereof, such excess amounting, during the year ended June 30th, 1880, to $75,891,291, and during the year ended June 30th, 1881, to $91,168,650.

The Memphis, Paducah and Northern Railway, running between Paducah, Ky., and Memphis, Tenn., a distance of 165 miles, was sold at auction on the 30th ult. by Adrian H. Muller & Son at the Exchange Salesroom for $2,300,000. C. P. Huntington, John Eccles and H. E. Huntington were the purchasers. The sale was made under a decree of the United States Circuit Court for the Western District of Tennessee in the suit of Abram Carl Wertheim and others against the railroad company.

Philadelphia and Reading Companies.

From the report of the Receivers of the Philadelphia and Reading Railroad and Coal and Iron Company for the year ending Nov. 30, 1880. We learn that the gross earnings of the two companies were $32,177,003 41; working expenses, $28,315,865 50; rental of leased lines, $3,666,159 02; interest, $6,704,965 06—loss, $1,209,986 17, against a loss in 1879 of $2,817,858 57. The amounts of floating debt of both companies, Receiver's certificates, and arrears of overdue interest for which either no provision has been made or for which provision being made at a lower rate by the Receivers is as yet unaccepted by creditors, outstanding on the 30th of June, 1881, were as follows: floating debt, $9,744,809 47; Receivers' certificates and obligations, $2,668,166 87; arrears of interest, including July coupons of general mortgage and of scrip, but not including $202,480 of coupons due July 1, 1881, on divisional coal land mortgage bonds, for which provision has been made for payment or purchase at lower rates, $1,901,792 95. There are about $200,000 of arrears of canal rental yet unpaid. There are also claims against the companies for losses on contracts on old iron rails amounting to between $250,000 and $275,000, which are as yet unliquidated, and of which no account has been taken in any of the above statements.

Cincinnati Southern Railroad.

At a meeting recently held in this city called, it is stated, at the instance of one of the five trustees, for the purpose of discussing combinations in anticipation of leasing the Cincinnati Southern Railroad, one of the persons present is reported to have said—

"There is no doubt that to secure full benefits which the city expected to gain by this enterprise, the road must be leased to some one interested in the property. The city hopes to get from the rentals sufficient to pay the interest on the bonds, and to establish a sinking fund. This is out of the question in my opinion, and the main question is to ascertain how much, or rather how little, the city will be satisfied with."

The Cincinnati Southern Railroad was built under direction of a Board of Trustees created by an act of the Ohio Legislature in May, 1869. The city was authorized to issue $18,000,000 in bonds for its construction. The road was opened in February, 1880. It is operated by the Cincinnati Railroad Company under the temporary license granted by the trustees. It is proposed to lease the road for 25 years to the highest bidder.

As noted elsewhere, the gauge of the entire line of the Chicago, St. Louis and New Orleans Railroad has been changed to conform to the gauge of its connecting lines north of the Ohio. This line has undergone many improvements within the past year. The track is all new steel rail, the road-bed has been raised and ballasted with gravel, making it smooth and firm. The change of gauge will enable the road to run through cars from the Northwest to the South, and the benefit to the line will be great, as it will henceforth be placed in a position to exchange business with all the great roads of the North and West, and run both freight and passengers through without delay or change of cars.

Railroad Earnings 915

New York, Saturday, August 6, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

THE heroic treatment which has been applied to the war of passenger rates, by cutting terribly deep, did not have the quick results anticipated, but it evidently hastened a more satisfactory adjustment of rates, which it is hoped will before long be effected. Meanwhile the stockholders are beginning to look upon the war with no little uneasiness, justly feeling that railroad managers being intrusted with the care of their property should not allow the spirit of warfare to obtain too strong a control of their movements.

WHILE little has been said of late concerning Boston's proposed World's Fair, the project is not being neglected or suffered to fade out of sight. The committees have been busily at work much of the time during the summer in a quiet way, but they seem to be taking the sensible course of avoiding any undue heralding of their plans until they have assumed some definite outline. The vacillating course pursued in New York in arranging plans had much to do with the abandonment of the project here.

WITHIN the past few years a new department of business of the nature of insurance has developed into important proportions in this country, a main feature of which is the issuing of bonds guaranteeing fidelity in positions of responsibility and pecuniary trust. The system is one that can be utilized to great advantage, and at the same time it is one that under poor management or without substantial ground work in the character and financial standing of its officers may be made a most unreliable and damaging business, both to employers and employes. The security must be undoubted, the risks must be carefully studied and the means employed to obtain them must be such as not to prove obnoxious to those from whom the patronage must largely be sought, and then a general popularity may be predicted for the plan. The chief advantage of the method is that a corporate guaranty is thus obtained instead of a personal bond where security is required, by which the employer is protected by bonds, not needing frequent examinations in different directions, against breaches of fidelity, and the employe is relieved from the often unpleasant necessity of asking personal friends to act as his bondsmen. An illustration of the growth of this system in popularity is seen in the increase of capital from $100,000 to $250,000 just made by the Fidelity and Casualty Company of this city, in which a number of substantial New York business men are interested, the increase being all taken at a premium of 15 per cent. This, however, is not wholly an indication of the growth of this new business, as in this case an important part of the business of the company is the issuing of casualty policies, providing for weekly indemnities in cases of disabling injury.

IN speaking of some of the recent changes in the gauge of the railroads connecting with the Erie, and the Atlantic and Great Western system, the Tribune appears to be a little "off" when it finds it difficult to understand why the Mississippi and Tennessee Railroad should also change its gauge from five feet to four feet eight and a-half inches. And by the way, the Tribune was in error in mentioning the former gauge of the New York, Lake Erie and Western Railroad as being five feet, and the present standard gauge as being four feet eight inches. The old gauge was six feet and the standard gauge is four feet eight and a half inches. The reason for the Mississippi and Tennessee Railroad changing its gauge is not so difficult to understand when it is remembered that one of the important connections of the Illinois Central Railroad, or rather the direct continuation of it to the Gulf, is what is known as the "Great Jackson Route," or the Chicago, St. Louis and New Orleans Railroad, which has just changed to the standard gauge. The Great Jackson Route comprises the New Orleans, Jackson and Great Northern, the Mississippi Central and the Mississippi and Tennessee Railroads. The latter is one of the important parts of the line, running from Grenada to Memphis, and by means of it the line is afforded a connection of its own with the Mississippi river. The completion of the change of gauge of the New York, Lake Erie and Western Railroad this week, and that of the Great Jackson Route are illustrations of the means being adopted for obtaining a uniformity in commercial intercourse, and a perfecting of transportation facilities, apparent alike in the North and the South, the tendency of which will be to do away with antagonistic measures or prejudices in many directions.

Railroads in Georgia.

In few States are more promising signs of industrial growth and development being exhibited than in Georgia, and the enterprises which have sprung up there within the past few years are attracting a wide attention accompanied by an increasing amount of capital seeking investment. The success which has attended the establishing of cotton manufactures within her borders and the extended discussion of the subject which has arisen has had more to do than any other influence, probably, with Georgia's present position among the active States. The International Cotton Exposition to be held at Atlanta this Fall will be a most powerful stimulus to the manufacturing enterprises of that locality, and will draw from both sides of the water a renewed investigation and study of the resources of that section and of their value as fields for investment.

The railroads of Georgia are performing a most important part in the development of the State; in fact they form the very basis of the present prosperous outlook there, for to them more than to any other cause is due the spirit of enterprise which has made possible the starting of manufactories and the importation of settlers, manufacturing skill and capital. The improved condition of the railroads of that section has been very marked of late and will be made vastly more apparent as the cotton exposition draws its probable vast throng of visitors. To those looking in that direction for investment in railroad or manufacturing enterprises it will be of special interest and importance to know what the relations are between the rights of the people and the corporations, or the character of the laws operating upon corporations. It is a fortunate thing for Georgia at this active period of growth that her constitution is a conservative one which provides safeguards alike for the people and the railroads, and that in the establishment of her Railroad Commission the right and duty of railroad regulation was provided in such a way as to prevent as far as possible abuse in the methods. Among the things guarded against in the enactments of the Legislature was the liability of any breach of contracts formerly made, the revocation of

grants and any interference with vested rights. The cautious provisions place numerous restraints upon legislative power, and the protection of all rights, both those of the railroads as well as those of the people, seems aimed at in them to an unusual degree.

The Georgia Railroad Commissioners in their semi-annual report just issued have devoted considerable space to the principles upon which their Commission was established, and have given liberal extracts from the State Constitution, and laws touching upon the matter. The information given in this manner is exceedingly explicit and carefully arranged, and, though some of the ways of presenting it seem in a measure unnecessarily argumentative so far as the argument has any appearance of a defense of position, it will be of great interest and value, especially at this stirring time in Georgia matters. The report is chiefly devoted to the subject of railroad legislation, upon which some good ideas are advanced, and to the plan adopted by the Commissioners for obtaining information from the railroads, the blanks and full details of the work being given. The next report will doubtless give the results of the work outlined in the one just issued, and it will be looked for with interest, coming as it will after so much attention has been drawn to Georgia, and so much interest awakened in her natural resources and her promising enterprises.

Personal.

Geo. M. Pullman, president of the Pullman Palace Car Company is expected to return from Europe about the middle of the month.

Having been appointed assistant treasurer of the Pennsylvania Railroad Company, William H. Frailey has resigned the position of cashier of the Empire Line. He is succeeded by W. H. Bruner.

General Manager Williams, of the Cincinnati, Hamilton and Dayton Railroad is to assume the duties of his new positron on the New York, Chicago and St. Louis Railroad, September 1.

Robert Stewart has been appointed superintendent of the telegraph of the Baltimore and Ohio Railroad, succeeding C. A. Tinker, who resigns to take a position with the Western Union Telegraph Company.

Ex-Gov. J. Gregory Smith, president of the Central Vermont Railroad Co., and his family returned July 30, to their home at St. Albans, Vt., from an extended European tour.

It is reported that General Charles Paine, general superintendent of the Lake Shore and Michigan Southern Railroad, is about to resign his position on that road, to accept a position on the New York, Ontario and Western Railroad.

J. H. Barrett general superintendent of the Pan Handle division of the Pittsburgh, Chicago and St. Louis Railway, has resigned to accept a similar position on the Cincinnati, Hamilton and Dayton Railroad. His headquarters will be in Cincinnati.

James Stokes, senior partner in the banking firm of Phelps, Stokes & Co., died at Orange, N. J., Monday, aged seventy-eight years. He was one of New York's well-known benevolent business man. He was formerly a member of the old firm of Phelps, Dodge & Co., and when this firm dissolved two years ago he established the banking house in which his partners were ex-Comptroller F. P. Olcott, his sons, Anson Phelps Stokes and William E. Dodge Stokes, and Isaac N. Phelps his brother-in-law.

Henry Bionne, Secretary General of the Panama Canal Company, died on board the Pacific Mail steamship Crescent City, while on the voyage to New York from Aspinwall. He was a prominent engineer, and was intimately connected with M. De Lesseps in his inter-oceanic project.

J. T. McManus, of Hartford, has been offered the superintendency of the Hartford and Connecticut Valley Railroad. He was formerly superintendent of the Hartford, Providence and Fishkill Railroad, and later superintendent of the western division of the New York and New England Railroad.

C. C. Wheeler the new manager of the Atchison, Topeka and Santa Fe Railroad, has been for several years Assistant General Manager of the Chicago and Northwestern Railroad, previous to which he filled the same position upon the Michigan Central, under Mr. Strong, whom he now succeeds upon the Atchison, Topeka and Santa Fe.

Joseph H. Moore, who died at Odell, Ill., on Monday last, was the first conductor of a passenger train running on the Boston and Worcester Railroad. Since 1844 he had been superintendent of several railroads including the Pittsburg, Fort Wayne and Chicago and the Michigan Southern. He also invented several devices for railroad use, by which he was widely known.

James Robb, formerly a member of the firm of Winslow, Lanier & Co., this city, died at Cheviot, Ill., July 30, aged sixty-eight years. He was prominent as a financier throughout the country, especially in New Orleans where he was much interested in railroads, being the originator and chief promoter of a number of the most important lines of that section.

Manufacturing.

The Baldwin Locomotive Works have just built for shipment to Brazil five passenger locomotives for the Dom Pedro Y Railroad, two freight engines for the Bahia, Brazil road, one of the Santa Isabel and Rio Preto Railroad and one for the E. de F. Pirapetinga road.

The lands known as the "Big Hill" iron lands in upper Botetourt County, Virginia, on the line of the Richmond and Alleghany Railroad have been bought by Col. John W. Skales of Philadelphia for $60,000. It is said that a furnace will be erected soon near the property by Philadelphia parties.

A Chicago gentleman has invented a device for laying ties and iron from the cars direct. The ties are taken from an inclined plane and properly placed by means of a movable derrick. The iron is run out by means of a windlass, placed upon the ties and spiked down. The car then moves on and another section of track is laid as before.

It is expected that many of the possibilities of electricity in connection with railroads will be demonstrated at the electrical exhibition which opens in Paris this week. So many ideas are being suggested in regard to the use of electricity that much good will be looked for in the explosion of some of them when brought up at this exhibitioff.

Work is advancing on the building for the New England Manufacturers' and Mechanics' Institute Fair, Boston, which is to be opened August 18. The main floor has an area of five acres, and the galleries three acres more, and in the centre the open space bounded by the galleries is 400 feet long, 126 wide, clear of columns, and open to the roof, a height of 80 feet. About 2,000 exhibitors have obtained admission, coming from all parts of the country, although the bulk of the display will be of New England origin.

The Wilmington, Del., Every Evening says the Harlan and Hollingsworth Company are running about 1100 hands, with all the work they can do. They have six ferry boats under way; are rapidly finishing the City of Worcester; are nearly ready to launch the propeller Garton, for the Baltimore Steam Packet Co.; will soon launch the West Jersey ferry-boat "No. 3," which is on the same ways with the Camden ferry-boat 'No.3'; will finish in two or three weeks the steamer San Jacinto, and are hard at work rebottoming and otherwise overhauling and repairing the Morgan steamer Harlan the second of the series. The same activity pervades the car department. They are now shipping some cars to Rockaway, and have just sent away several shipments of cars for the Long Island and Milwaukee and St. Paul Railroads.

Organization.

The "Tallman Automatic Car Brake Company" has been incorporated with a capital stock of $2,000,000 in shares of $100 each, with fifty years to run. The incorporators and trustees for the first year are Stephen P. Tallman, Seymour Hart, Elisha A. Packer, Edward M. Clymar, Charles C. Keeler, David H. Jeffery and William E. Davenport.

The Bridgton and Saco River Railroad Company has been organized with the following officers: William F. Perry, president; Joseph A. Bennett, secretary; P. P. Burnham, treasurer; William F. Perry, Darwin Ingalls, O. B. Gibbs, William A. Stevens, John H. Kimball, John W. Fowler and A. H. Burnham, directors.

The officers of the Atlantci and West Point Railroad Company, recently elected, are: President, L. P. Grant, late general manager; general manager, Cecil Gabbett, of the Western road of Alabama; treasurer, W. P. Orme; Board of directors—W. M. Wadley, Savannah; C. H. Phinizee, Augusta; L. P. Grant, Atlanta; D. N. Speer, Lagrange; John S. Bigby, Newman; W. B. Berry, Newman; D. M. Hill, Washington.

A certificate of incorporation was issued by the secretary of State at Wheeling, W. Va., on the 25th ult. of the West Virginia and Pennsylvania Railway Company. The road will commence at the Pennsylvania line, in the county of Monongalia, and run thence by the most practicable route by way of Morgantown and Fairmont or Palatine to Clarksburg, in Harrison county. The principal office of the company is to be at Fairmont and the charter perpetual. The capital stock of the company will be $1,000,000, divided into shares of $100 each.

At a meeting of the Board of Directors of the Philadelphia, Wilmington and Baltimore Railroad Company, held in Philadelphia on the 27th ult. for reorganization under the Pennsylvania Railroad management, the train rules and general system now in operation on the Pennsylvania Railroad were adopted, and among other officers chosen were the following: President, Isaac Hinckley; vice president, A. J. Cassatt; general manager, G. Thomson; superintendent, H. G. Kenny; secretary and treasurer, Robert Craven. The heads of departments chosen are Pennsylvania Railroad officials.

A charter was issued at the State Department, Harrisburg, Penn., on the 29th ult. to the Monongahela East Shore Railroad Company. The charter is for 999 years, and the object is to construct and operate a railroad from a point in Lincoln township, Allegheny county, opposite the borough of McKeesport, at the junction of the Youghiogheny and Mo-

nongahela rivers to the State line, dividing the States of Pennsylvania and West Virginia, through the counties of Allegheny, Westmoreland and Fayette. The length of said railroad will be about 80 miles. The capital stock is $800,000. The officers are: President, C. W. Quincy, of Pittsburgh; directors, Henry Hill, of Beaver; James I. Bennett, Allegheny City; D. Hostetter, Allegheny City; Wm. M. Lyon, Pittsburgh; Jacob Henri, Economy, and Emory Herbert Depuy, of Allegheny City.

Articles of incorporation of the California Central Railroad, San Joaquin and Mountain Divisions were filed with the County Clerk, San Francisco, on the 25th ult. The proposed railroad is to be of the standard gauge, and the San Joaquin Division is designed to run by the most practicable route from the southern terminus of the proposed San Francisco and Ocean Shore Railroad, at Santa Cruz to a point near Minturn, Fresno County, connecting there with the western terminus of the Yosemite Division. The length of this division is abont 120 miles. The Mountain Division is to be extended from a point near Fresno Flats to a point near McBride's Pass, on the State line. The length of the division is about 150 miles. The capital of the San Joaquin Division is $6,000,000, and that of the Mountain Division, $7,500,000.

Articles of incorporation of the Idaho, Clearwater and Montana Transportation Company were filed at Lewiston, Idaho, on the 29th ult. The company embraces 17 prominent citizens of North Idaho. It is claimed that they have formed this company at the instance of several Eastern capitalists, with a view of building a railroad and telegraph line eastward from Lewiston via the Clearwater Pass of the Bitter Root Mountains and the Big Horn Pass of the Rocky Mountains to connect with the Utah Northern Railroad, a distance of not less than 300 miles. They also propose to build a road from Lewiston via Snake and Grand Ronde Rivers to Lagrange, Oregon, a distance of 100 miles, to build a railroad and telegraph line from Lewiston north to connect with the Northern Pacific, and to operate steam boats on Snake, Clearwater, and Columbia Rivers in connection with their roads.

Interest and Dividends.

The Quincy Mining Company will pay a semi-annual dividend of $3 per share on the 22d of August.

The dividend of the Central Mining Company, $3 per share, payable August 1, is the first semi-annual dividend ever made by that company.

The Calumet and Hecla Mining Company have declared a quarterly dividend of $5 per share, payable on the 15th inst.

The dividends of the Connecticut and Passumpsic Rivers and Massawippi Valley Railroads are 3 per cent, and are both payable on the 1st of August.

The Terre Haute and Indianapolis Railroad Company has declared a semi-annual dividend of 4 per cent, payable in August.

The $400,000 Chicago, Clinton, Dubuque and Minnesota Sevens, due in 1884, have been called and will be paid, principal and interest, by the New England Trust company, Boston, on presentation.

The Trustees of the Kansas City, Fort Scott and Gulf Railroad first mortgage Sevens of 1903 have drawn for payment August 15 at 110, $130,000 of these bonds and interest ceases after that date.

A dividend of 3½ per cent on the capital stock of the Illinois Central Railroad Company will be paid by L. V. F. Randolph, Treasurer, at his office, No. 214 Broadway, on the 1st of September, to shareholders of record on the 13th of August.

The Rutland Railroad Company have declared a dividend of $1 50 per share on the preferred stock. This is the first dividend since February, 1875, when 3½ per cent was declared, payable in stock.

The directors of the Wabash, St. Louis and Pacific Railroad Company have declared a quarterly dividend of 1½ per cent on the preferred stock, payable August 15 to stockholders of record July 30.

The New York, Providence and Boston Railroad Company have declared a quarterly dividend of Two per cent payable Aug. 10 at the office of Messrs. M. Morgan's Sons, No. 39 William street.

The Boston and New York Air Line Railroad Company have declared a dividend of 1 per cent on the preferred stock, payable Aug. 20, at the Treasurer's office, 12 Wall St.

The Pullman Palace Car Company has declared its usual quarterly dividend of Two per cent, payable Aug. 5 at the Farmers Loan and Trust Company, New York, the New England Trust Company, Boston, and at the company's office in Chicago.

The Kansas City, Fort Scott and Gulf Railroad Company have declared a dividend of 4 per cent on the preferred stock, payable on the 15th of August. In August, 1880, 3½ per cent was paid, and in February, 1881, 4½, making 8 per cent for the year, and now divides it regular 4 per cent.

The United States had no interest maturing August 1 this year. All of the coupon 5 per cents, not exchanged for the continued 3½ per cents, have been "called" and will be paid August 12 principal and interest. The registered Fives are called for October 1, and interest from May 1 will be paid with the principal. Payment of any of these "called bonds" will be anticipated by the Treasury with accrued interest to the date of presentation. The first interest on the 5 per cents continued at 3½ per cent will be payable November 1 and thereafter quarterly. The first interest on the Sixes continued at 3½ per cent will be paid January 1, 1882, and thereafter semi-annually as on the old bonds. All of the 3½ per cents are registered and interest will be paid by check from Washington direct to the holder.

Railroad Earnings.

Great Western Railway of Canada, week ending Suly 22, $95,190, corresponding week last year, $87,594.

Denver and Rio Grande Railway fourth week of July, $157,039; corresponding week last year, $133,671; month of July, $548.284; July 1880, $372,190; miles now operated 847, operated last year 505.

The St. Louis Republican says that "there is the highest authority for the statement that the earnings of the Chicago, Milwaukee and St. Paul Railway Company are sufficient to meet all fixed charges, including interest, taxes and insurance, and still have a surplus. There is the same authority for the assertion that the earnings have been increased by charges for the transportation of construction material for extensions of the road.

The branch of the Baltimore and Ohio Railroad now under construction from Dawson, on the Pittsburg and Connellsville Railroad, to Washington, Penn., is being rapidly pushed to completion.

In the process of straightening the tracks of the Pennsylvania Railroad, work was begun on that portion of the main line in Lancaster county, near Conestoga Creek. The new piece of railway is to have three tracks, and will be finished next spring.

Population of Canada.

The population of the Dominion of Canada according to the official figures, as obtained by the census taken April 4, 1881, is as follows:

	1881.	1871.	1861.
Ontario	1,943,460	1,620,851	1,396,091
Quebec	1,358,469	1,191,516	1,111,566
Nova Scotia	440,585	387,800	330,857
New Brunswick	321,129	285,594	252,047
Prince Edward Island	107,781	94,021	80,861
Manitoba	49,509	11,953	.....
British Columbia and North West Territories	160,000	78,700	34,816
	4,350,933	3,670,435	3,206,238

The increase in the population during the decade was 680,498, against an increase of 464,197 in the preceding decade, and this growth, which is equal to 18½ per cent against an increment of on! 15 per cent in 1861-71, has been made in spite of the fact that in five years of the decade the country experienced the most severe trade depression which has ever befallen it. The actual increase and the per centage of growth in the several provinces during the past ten years were as follows:

	Actual increase.	Per cent.
Ontario	292,609	18
Quebec	166 953	14
Nova Scotia	52,785	13¾
New Brunswick	35,535	12½
Prince Edward Island	13,760	15
Manitoba	37,556	414

A map of the Coney Island and Fort Hamilton Railroad Company has been filed in the Register's office Brooklyn, with Theodore Magons president, and the following directors: Alfred Tully and J. R. O. Sherwood, of the Manhattan Beach Improvement Company; James Hardie, Andrew Jochum, W. C. Herbert, jr., and Michael E. Finnegan, of Flatbush.

The gross earnings of the Philadelphia and Erie Railroad for the month of June, 1881, were $350,584 83, the gross expenses $222,575 85, and the net earnings $128,008 98, an increase of $39,594 56 over the corresponding month of 1880. The net earnings for the first six months of 1881, were $605,651 48, against $626,908 73 for the first six months of 1880, an increase of $21,257 25.

The latest official report from the west states that the Canadian Pacific Railway has been completed to Image Creek, distant about twenty miles from the Portage, where a siding which will hold ninety cars has been put in. A track has also been erected at this point for the accommodation of trains.

The name of the Memphis, Holly Springs and Selma Railroad Company has been changed to the Memphis, Selma and Brunswick Railroad Company, and the capital stock increased to $3,000,000. Frederick Wolffe is president. The office of the company is at Memphis, Tenn.

The track of the extension of the Missouri Pacific Railroad through Central and Southwestern Missouri was completed to Carthage, in the lead producing region, on the 28th of July.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 23, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	198,982	4,620,121	4,110,162
Schuylkill Canal....	25,411	254,716	220,150
Lehigh Valley.....	125,219	3,438,901	2,645,690
Del., Lack. & Western.	93,519	2 214,479	1,776,954
Shamokin Valley....	21,041	569,692	480,678
Central New Jersey.	106,629	2,250,452	1,807,551
United R. R. of New Jersey.....	36,335	836,170	558,919
Pennsylvania Coal ..	34,194	679,219	584,904
Delaware and Hudson	85,904	1,860,747	1,582,302
Huntingdon & Broad Top Mt.....	13,769	274,324	255,410
Penn. and New York.	36,221	891,578	686,918
Clearfield, Pa.....	51,341	1,327,311	816,201

The total tonnage of anthracite coal from all the regions for the week ending July 23, as reported by the several carrying companies, amounted to 654,332 tons, against 405,014 tons in the corresponding week last year, an increase of 249,348 tons. The total amount of anthracite mined for the year is 14,899,998 tons, against 11,587,954 tons for the same period last year, an increase of 2,812,044 tons. The quantity of bituminous coal sent to market for the week amounted to 101,897 tons, against 90,933 tons in corresponding week last year, an increase of 10,964 tons. The total amount of bituminous mined for the year is 2,689,861 tons, against 2,281,944 tons for the corresponding period last year an increase of 407,917 tons. The total tonnage of all kinds of coal for the week is 756,259 tons, against 495 947 tons in corresponding week last year, an increase of 260,312 tons, and the total tonnage for the coal year is 17 089,859 tons, against 13,869,898 tons to same date last year, an increase of 3 219,961 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending July 23 was 186 118 tons, of which 134,109 tons were coal and 52,009 tons coke. The total tonnage for the year thus far has been 4,923,286 tons, of which 3,560,269 tons were coal and 1,363,017 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 23 were 47,815 tons, and for the year to that date 1,087,842 tons, a decrease of 57,523 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 22,399 tons ; year, 735,136 tons ; decrease as compared with 1880, 4,110 tons ; Chesapeake and Ohio Canal —week, 16,079 tons ; year, 217,262 tons ; decrease as compared with last year, 62,884 tons. The coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 39,748 tons ; year, 1,008,290 tons. Baltimore and Ohio Railroad—week, 1,137 tons ; year, 85,645 tons. George's Creek and Cumberland Railroad — week, 6,363 tons ; year, 40,688 tons. The Reading Railroad tonnage for last week ending July 30, was 201,000 tons, of which 65,009 tons were sent to and 42,000 tons shipped from Port Richmond, and 15,500 tons sent to and 16,000 tons shipped from E izabethport.—[Phila. Ledger, Aug. 1.

George M. Dallas, Special Master of the Philadelphia and Reading Companies, has filed in the United States Circuit Court his twenty-fifth report concerning the audit of the accounts of the receivers for the month of June. The report shows that the balance on hand in the treasury of the railroad company on June 1 was $441,058 63. The receipts during the month from freights, tolls, &c., were $2,676,498 03. The payments, $2,875,606 51, and the balance on hand July 1, $241,950 15. No new payments on account of deferred income bonds were made during the month. The balance on hand in the treasury of the Coal and Iron Company June 1 was $84,211 35, which added to the receipts during the month made the total receipts $1,298,513 99. The payments were $1,289,144 89, and the balance on hand July 1 was $9,369 10.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Aug. 2, 1881.

The volume of business during the past week has been quite satisfactory, and the market continues to grow steadily stronger day by day. Most Furnaces are declining to sell for future delivery at present prices. The mills are still idle here on account of the strike, with the exception of one which has started with non-union men. They will not start until they can get Pittsburg rates and probably not then unless Manufactured Iron advances.

Northwestern Telegraph Co.

An agreement was filed in the Register's office, this city, on the 29th ult., which shows that the Western Union Telegraph Company has secured a 99 years' lease of the lines of the Northwestern Telegraph Company of Wisconsin, operated in the States and Territories and the Dominion of Canada. The instrument is dated May 7, 1881, and provides that the Western Union Company shall, in addition to paying 7 per cent interest on first mortgage bonds, aggregating $1,180,000, pay a rental of $100,000 for the first year, and a pro rata yearly increase in the rent until it shall reach $150,000 by the year ending July, 1896, and thereafter pay the last mentioned sum annually until the expiration of the 99 years ; also all taxes and interest upon the capital stock of the Northwestern Company, which is fixed at $2,500,000, divided into fifty dollar shares. The interest to be paid on the stock is to be 4 per cent the first year, 1¼ for the second, and be increased at the rate of one-eighth of 1 per cent each succeeding year until it reaches 6 per cent in 1896, and to continue at that rate during the remainder of the term of the contract. The Northwestern Company agrees to maintain its organization, and the Western Union grants a further allowance of $2,500 per annum for 14 years for that purpose.

The Chicago, Milwaukee and St. Paul Railway Company have commenced the construction of a road 60 miles in length extending from Mazomanie to Portage City ; and W. H. H. Cash, of New Lisbon, has been given the contract for building the first twelve miles, extending from Mazomanie to Prairie du Sac.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Aug. 4, 1881.

Call loans were easily made during the day at 2@2½ per cent on United States bonds and 2½ @3 per cent on Stock Exchange collateral. Time loans were 3@5 per cent, the higher rate being for long time. Prime mercantile paper, 3@4½ per cent. The closing quotation for call loans was 3 per cent.

The posted rates for prime bankers' sterling were 4.83@4 85, The actual rates were 4.82 @4.82½, and 4.84@4.84½, with cable transfers 4.84½@4 85 and prime commercial bills 4 80¾ @4.81. The actual rates for continental exchange are as follows: francs 5.23⅛@5.20, marks 94@ ¼ and 94⅛@¾; and guilders 39¾@⅞ and 40 @⅛ respectively.

By referring to the public debt statement recently issued it will be seen that the total debt of the United States on the 31st of July was $2,067,398,979, less cash in the Treasury $236,878,190 25, leaving net $1,830,520,788 75, a decrease of $10,078,023 23 since 1st July. Of the bonded debt $439,708,050 bears 5 per cent interest, $250,000,000 bears 4½ per cent, $739 347,800 bears 4 per cent, $178,055,150 bears 3½ per cent, and $14,000,000 (Navy pension fund) bears 3 per cent. Upon $9,959,015 23 interest has ceased; $422,313,946 32 bears no interest, being in the form of United States currency, gold and silver certificates and certificates of deposit. Of the cash in the Treasury $154.827,274 89 is available, the remainder being offset by debt due and interest thereon, gold and silver certificates and certificates of deposit outstanding.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 23, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad...	198,982	4,620,121	4,110,162

Clearfield, Pa.....	51,341	1,327,311	816,201

The total tonnage of anthracite coal from all the regions for the week ending July 23, as reported by the several carrying companies, amounted to 654,332 tons, against 405,014 tons in the corresponding week last year, an increase of 249,348 tons. The total amount of anthracite mined for the year is 14,399,998 tons, against 11,587,954 tons for the same period last year, an increase of 2,812,044 tons. The quantity of bituminous coal sent to market for the week amounted to 101,897 tons, against 90,933 tons in corresponding week last year, an increase of 10,964 tons. The total amount of bituminous mined for the year is 2,689,861 tons, against 2,281,944 tons for the corresponding period last year an increase of 407,917 tons. The total tonnage of all kinds of coal for the week is 756,259 tons, against 495 947 tons in corresponding week last year, an increase of 260,312 tons, and the total tonnage for the coal year is 17 089,859 tons, against 13,869,898 tons to same date last year, an increase of 3 219,961 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending July 23 was 186 118 tons, of which 134,109 tons were coal and 52,009 tons coke. The total tonnage for the year thus far has been 4,923,286 tons, of which 3,560,269 tons were coal and 1,363,017 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 23 were 47,315 tons, and for the year to that date 1,087,342 tons, a decrease of 57,523 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 22,399 tons ; year, 735,136 tons ; decrease as compared with 1880, 4,110 tons ; Chesapeake and Ohio Canal —week, 16,079 tons; year, 217,262 tons ; decrease as compared with last year, 62,884 tons. The coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 39,743 tons ; year, 1,008,290 tons. Baltimore and Ohio Railroad—week, 1,137 tons ; year, 35,845 tons. George's Creek and Cumberland Railroad — week, 6,363 tons ; year, 40,688 tons. The Reading Railroad tonnage for last week ending July 30, was 201,000 tons, of which 65,009 tons were sent to and 42,000 tons shipped from Port Richmond, and 15,500 tons sent to and 16,000 tons shipped from E izabethport.—[Phila. Ledger, Aug. 1.

George M. Dallas, Special Master of the Philadelphia and Reading Companies, has filed in the United States Circuit Court his twenty-fifth report concerning the audit of the accounts of the receivers for the month of June. The report shows that the balance on hand in the treasury of the railroad company on June 1 was $441,058 63. The receipts during the month from freights, tolls, &c., were $2,676,498 03. The payments, $2,875,606 51, and the balance on hand July 1, $241,950 15. No new payments on account of deferred income bonds were made during the month. The balance on hand in the treasury of the Coal and Iron Company June 1 was $84,211 85, which added to the receipts during the month made the total receipts $1,298,513 99. The payments were $1,289,144 89, and the balance on hand July 1 was $9,369 10.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Aug. 2, 1881.

The volume of business during the past week has been quite satisfactory, and the market continues to grow steadily stronger day by day. Most Furnaces are declining to sell for future delivery at present prices. The mills are still idle here on account of the strike, with the exception of one which has started with non-union men. They will not start until they can get Pittsburg rates and probably not then unless Manufactured Iron advances.

Northwestern Telegraph Co.

An agreement was filed in the Register's office, this city, on the 29th ult., which shows that the Western Union Telegraph Company has secured a 99 years' lease of the lines of the Northwestern Telegraph Company of Wisconsin, operated in the States and Territories and the Dominion of Canada. The instrument is dated May 7, 1881, and provides that the Western Union Company shall, in addition to paying 7 per cent interest on first mortgage bonds, aggregating $1,180,000, pay a rental of $100,000 for the first year, and a pro rata yearly increase in the rent until it shall reach $150,000 by the year ending July, 1896, and thereafter pay the last mentioned sum annually until the expiration of the 99 years; also all taxes and interest upon the capital stock of the Northwestern Company, which is fixed at $2,500,000, divided into fifty dollar shares. The interest to be paid on the stock is to be 4 per cent the first year, 4¼ for the second, and be increased at the rate of one-eighth of 1 per cent each succeeding year until it reaches 6 per cent in 1896, and to continue at that rate during the remainder of the term of the contract. The Northwestern Company agrees to maintain its organization, and the Western Union grants a further allowance of $2,500 per annum for 14 years for that purpose.

The Chicago, Milwaukee and St. Paul Railway Company have commenced the construction of a road 60 miles in length extending from Mazomanie to Portage City ; and W. H. H. Cash, of New Lisbon, has been given the contract for building the first twelve miles, extending from Mazomanie to Prairie du Sac.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Aug. 4, 1881.

Call loans were easily made during the day at 2@2½ per cent on United States bonds and 2½ @3 per cent on Stock Exchange collateral. Time loans were 3@5 per cent, the higher rate being for long time. Prime mercantile paper, 3@4½ per cent. The closing quotation for call loans was 3 per cent.

The posted rates for prime bankers' sterling were 4.83@4 85, The actual rates were 4.82 @4.82½, and 4.84@4.84½, with cable transfers 4.84½@4 85 and prime commercial bills 4 80¾ @4.81. The actual rates for continental exchange are as follows: francs 5.23⅛@5.20, marks 94@ ¼ and 94½@¾; and guilders 39¾@⅞ and 40 @⅛ respectively.

By referring to the public debt statement recently issued it will be seen that the total debt of the United States on the 31st of July was $2,067,398,979, less cash in the Treasury $236,878,190 25, leaving net $1,830,520,788 75, a decrease of $10,078,023 23 since 1st July. Of the bonded debt $439,708,050 bears 5 per cent interest, $250,000,000 bears 4½ per cent, $739 347,800 bears 4 per cent, $178,055,150 bears 3½ per cent, and $14,000,000 (Navy pension fund) bears 3 per cent. Upon $9,959,015 23 interest has ceased; $422,313,946 32 bears no interest, being in the form of United States currency, gold and silver certificates and certificates of deposit. Of the cash in the Treasury $154,827,274 89 is available, the remainder being offset by debt due and interest thereon, gold and silver certificates and certificates of deposit outstanding.

In the interest bearing debt there is a reduction of $18,500,000, that being the amount of 6 per cent bonds redeemed under the Windom plan of converting this class of bonds into bonds bearing 3½ per cent. This reduction represents the total amount of 6 per cent bonds redeemed since April 1. The low rate bonds make their appearance for the first time in the debt statement published herewith, the amount being a fraction over $178,000,000. The 5 per cent bonds that have been converted into lower rate bonds will appear in the debt statement for September, but those that are called for redemption, amounting to about $35,000,000, will not mature until Oct. 1, after which the 5 per cent bonds will entirely disappear from the monthly debt statement.

The United States Treasury holds bonds amounting to $361,873,000 to secure National bank circulation, which amounts to $356,263,968 in currency and $1,087,675 in gold notes. Of the bonds $228,925,550 are 3½s, $91,870,300 are 4s, $22,696,550 are 4½s, $4,753,600 are 5s, $63,000 are 6s, and $3,564,000 are currency 6s. At the time the funding into 3½s began the 6s and 5s amounted to $213,135,550.

The amount of United States currency outstanding at date is $362,532,079 65, of which $346,681,016 is in legal tenders, $15,474,583 65 in fractional currency, and the remainder in old demand and interest notes long since due.

The total coinage of the U. S. Mints during July, including $2,250,000 standard dollars, was valued at $3,896,200.

The payments made from the Treasury in July, exclusive of payment of interest and principal of the public debt, amounted to over $20,000,000.

The following circular was issued on the 30th ult. from the office of the St. Louis, Iron Mountain and Southern Railway Company:

"The St. Louis, Iron Mountain and Southern Railway Company have for a long time been considering the advantages to result from occupying the territory in Arkansas strictly tributary to the line of their road. This determination has been strengthened by numerous appeals to the company from towns and counties along the projected routes. It has finally been decided by the board, under the advice of the Executive Committee, to build under the authority contained in the Cairo and Fulton Railroad charter a line from Knobel, on the northern State line of Arkansas, southwardly through Crowley's Ridge via Forrest City, on the Memphis and Little Rock Railway, and thence to the southeast corner of Ashley County, on the State line of Louisiana, about two hundred and fifty miles, with a branch eastward to Kennett. This route sweeps the entire range of eastern counties in the growing State of Arkansas.

"The St. Louis, Iron Mountain and Southern Railway Company has contracted for the building of the above line with the Hudson River Contracting Company, and is to pay for the construction of said line in bonds and stock, as provided in said contract, and has also entered into an arrangement with the contracting company whereby the stockholders of the Missouri Pacific Railway Company will be entitled to subscribe for the stock of the contracting company, as hereinafter set forth, thus enabling the subscribers to participate in the profits of the construction under the said contract.

"Nearly all of the shares of the St. Louis, Iron Mountain and Southern Railway have been exchanged for those of the Missouri Pacific Railway Company, and the shareholders of the last-named company, under the arrangement above referred to, will be entitled to subscribe for the stock of the contracting company upon the following terms:

"Each holder of the stock of the Missouri Pacific Railway Company who is a stockholder of record on the 8th day of August, 1881, will be entitled to subscribe for one share in said contracting company for every ten then held by him in the Missouri Pacific Railway Company. Such right to subscribe will expire on the 15th of August, 1881. Any amount not subscribed on or before that day may be disposed of in such manner as may be deemed best. Enough stock in the contracting company has, however, been reserved until the 25th of August, 1881, to enable any holder of shares in the St. Louis, Iron Mountain and Southern Railway Company, who has not already exchanged the same for Missouri Pacific shares, to make such exchange, and thereupon to avail himself of the privilege of making the subscription herein offered.

"An instalment of 10 per cent will be payable on August 15, when transferable receipts will be issued. The residue of the subscription will be payable in instalments not exceeding 10 per cent monthly, as the work progresses.

"If any subscriber or his assignee fails to pay any instalment within ten days after the publication of the call therefor, then such subscriber or his assignee shall, at the option of the contracting company, forfeit all the payments made and all right to any further participation in his subscription.

"The books of the Missouri Pacific Railway Company will be closed for the purpose of this subscription on the eighth day of August, 1881, and reopened August 15."

The closing quotations on Thursday were: Adams Express, 136@138; American Express, 83½@85; American District Telegraph, 47½@50; Chicago, Burlington and Quincy, 161½@162; Canada Southern, 66@67; Chicago and Northwestern, 126¼@126⅝; do. pref., 138½@139; Central Pacific, 93¼@93⅜; Chicago, Milwaukee and St. Paul, 114¾@114⅞; do. pref., 132@133; Cleveland, Columbus, Cincinnati and Indianapolis, 93½@94; Columbus, Chicago and Indiana Central, 22½@22¾; Delaware and Hudson Canal, 110@110⅛; Delaware, Lackawanna and Western, 123⅞@124; Hannibal and St. Joseph, 93@94; do. pref., 114½@115½; Lake Erie and Western, 56½@57¾; Lake Shore and Michigan Southern, 124⅜@124½; Metropolitan Elevated, 83½@84; Manhattan Elevated, 16⅞@17; Michigan Central, 99½@99¾; New York Elevated, 107@108½; New York, Lake Erie and Western, 43⅝@43¾; do. pref., —@86; New York Central and Hudson River, 143¾@143⅞; Ohio and Mississippi 38@38⅛; Ohio Central, 28@28¾; Pacific Mail, 52½@52¾; Panama, —@261; Texas and Pacific, 58⅜@58¾; Union Pacific, 126⅜@126⅝; United States Express, 68@70; Wells Fargo Express, 126@130; Western Union Telegraph, 89¼@89⅜; Wabash, St. Louis and Pacific, 52½@52⅝; do. pref., 89@90¼.

International Bridge Tolls.

Judge Wallace of the United States District Court, Syracuse, N. Y., has rendered a decision in the case of the Canada Southern Railway Company against the International Bridge Company. The litigation was for the purpose of deciding the rate of compensation to be paid by the plaintiff for the use of the bridge of the defendant. The plaintiff claimed that a law of Congress of 1870 gave the judge of the district power to decide the rate of tolls to be paid, which was denied by the bridge company, who claim that even if Congress conferred that power it was unconstitutional. Judge Wallace, in an elaborate opinion, holds that, assuming that Congress intended to confer on the Court authority to prescribe the compensation which the bridge company might charge, no doubt is entertained of the constitutionality of the act, but, in his opinion, Congress did not intend to confer such power. He dismisses the petition of the railway company with costs. The effect of this decision is to allow the bridge company to fix its own rates of toll. The accumulated tolls due from the Canada Southern amount to about $200,000.

The Long Island City and Flushing (formerly the Flushing and North Side) Railroad Company has leased its property and franchises to the Long Island Railroad Company for fifty years. The road extends from Long Island City, by way of Flushing, to Whitestone.

The North Atlantic City Railway has been leased to the Camden and Atlantic Railroad Company. The track of the former road is laid from Absecon Inlet to North Atlantic City, located on Brigantine Island about half way between Holdzkom's Beach and Brigantine Inlet.

Important Street Car Invention.

The Boston Journal says that a method has been patented by which street cars can branch off in any direction, or continue upon the main line, without the use of loose points, and without in any measure altering the speed of the cars, and then adds :

To do this steel-faced open points are used, and between them, and for a short distance between the rails, a narrow rail is laid, curved to the direction in which the cars are required to leave the main line. To the car is attached a small point's wheel, which the driver, when he has to leave the main line, drops into the groove of the center rail, and by these means the car is guided in its proper direction. The points are so arranged that it is never necessary to use the "points' wheel" unless the cars have to leave the main line. This will be found to be a great advantage over the present system on a route where four or five other routes branch off the main line, for instead of the cars having to stop each time the points are against them, they will have an open course from one end of the journey to the other. The inventor and patentee of this system is Mr. William Stirling, Jr., of Rusholme, Manchester, England.

The Fort Wayne, Muncie and Cincinnati Railway was sold at Fort Wayne, Indiana, on the 27th ult., by the United States Marshal for $1,000,000. Elijah Smith, receiver, and S. G. Ralston, of the Farmers' Loan and Trust Company, of New York, were the purchasers for holders of the first mortgage bonds.

The line of the Pennsylvania Railroad near New Brunswick, N. J., has been changed so as to avoid some short curves and make the line straight between that city and Trenton. This was done by a cut a mile and a half long extending from a point about two miles from New Brunswick to Adams Station.

The South Carolina Railroad was sold at Charleston, S. C., by auction on the 28th ult. to W. H. Brawley for the purchasing committee for $1,275,000 over and above the first mortgage debt of about $3,000,000.

The Texas and Pacific Railway Company accepted on the 28th ult. 50 miles more of track west of Carson, which makes the track accepted 100 miles west of Big Springs and 401 miles west of Dallas, and 622 miles west from Texarkana.

John C. Short and William P. Watson have filed a bill in one of the Chicago courts asking for an accounting and the appointment of a receiver for the New York, New England and Western Investment Company.

A mortgage of the Kentucky Central Railroad Company to George F. Bliss and Isaac T. Gales, of New York, for the sum of $6,600,000 has been filed for record in the County Clerk's office of Clark County, Kentucky.

The contract for the construction of the 30 miles of the West Shore Railroad extending from Newburg to Kingston, N. Y., has been awarded and the work commenced.

The first locomotive and car reached Delisle Bridge over the Canada Atlantic Railway on the 21st ult.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent. JNO. N. ABBOTT, General Passenger Agent.

STEAM NAVIGATION, COMMERCE, FINANCE, BANKING, MACHINERY, MINING, MANUFACTURES.

SECOND QUARTO SERIES, VOL. XXXVII., No. 33.] NEW YORK, AUGUST 13, 1881. [WHOLE No 2,364, VOL. LIV.

FIRST MENTION OF STEAM ON THE THAMES.

William Symington, employed by Lord Dundas, constructed the Charlotte Dundas, and to him the merit is due of having first used a "practical steam engine" to drive a vessel against wind and tide. The newspapers of 1801 announce that on the 1st of July "an experiment took place on the River Thames for the purpose of working a barge or any other heavy craft against the tide by means of a steam engine on a very simple construction. The moment the engine was set to work the barge was brought about, answering her helm quickly, and she made way against a strong current, at the rate of two and a half miles an hour."

HARDENING STEEL.

The effect of occluded gases in iron and steel is now being carefully studied by metallurgists in general, and a committee of the Institution of Mechanical Engineers recently raised the question in one of its reports as to whether the hardening and tempering of iron and steel might not be produced by the expulsion of occluded gases during the heating process and their subsequent exclusion by the sudden cooling and contraction. Professor Chandler Roberts has undertaken to answer this question, and by heating rods and spiral wires of steel in vacuo by means of the electric current, and suddenly quenching them in cool mercury, he demonstrates that steel will harden when there are no gases to absorb. The metal was, of course, robbed of its occluded gases by means of an air pump connected with the vacuum chamber, and the parts which were quenched in the mercury were found to be glass hard, while those which did not reach the cold fluid were found to be quite soft. Professor Roberts, therefore, concluded that gases do not play any part in the process of hardening and tempering. Professor Hughes, who has made numerous experiments on the subject, believes that the temper of steel is due to the chemical union of the iron with the carbon. At low temperatures this union takes place only in a slight degree, and hence in soft steel we have the carbon keeping aloof from the iron; but as the temperature is raised the combination is furthered, until, in the case of gray or glass hard steel, we have really a kind of diamond alloyed with iron. Sudden cooling is necessary to fix the combination, for in slow cooling the carbon separates from the iron. This theory is a very promising one, and is supported by a variety of facts; Mr. Stroh, for example, having observed that when an electric spark passes between two iron contact pieces and fuses them the fused part becomes diamond hard, and will scratch a file.—[Engineering.

HOW THE MISSISSIPPI LEVEES ARE BUILT.

A description of the method of building levees is given as follows by William L. Murfee, Sr., in Scribner's Magazine. The space which it is to occupy is first carefully cleaned off; trees, roots, stumps, logs, weeds, even grass and leaves are removed. Then in the middle of the space, extending longitudinally the whole length of the proposed work, is dug a ditch three feet wide and three feet deep, which is to be straightway filled up again. This is called a mock ditch, or as some people say, a "muck ditch," but why "muck," is one of the things that has not been found out. The object of this is twofold—to close out all root holes and to mortise the superstructure into natural earth, thus preventing any sliding under the pressure of the water. As the levee is built of loose earth, its mass coalesces with the loose earth with which the mock ditch was filled, and when the levee has been completed and settled it forms, with the contents of the mock ditch, a homogeneous mass anchored three feet all along the line in the solid ground.

The next process is to build the levee. The material is to be taken only from the outside, or side next to the river, and should not be cut nearer than twenty feet from the base of the levee; the earth is carried in wheelbarrows upon run plank. The dimensions of levees have varied from time to time, according to the amount of funds available for their construction. In any case the top of the levee should be three feet perpendicular above high water mark; the base line should be five, six, or seven feet, according to the ratio in force, for every foot of perpendicular height; the top should be level, and as broad as the levee is high. Thus, where high water mark is four feet above the level of the natural bank, the perpendicular height of the levee should be seven feet, the breadth at the top should be seven feet, and its thickness at the bottom 35 feet, 42 feet, or 49 feet, as the ratio of five to one, six to one, or seven to one might be in force. Taking for illustration, a seven foot levee constructed upon this last ratio, it will be observed that with the water standing four feet deep, there will be on a horizontal line 25 feet of solid earth between the bottom of the water outside and the air inside, and 49 feet between the bottom of the water without and the air at the natural surface of the earth within.

The last but indispensable step in the process of levee building is the "seep water" ditch, which is dug some thirty or forty feet from the inner margin of the levee and parallel with it. The function of this ditch is to receive and conduct away the seep water, or transpiration water, which oozes in considerable quantities through even the most compact of levees. If permitted to remain it would render the ground about the inner base of the levee intolerably muddy, and would operate as a great disadvantage in case of emergency. The seep water ditch must be connected with plantation ditches or otherwise put in communication with the swamp in the rear, so that the water can be carried away.

Finally, as a finishing touch to the new levee, it should be planted with Bermuda grass. If tufts of this grass be set two or three feet apart all over the surface of the levee, it will in a year or two cover it completely with a very dense sod, and by its interlacing roots add materially to its water-resisting capacity. When water stands for a long time against a levee, the current and the waves seriously abrade its surface, cutting in sometimes so deep that an inopportune wind storm would as-

suredly break it. A heavy coat of Bermuda sod is a very efficient preventive of this kind of disaster. I have seen at the end of a long period of high water, a piece of levee deeply indented all along the line, and in some places cut more than half through, while adjoining it was a strip of Bermuda covered levee, subject to the same exposure to wind, wave, and current, which had not apparently lost a pound of earth or a tuft of grass.

Canadian Pacific Railway.

At the annual meeting of the Board of Directors of the Canadian Pacific Railway Company, just closed at Winnipeg, Manitoba, the following business was transacted: first, the approval of the location to Moose Jaw Creek; second the continuation of the location of the survey to Fort Colgarry to be completed this season, and the line itself to be completed next season; third, the location, in conformity with the Winnipeg By law of the Winnipeg and Pembina Mountain branch, and provision for its immediate construction; fourth, the immediate location and construction of the Assiniboine branch from a point twenty miles east of Brandon north-westerly towards the Little Saskatchewan, Fort Ellice, Riding Mountain and Touchwood Hills; fifth, immediate location and construction of the Saskatchewan branch, from a point near the Great Forks of the Qu'Appelle extending in a north-westerly direction; sixth, immediate location and survey of the Souris Branch extending from Brandon south-westerly toward the Souris and Turtle mountain district to within twenty four miles of the international boundary, and then westward parallel to such boundary to the 104th parallel of longitude; seventh, the granting of leases for elevator and grain warehouses at nominal rents. Elevators are to be erected at all important points along the company's line for which grounds will be leased at nominal rates to the persons building them. The Land Commissioners are organizing a Land Department of the road. It will be open this month, and sales of land will begin. Actual settlement will be encouraged by selling at $2 50 per acre, with 50 per cent rebate on all lands brought under cultivation within three years. A higher price will be charged non-settlers to discourage speculators. The construction of freight and passenger stations, offices, workshops and stock and cattle yards within the city of Winnipeg, as soon as the city by-law shall have finally passed, was decided upon,

Philadelphia and Reading Companies.

President Bond's Report of the financial condition of the Philadelphia and Reading Railroad and Coal and Iron Companies, which was issued on the 10th inst. is published in full in the Philadelphia papers. It embodies a plan for the readjustment of the indebtedness of the two corporations, providing for an increase of the capital stock $18,000,000, and the creation of a general consolidated mortgage covering all the property of the Railroad and Coal and Iron Companies, and upon the interest of both companies in all other corporations and properties, whether owned or controlled by lease or otherwise. This mortgage is to be junior to the consolidated mortgage and to the improvement mortgage only; and will contain a provision by which additional bonds may be issued under the new mortgage, so that eventually it will become a first lien upon all the properties of both companies.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of July, were:

These figures represent only the foreign gold cost, freight and duty not included.

Chicago, St. Louis and New Orleans R. R.

J. C. Clarke, Vice President of the Chicago, St. Louis and New Orleans Railroad Company, in a recent interview, gave the following facts regarding the condition of the road:

"There is now a continuous steel track from New Orleans to Fulton, Ky., a distance of 506 miles. Only forty-four miles of iron rail now remain between Cairo and this point and steel rails will soon be substituted. In fact, the steel rails have already been purchased and are now being received. By October 1 there will be entire steel rail communication from New Orleans with Chicago, St. Louis and Dubuque, Ia. The grade of the road is now being reduced, the object being to haul larger tonnage at less expense. Ballasting is being prosecuted as speedily as possible. The section between New Orleans and Canton has already been gravelled. Five new iron bridges are being built and will be turned over by the contractors by October 1. One is being constructed over Mayfield Creek, Ky.; one over the Hatchie River, Tenn., one over Tallahatchie River, Miss.; one over Rhode's Creek, near Terry, Miss., and one over the Hurricane River, Miss. The total length of these bridges aggregates 1,400 feet. They are calculated to carry two tons per running foot."

Denver and Rio Grande Railway.

A dispatch dated Denver, Col., August 6, says that the opening of the Denver and Rio Grande Railway to Durango, 450 miles from that city, in Southwestern Colorado, was celebrated there on the day previous, and then adds:

This is the completion of one of the several extensions of that road now being constructed in this State. The extension just finished is 200 miles long, beginning at Alamosa, on the Rio Grande River, and terminating in the Animas Valley. In this valley there are immense coal deposits 100 miles wide. The valley is also the natural southern outlet for the rich mining district of San Juan County, which has been little developed, owing to the want of proper transportation facilities. Other extensions will tap San Juan County on the east and north, a region covering an area equal in extent to the State of Massachusetts, and intersected by various mountain regions and traversed by many rivers. At present 2,000 men are employed on these extensions, and about three miles of track are laid daily. In April, 1880, 337 miles of road were operated. On the 1st of this month 795 miles were in operation, showing that during the last 16 months 458 miles of road have been completed. These roads are being built in a mountainous country, and will tap a section of the State rich in mineral resources. Eight hundred and fifty miles more of roads are now under contract, and the construction is being pushed as far as the Utah border. The extension to Gunnison City will be completed on Monday next. The other extensions to the mining camps are being pressed forward to completion before the early snow. The increase in the number of miles of road operated, and the great development of the industries of the State, have caused a proportional increase in the railroad earnings. In 1880 the gross earnings for the seven months ended July 31 were $1,439,460 40, and for the same period in 1881 they were $3,104,042 87. The net earnings for the first six months in 1880 were $520,218 58, and for the first six months of this year $1,178,-889 65.

A large force of men are at work preparing to lay a double track on General Burt's railroad from North Adams to Mechanicsville, N. Y.

New York, Saturday, August 13, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AT the meeting of the Joint Executive Committee of the trunk lines and western connections, held in this city, Wednesday, it was agreed to restore the east bound freight rates to the regular tariff rates. Thirty-one roads were represented at the meeting, but it was noticeable and somewhat ominous perhaps that some of the roads, said to have been among the first and most prominent in cutting rates, sent no delegates.

A feature of the International Cotton Exposition, to be held at Atlanta, Ga., from the 5th to the 31st of December, will be the publication by The Tradesman of Chattanooga, Tenn., of general information concerning each State of the South for the guidance of those seeking settlement or investment there. Among other things it is planned to publish complete lists of persons engaged in industrial pursuits in the South, which being classified by States will furnish a directory of Southern industries. Such a work, if successfuliy carried out, as this seems likely to be, should prove of great value, in giving to settlers, capitalists and merchants throughout the country a better idea of the character of the resources of the South and most promising directions in which to work for their development.

THE conference to be held at Utica next week for considering transportation matters, can be made of value both to the railroads and the people, if it is kept clear of political features. Delegates from a large number of commercial and industrial interests are expected to be present, and the varied needs of many localities will be brought forward when if a candid, unprejudiced look over the entire field is taken, much new light will doubtless be thrown upon the railroad question too blindly discussed of late, which will be of service to the railroads as well as to the general public.

THERE is a strong probability that the early fall months will witness an unusual activity in the iron market, in fact the demand is already more active than is usually expected at this season of the year. In the bar iron market there has been considerable excitement among the Eastern dealers during the past week on account of the unusual summer demand and prices have advanced at least ten per cent. The gradual working up of surplus stocks caused by the great demand upon the mills consequent upon the rapid pushing of construction work which the past few months have witnessed, has occasioned the rise. The market is very strong and orders for future delivery at prices anywhere near those now ruling, in many cases are refused at the rolling mills, which are very generally full of orders. Reports from the West show the condition to be much the same there as in the East, with the Western mills even more crowded with orders than the Eastern. Dealers in manufactured iron are finding difficulty in getting orders placed for immediate delivery at any reasonable price, and some very high prices are reported to have been paid where immediate delivery was a necessity. Early in the week more activity and strength was reported as prevailing in the Boston iron market than had been experienced there in many years, one bar iron dealer saying that he had hardly known such a demand for the common sizes of iron during a business experience of eighteen years. With the great consumption of iron increasing and work upon railroad construction showing no probability of abatement the indications point to busy months ahead in the iron market, with heavy fall orders seeking placement early in September.

Some Features of the Passenger Rate Cutting.

It is a little singular that expectations of largely increasing the bulk of traffic should be allowed to have so much influence upon the question of passenger rate cutting. The increase amounts practically to an overdraft on future traffic in perhaps an average of cases. The people who are realizing the most from the cheap rates are included in three classes; those who have been intending to make the trip to the West or to the East at no distant day any way, but make it at an earlier time than they otherwise would on account of the low fares; those who are always inclined to take anything cheap; and the illustrious army of commercial travelers.

The first class is a much larger one than it might appear to be at first sight, for the general prosperity of the past year has given rise to many plans for interchange of visits between Western and Eastern relatives and friends. The interesting exhibitions that are to be held in various parts of the country this fall would have made it peculiarly a traveling season, and to it many of this visiting class had looked as the time for making their proposed trips. Every ticket sold to this class of travelers is a draft on future traffic made at a wild rate of discount. The size of this class is largely increased by those of the third class who are also changing their trips to utilize the low fares.

One of the strong points of a successful commercial traveler is his shrewdness in reducing expenses by handling railroad fares to the best possible advantage. It is a careful study with him, and the alliance between his fraternity and the ticket scalpers is the strongest obstacle the regular passenger agents have to encounter in their efforts to establish satisfactory rates. It will doubtless be found that a large number of commercial travelers have been hurried off on Western trips, or instructed to make the trip direct from New York to Chicago and St. Louis without stopping on the way, and to arrange their routes for stop-overs on their way back, on account of the rate cutting, while many business men not regular travelers are for the same reason now making their trips planned for September and October.

Of the second class, those who take the trip for no reason but to be consistent with their habit of buying a thing because the price is low, there is doubtless a large number being carried, but not so large as would be the case were not the summer an unusually active one in commercial and industrial enterprises which are keeping people generally occupied, while there are no special attractions of importance to draw them away from their work and homes. But it is upon this class chiefly that anything like a desirable return from the low rates can be expected in the way of a legitimate or healthy increase of traffic. It is a question just how the balance does stand concerning the disadvantages of drawing on future traffic in the first and third classes referred to, and the advantages of increasing the traffic in the other class, but it is not a condition over which much enthusiasm can be manifested by stockholders. It is thought that the roads drawing the largest traffic at the low rates will be benefitted by the advertising given them in this manner. Some benefit may reasonably be expected in this direction,

though it must be remembered that few lines can be seen to the best advantage in midsummer travel, and that the impressions of people who pass over the line in great crowds, for whom the officials find it difficult to provide their usual accommodations, are not of the most desirable kind for good advertising purposes.

Organization.

The La Salle and Clinton Railroad Company was permanently organized on the 27th ult., and the following officers elected: Alex. Campbell president, Daniel Evans secretary and William Reed treasurer, all of La Salle, Ills.

At a preliminary meeting of the incorporators and friends of the Quincy, Vandalia and Eastern Railroad Company, held in Jerseyville, Ill., J. S. Panefill of Chicago, was elected president, George W. Ware of Jerseyville, vice president, and S. H. Bowman of Jerseyville, treasurer.

The charter of the Huntsville, New Orleans and Western Texas Railroad, filed on the 2d inst. at Austin, Texas, provides for a line from Sabine Pass to a point on the International and Great Northern, a quarter of a degree south of the thirty-first parallel, a distance of 200 miles. The capital stock is $4,000,000.

Articles of incorporation of the Port Richmond and Bergen Point Ferry Company have been filed in the County Clerk's Office, Hudson County, N. J. The company's capital stock is $40,000, and its purpose is to operate a ferry between Port Richmond, Staten Island, and Bergen Point, N. J. Capt. A. N. Nickerson is president of the company.

Articles of incorporation of the Highland Junction Railroad Company were filed with the Secretary of State of New York on the 8th inst. Capital, $1,000,000. The road will be 10 miles long and will run from Matteawan, Duchess County, across the Hudson River at the Storm King Mountain on a suspension bridge to the Cornwall station on the New York, Lake Erie and Western Railroad.

The State Department at Harrisburg, Pa., has chartered the Monongahela East Shore Railroad Company, the line of which will run a distance of eighty miles from a point opposite McKeesport, Alleghany County, to the West Virginia State line. The capital stock is $800,000. The officers are: President, W. C. Quincy; directors, David Hostetter, James R. Bennett, Henry Hice and H. DePuy.

At the recent annual meeting of the stockholders of the Cleveland and Mahoning Valley Railroad Company, the following officers were re-elected: President, S. Burke; vice president, J. H. Devereux; treasurer, E. R. Perkins; secretary, E. E. Poppleton. E. R. Perkins was elected director in place of General H. S. Huidekoper, Postmaster of Philadelphia, and E. B. Hale in place of Henry E. Parsons. Charles Pease was re-elected. The balance of the board held over.

The following gentlemen have been elected directors of the Central Pacific Railroad Company for the ensuing year: Leland Stanford, C. P. Huntington, Charles Crocker, C. F. Crocker, F. H. Miller, Jr., W. V. Huntington, and E. W. Hopkins. The officers are: President, Leland Stanford; first vice-president, C. P. Huntington; second vice-president, Charles Crocker; secretary, E. H. Miller, Jr.; treasurer, E. W. Hopkins.

Articles of incorporation of the Joliet, Rockford and Northern Railroad Company were filed in the office of the Secretary of State of Illinois on the 5th inst. The capital stock is $1,500,000. It is proposed to construct this road from Joliet westward through Shendan, and thence north to Rockford. The incorporators are T. J. Potter, L. O. Goddard, and H. W. Weiss of Chicago; and E. P. Ripley, of Riverside, and J. L. Lathrop, of Winnetka.

The Buffalo, Baltimore and Ohio Railroad Company was incorporated on the 2d inst. by Henry C. Ranney, Noyes B. Prentice, James Wade, James D. Cleveland and Orlando Hall, of Cleveland. In Ohio the western terminus is at Chicago junction, in Huron county, and the eastern on the State line, in Mahoning county, passing through the counties of Huron, Richland, Ashland, Wayne, Stark, Summit, Portage and Mahoning, with a capital stock of $750,000.

Articles of incorporation of the Indiana State Telegraph Company have been filed with the Secretary of State. The line will extend from Kokomo to a point on the Illinois State line, at the intersection of the Toledo, Cincinnati and St. Louis railroad. The capital stock of the company is $25,000, owned by John M. Corse, of New York; Alfred A. Thomas, of Dayton, Ohio; Edward Corse of Chicago, and W. G. Murray, of Frankfort, Indiana.

The Chesapeake, Columbus and Chicago Railway Company has filed articles of incorporation in Columbus, Ohio, with a capital stock of $1,000,000. This line is designed to start from a point in Lawrence County, Ohio, opposite Huntington, W. Va., and pass through the counties of Lawrence, Scioto, Pike, Ross, Pickaway, Franklin, Madison, Union, Champaign, Logan, Shelby, Auglaize, Harden, Allen, Mercer and Van Wert, to a point on the State line between the towns of Wilshire and Dixon, in Van Wert County.

The charter of the Paris and Great Northern Railroad Company was filed in the Secretary of State's office at Austin, Texas, on the 28th ult. It has a capital stock of $300,000 and calls for the building of a standard gauge road thirty miles in length to connect at Red river with the St. Louis and San Francisco or any other road building through the Choctaw nation. The office of the company is at Paris, Texas, and the officers are: J. N. Adams, president; G. J. Wright, vice president; O. C. Connor, secretary, and S. E. Clemans, treasurer.

Special articles incorporating the Lake Superior and Dakota Railroad Company were filed with the Secretary of State of Minnesota on the 9th inst. The object is the construction of a railroad and telegraph line from Duluth to the boundary line between Minnesota and Wisconsin and to the Red River of the North above the eleventh parallel. The capital is $5,000,000. The directors are Springer Harbaugh, William Augulim, Frank Ives, Newton Grover, ex-Gov. Cushman, K. Davis, and Charles Lockhart.

Articles of incorporation were filed on the 5th inst. with the Secretary of State of Indiana of the St. Louis and Eastern Railroad Company. The capital stock is $2,000,000. It is proposed to construct a line from the point of connection with the Danville and St. Louis Railroad at the place where the latter road intersects the St Louis, Alton and Terre Haute Railroad; thence running south to East St. Louis. The incorporators are: C. C. Farland, W. H. A. Brown, F. G. Tibbetts, and Robert Wallace, of Chicago; Malcolm Peters, of Philadelphia, and H. W. Beckwith, of Danville.

The reorganization was completed at Memphis, Tenn., on the 3d inst. of the Holly Springs Railway and its connecting lines, forming a continuous line from Memphis to the sea-board at Brunswick, Ga. A new Board of Directors was elected as follows: Frederick Wolffs, Jesse Seligman, Otto Plock, Edward R. Bacon, and Charles E. Lewis, of New York, and J. M. Billips, E. O. Sykes, and W. S. Featherstone, of Mississippi. Mr. Wolffe was elected president, and M. Calm of New York, secretary and treasurer. The work upon the unconstructed portions of the road will be commenced at once.

The New York, Chicago and St. Louis Railway Company filed articles of incorporation with the Secretary of State of Illinois on the 5th inst. Capital stock $4,000,000. It is proposed to construct a line of road from a point in Vermillion County, running thence through the counties of Champaign, Edgar, Douglas, Coles, Moultrie, Sheloy, Christian, Montgomery, Fayette, Bond, Macoupin, Madison and St. Clair to East St. Louis. Incorporators and first board of directors—Malcolm Peters, of Philadelphia; W. H. A. Brown, Samuel H. Austin, Jacob M. Duncan and Frank Bierce, of Chicago, and George B. Easton, of Louisville, Ky.

A dispatch from Portland, Oregon, says that articles of incorporation have been filed by L. L. Hawkes, George W. Phelps and George S. Brooks for a company to be known as the Oregon and China Mercantile Company. The capital stock is $40,000, divided into 400 shares. The object of the corporation is to hire, buy and charter vessels to run between Portland and any city in China, and to transport laborers and others to and from these places. Chinese goods are also to be bought and sold. The company is granted the right to hire and employ laborers to build railroads, cut timber and do any other work that may required. The charter is perpetual.

A charter for the Fort Scott and Carthage Railroad Company has been filed with the Secretary of State of Kansas. Capital stock, $650,000; place of business, the county of Crawford in Kansas, and the counties of Barton and Jasper in Missouri. Among the directors are Geo. H. Nettleton, Wallace Pratt, J. P. Ford, W. J. Ferry, O. E. Learned, Ira Harris, Chas. W. Blair and other prominent railroad men of Kansas and Missouri. Also a charter for the Beatrice and Great Bend Railroad. Capital stock, $4,000,000; place of business, Clifton, Washington County, Kan. Also the Fort Scott Construction Company for the purpose of building and equipping the Fort Scott, Topeka and Lincoln Railroad. Capital stock $25,000.

Articles of incorporation of the Brainard, St. Paul and Grand Forks Railroad and Telegraph Company and branch lines were filed in the office of the Secretary of State of Minnesota on the 9th inst. The incorporators are Charles A. Degraff and B. B. Eaton, of St. Paul, and Charles Kindred, Chauncey B. Sleeper, Frank B. Thompson, Newton McFarden, and B. F. Hartley, of Brainard, Minn. The capital is $5,000,000, in 50,000 shares of $100 each. The main line will run on the most direct route to Grand Forks, Dakota Territory. One branch will be constructed from Princeton, Mille Lacs County, to Pine City; a second from Princeton to the Iowa State line, and a third from Princeton to the Wisconsin State line at Taylor's Falls.

Interest and Dividends.

The regular guaranteed quarterly dividend at the rate of Seven per cent per annum of the Cleveland and Pittsburg Railroad Company will be paid Sept. 1 by the Farmers' Loan and Trust Company, No. 26 Exchange place.

The Quicksilver Mining Company will pay Aug. 17, a dividend on its preferred stock of 2½ per cent, of which 2½ per cent represents the pro rata division of net earnings on hand, and a dividend on its common stock of 2½ per cent, the pro rata division of such earnings.

The directors of the Mobile and Ohio Railroad Company have ordered the payment of interest at the rate of Seven per cent on the first preferred income and sinking fund debentures, payable at the New York agency, as follows: 3½ per cent on Sept. 1, 1881, and 3½ per cent on Feb. 1, 1882; also, Two per cent on the second debentures, payable as shall hereafter be advised.

Personal.

Col. F. W. Cumberland, manager of the Northern and Northwestern Railways or Canada, died at Toronto August 4.

W. Tomlin, general ticket agent of the Naugatuck Railroad, died in Bridgeport, Ct., Saturday, aged 58 years.

J. L. Kirk, assistant auditor of the Baltimore and Ohio Railway Company, has tendered his resignation to accept the position of chief auditor of the Pittsburgh and Western Railroad.

Levi P. Morton, the newly appointed United States Minister to France, was presented to M. Barthelemy St. Hilaire, French Minister of Foreign Affairs, on Wednesday of last week.

H. S. Morse, formerly general superintendent of the Indianapolis, Decatur and Springfield Railway, is now general superintendent of the New Orleans Pacific, with headquarters at New Orleans.

The directors of the Rutland Railroad Company have elected the following officers: John B. Page, president; J. H. Williams, clerk of the board; J. M. Haven, clerk and treasurer of the corporation.

It is said that the late Mark Hopkins of San Francisco, although worth $30,000,000 never had a bank account and that though he spent $1,750,000 in the construction of a house, his estate has not a single receipt for expenditures.

Col. Charles P. Lemar widely known in the Northwest as a prominent mining and railroad man, died at Shullsburg, Wis., Monday, at the age of sixty-one years. He built the Southern Minnesota Railroad, was a large contractor on the Illinois Central Road and had commanded several large Mississippi steamboats.

Wm. A. Baldwin has accepted the position of manager of the Pennsylvania Company's Northwestern lines west of Erie. Robert Neilson the present superintendent of the Elmira and Canandagua division of the Northern Central Railroad will succeed Mr. Baldwin as superintendent of the Philadelphia and Erie Railroad.

Gen. Horace Porter has been elected president of the New York, West Shore and Buffalo Railroad Company; Charles Paine has been elected general manager. General Porter has of late been vice president, and one of the active managers of the Pullman Palace Car Company, and Mr. Paine has been for a long time general superintendent of the Lake Shore and Michigan Southern Railway.

Manufacturing.

The South Pueblo Steel Works, the first steel works established in Colorado, are expected to start up at Pueblo this month, and to be turning out steel rails by next December. The works cost over $1,000,000. They have already contracted to furnish the Denver and Rio Grande Railway Company with 30,000 steel rails for their extensions. This will be abont the capacity of the works for the first year. The company owns several iron mines near Placer and South Arkansas to which side tracks will be extended by the railroad company.

The Gilliland Electric Manufacturing Company, of Indianapolis, which has made a wide reputation for the manufacture of electric apparatus, made a shipment to Antwerp, Belgium, last month including 1,000 telephone bells and fifteen switch boards, etc., which is said to be the largest shipment of telephone supplies ever made. Other shipments of similar size are to follow from time to time. The Cincinnati Commercial speaks of this manufactory of telephone supplies as being the largest of the kind in the world, and says: "The company is named after E. T. Gilliland, our western Edison, a Cincinnati boy in whose well and hard earned prosperity a host of old friends rejoice.

The new switch patented by Wm. Lorenz, chief engineer of the Philadelphia and Reading Railroad, and now in use on that road is so constructed as to avoid any possibility of throwing a train off the track. In the ordinary switch all the rails are of the same width, and when they are open there is an abrupt break. In the Lorenz patent the outer rail of the switch is full width but the inner rail of the track is much heavier. The switch is kept in place by a gum ball capable of yielding, and the rails are braced with iron rods. If the switch is wrongly set, the weight of the train closes the rails and the engine runs on the switch, but cannot be thrown off the track.

Railroad Earnings.

Central Pacific, month of July, $1,859,000, July, 1880, $1,840,067; first seven months 1881, $12,652,544; corresponding period 1880, $10,344,761.

Great Western of Canada, week ending July 29, $92,099, corresponding week last year, $93,278; aggregate increase Jan. 1 to July 29, over corresponding period last year, $190,116.

Flint and Pere Marquette, week unding July 31, $42,800 20, corresponding week last year, $36,703 75, aggregate increase from Jan. 1 to July 31, over corresponding period last year, $185,701 10.

Railroads in Mexico.

The Mexican "Diario Oficiel" publishes the following notes on railway progress in Mexico:

On the Mexican Central Railway the rails have been laid five miles beyond Tula and a large body of men are engaged in the work of grading toward San Juan del Rio. On the Tampico Division from 2,000 to 3,000 men are employed and are pushing work to connect with the San Luis extension. Several car-loads of materials have arrived from Tampico. Over the main line of the Central and on all its branches there are twenty-two divisions of engineers at work.

It is expected that the Toluca Division of the National will be inaugurated on the 16th of September prox.

The Government has received and approved five kilometres of the Tehuantepec Interocean Railway, and has given orders to pay the subsidy due for the same. The company are employing 1,500 men in the works of construction, and are pushing the enterprise as fast as circumstances will allow.

The grading on the Mexican Southern is expected to begin in about two months.

On the Sonora Railroad grading has been completed to a point fifteen miles north af Hermosillo.

A railroad concession has been granted to Romero Rubio, from Puebla to El Exiaco, a coal mine district, with a subvention of $6,000 per kilometre. It is stipulated that the road shall be finished within eight years.

The Intercolonial Railway receipts for the first six months of this year show an increas of $87,390. Those of the month of June were $147,097, as compared with $135,576 for June, 1880, showing an increase of $11,521. Of the June receipts, $74,008 were for freight, and $53,099 for passengers and mails.

Production of Iron and Steel.

According to the Report of Mr. James M. Swank, Secretary of the American Iron and Steel Association, the production of pig iron in 1880, in net tons, was 4,295,414; production of spiegeleisen in 1880, (included in pig iron,) net tons, 19,602; production of all rolled iron, (including nails and excluding rails,) net tons, 1,838,906; production of Bessemer and steel rails, net tons, 954,460; production of open hearth steel rails, net tons, 13,615; production of iron and all other rails, net tons, 493,762; total production of rails in 1880, net tons, 1,461,837; production of iron and steel street rails, (included in above,) net tons, 16,894; production of cut nails and spikes, included in all-rolled iron, kegs of 100 pounds, 5,370,512; production of crucible steel ingots, net tons, 72,424; production of open hearth steel ingots, net tons, 112,953; production of Bessemer steel ingots, net tons, 1,203,173; production of blister and patented steel, net tons, 8,465; production of all kinds of steel in 1880, net tons, 1,397,015; production of blooms from ore and pig iron, net tons, 74,589; imports of iron and steel in 1880, $80,483,365; exports of iron and steel in 1880, $12,969,995; imports of iron ore, gross tons, 493,408; imports of steel blooms, net tons, 65,000; production of Lake Superior iron ore, gross tons, 1,987,596; production of anthracite coal, gross tons, 28,437,242; production (estimated) of bituminous coal in 1880, gross tons, 43,000,000.

The quarterly report of the Kansas Board of Agriculture shows the acreage in that State in winter wheat to be 1,974,693, a decrease of 241,254 acres compared with last year. The estimated yield this year is 23,152,399 bushels, or an average of nearly twelve bushels per acre. The acreage in spring wheat is 208,197, a decrease of 20,318 acres; and the acreage in corn, 4,171,544, an increase of 617,158 acres. According to the Department of Agriculture the crop of wheat last year was 19,850,000 bushels, or an average of about ten bushels per acre. Thus it would appear that Kansas will give over 3,000,000 bushels more wheat than last year.

The following is a statement of the business of the New York canals from the opening of navigation to Aug. 1, 1881, as compared with the corresponding period in 1880: tons cleared, going west, 1880, 733,614; 1881, 608,540; loss in 1881, 125,074. Tons cleared, going east, 1880, 2,266,907; 1881, 1,588,866; loss in 1881, 678,041. Tolls collected, 1880, $534,693 56; 1881, $266,386 10; loss in 1881, $268,307 46. Miles traveled by boats cleered, 1880, 5,001,710; 1881, 2,977,190; loss in 1881, 2,024,520. The canals were opened for business on the 17th of May, 1881, and on the 15th of April, 1880.

The Central Railroad Extension of Long Island, being that portion of the line operated by the Long Island Railroad Company between Bethpage Junction and Babylon, was sold at the County Court-house, Long Island City, last week under a foreclosure decree, and purchased by B. S. Henning, vice-president of the Long Island Railroad Company.

AMERICAN RAILROAD BOND LIST.

Interest paid by United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,426,644 65; interest repaid by cash payments: 5 per cent net earnings, $658,198 87; balance of interest paid by United States, $36,385,428 50.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 30, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

The new section of the New York, Chicago and St. Louis Railway between Chicago and Buffalo, is reported to be progressing rapidly. Fifty miles of track are laid. It is also stated that the work is being pushed from Chicago to Fort Wayne. One hundred and fifty tons of steel rails are used daily, covering nearly two miles of track. Five thousand men are employed. The company recently purchased property in Cleveland to the amount of $1,800,000 for terminal facilities and depots, and work on the new buildings begins at once. The rails are imported from England. The estimated cost of the road is $15,000,000.

Regular trains are running on the Bradford, Eldred and Cuba (narrow gauge) Railway from Eldred as far as Ceres. Most of the passengers are bound for the new oil camp at Richburg. Bradford and Eldred are in Pennsylvania; Cuba, Ceres and Richburg, are in Allegany County, N. Y.

The St. Louis, Jerseyville and Springfield Railroad has been leased in perpetuity to the Wabash Railroad Company.

Philadelphia Stock Exchange.

Closing Prices for the week ending Aug. 9.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Aug. 11, 1881.

Early in the day the money market was easy at 2½@3½ per cent for call loans; in the afternoon the quotation for call loans was 3@4 per cent; and at the close 2@2½ per cent. The highest rate paid by the stock brokers during the day was 4 per cent.

Sixty day's sterling bills were quoted at 4.82 @½, while demand drafts were 4.84¼@½, and 4.84¾@4.85. The actual rates for commercial sterling were 4.80½@¾. The posted rates for prime bankers' sterling were 4.83@4 85. The actual rates for continental exchange were as follows: francs 5.24⅜@5.23¾, and 5.21⅛; marks 94@⅛; and 94½@⅝; and guilders 39¾@40 respectively.

Numerous applications are being received at the office of the United States Treasurer at Washington for the August quarterly interest on the 5 per cent registered bonds which have not been continued. Under the terms of the one hundred and fourth call, which was issued on the 1st of July, notice was given that the 5 per cent registered bonds, issued under the acts of July 14, 1870, and Jan. 20 1871, outstanding and uncalled, would be paid at the United States Treasury on the 1st of October, with interest accrued thereon from May 1, 1881, and that the interest on said bonds would then cease. The circular also provided that holders of such bonds might present them for redemption at any time prior to Oct. 1, receiving accrued interest from May 1 to date of presentation. In consequence of this call the August interest is waived by the departmen

and the bonds with accrued interest will be paid at any time they are presented for redemption.

There is said to be in the United States Treasury no less than $10,782,675, being the principal and interest due and unpaid on bonds which have matured, and on which interest has ceased, and for which no claim has been made. Some of this money has been awaiting an applicant, or plicants, since the year 1837—more than 44 years.

The Liquidating Board of Memphis, Tenn., give notice that they are prepared to fund the debt of that city under the terms of the act of the State Legislature, approved 6th April, 1881. The bonds must be presented prior to 1st December, 1882.

Rights of Express Companies.

Judge Geo. W. McCrary, of the United States Circuit Court, Little Rock, Ark., has rendered a decision in the suit brought by the Southern Express Company to restrain the St. Louis, Iron Mountain and Southern Railroad Company from charging the complainants higher rates on express matter than it charges for similar express matter received from or delivered to itself or the Pacific Express Company, and also from discriminating against the plaintiff in favor of itself or any other express company or person in the matter of rates. A temporary injunction was granted, which the respondent prayed should be dissolved. By consent the case was submitted to Judge Mcrary. In his decision the Judge holds, first, that a railroad company is quasi public property and bound by the laws regulating the powers and duties of common carriers, persons, and property ; second, that it is the duty of such company, as a public servant, to receive and carry goods for all persons alike, without injurious discrimination as to rates or terms ; third, that the business of expressage has grown into a public necessity ; it is the means whereby articles of great value may be carried over long distances with certainty, safety and celerity, being placed in the hands of a special messenger who is to have the charge and care of them en route. Railroad companies must, in common with the public recognize the necessity for this mode of transportation, and must carry express packages and a messenger in charge thereof for all express companies that apply on the same terms, unless excused by the fact that so many apply it is impossible to accommodate all, a state of things not likely to occur ; if it be said that this is giving to express companies privileges not afforded to other shippers, the answer is, the nature of the express business makes special facilities for its transaction necessary, and the case is, therefore, properly exceptional ; fourth, it is not necessary now to determine whether a railroad company may, under its charter, engage in the express business and undertake to carry and deliver packages beyond its line. It is enough for the present to say that if it professes to engage in the business at all, it must do so upon terms of perfect equality with all other express companies, and the court will see that it does not take to itself any privileges it does not extend to complainant. The motion to dissolve the injunction is overruled.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 30, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad	208,069	4,828,191	4,228,146
Schuylkill Canal	25,681	280,397	230,838
Lehigh Valley	124,025	3,562,908	2,730,804
Del., Lack. & Western	94,854	2 309,334	1,886,978
Shamokin Valley	27,694	597,887	449,724
Central New Jersey	120,926	2,371,378	1,876,264
United R. R. of New Jersey	31,273	867,444	585,684
Pennsylvania Coal	31,047	710,266	554,619
Delaware and Hudson	94 090	1,954,837	1,632,155
Huntingdon & Broad Top Mt.	13,986	268,310	262,535
Penn. and New York	36,107	927,685	709.077
Clearfield, Pa.	49,211	1,376,522	854,187

The total tonnage of anthracite coal from all the regions for the week ending July 30, as reported by the several carrying companies, amounted to 671,606 tons, against 427,677 tons in the corresponding week last year, an increase of 243,929 tons. The total amount of anthracite mined for the year is 15,071,604 tons, against 12,015,631 tons for the same period last year, an increase of 3,055,973 tons. The quantity of bituminous coal sent to market for the week amounted to 102,614 tons, against 90,643 tons in corresponding week last year, an increase of 11,971 tons. The total amount of bituminous mined for the year is 2,792,475 tons, against 2,372,587 tons for the corresponding period last year an increase of 419,888 tons. The total tonnage of all kinds of coal for the week is 774,220 tons, against 518 320 tons in corresponding week last year, an increase of 255,900 tons, and the total tonnage for the coal year is 17,864,079 tons, against 14,388,218 tons to same date last year, an increase of 8 475,861 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending July 30 was 202 784 tons, of which 149,777 tons were coal and 54,307 tons coke. The total tonnage for the year thus far has been 5,116,070 tons, of which 3,700,046 tons were coal and 1,416,024 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 30 were 51,280 tons, and for the year to that date 1,138,612 tons, a decrease of 48,770 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 23,553 tons ; year, 758,715 tons ; decrease as compared with 1880, 5,851 tons ; Chesapeake and Ohio Canal—week, 19,946 tons ; year, 236,441 tons ; decrease as compared with last year, 55,738 tons. Pennsylvania Railroad—week, 7,493 tons ; year, 143,085 tons ; increase compared with 1880, 12,448 tons. The coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 42,481 tons ; year, 1,050 771 tons. Baltimore and Ohio Railroad—week, 1,265 tons ; year, 36,909 tons. George's Creek and Cumberland Railroad—week, 7,427 tons ; year, 48,115 tons. The Reading Railroad tonnage for last week ending August 6, was 164,500 tons, of which 52,700 tons were sent to and 53,500 tons shipped from Port Richmond, and 7,400 tons sent to and 10,900 tons shipped from Elizabethport.—[Phila. Ledger, Aug. 8.

The Baltimore and Cumberland Valley Railroad was completed from Waynesboro, on the Western Maryland Railroad, to Chambersburg, Penn., on the 4th inst., the last spike being driven a short distance from Chambersburg at 4.50 p. m. on that day. The track layers are now pushing on to Shippensburg 11½ miles further, and 33 miles from the junction with the Western Maryland Railroad at Edgemont. As soon as the track has been put in perfect alignment and surface, which will probably not occupy more than another week, the road will be formally opened to Chambersburg. The work on depots, sidings, turntables, etc., is keeping pace, and will be in readiness upon the opening day.

Illinois Central Railroad.

During the month of July, 1881, the traffic on the lines operated by this company was : (estimated)

In Illinois	$548,936 00
In Iowa (leased lines)	168,158 00
Total	$717,094 00

The traffic for the same month in 1880, on the same mileage : (actual)

In Illinois	$587,732 40
In Iowa (leased lines)	136,362 58
Total	$724,094 98

During July, 1881, the land sales were 1,030.34 acres for $5,709 69, and the cash collected on land contracts was $7,759 87.

L. A. Catlin, Secretary.

Great Western Railway of Canada.

The gross receipts, working expenses and net earnings of the Great Western Railway of Canada for the month of June, 1881, excluding leased lines, were :

	1881.	1880.
Gross receipts	£68,200	£74,000
Working expenses, including transfers to reserve funds	53,500	53,500
Net	£14,700	£20,500

—showing a decrease in both gross and net receipts of £5,800.

The aggregate for five months from February 1, 1881, was :

	1881.	1880.
Gross receipts	£394,200	£364,200
Working expenses	282,600	251,400
Net	£111,600	£112,800

—showing an increase in gross receipts of £30,000, with an increase in working expenses of £31,200, making the decrease in net receipts, £1,200.

According to the official report, just issued, the total acreage of wheat in Minnesota for 1880 was 2,960,073 acres, and for 1881 2,960,678 acres, showing an increase of only 605 acres. The crop for 1880 is reported to be 39,371,799 bushels, which gives an average yield per acre for the State of 13.30 bushels. The average yield per acre for the State of the other principal cereals was for 1880 : oats, 33.49 bushels ; corn, 31.07 ; barley, 23 21. The increase in acreage for 1881 is : oats, 8.06 per cent ; corn, 12.62 per cent, and barley, 71.24 per cent.

The New York and Brighton Beach Railroad was sold at auction on the 4th inst. by the Sheriff of Kings County to satisfy two judgments against it. It was bought by Titus B. Eldridge, one of the judgment creditors, for $8,500. The sale is subject to a mortgage of $250,000.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

SECOND QUARTO SERIES, VOL. XXXVII., No. 34.] NEW YORK, AUGUST 20, 1881. [WHOLE No 2,365 VOL. LIV.

HOW RELIGION IS INTRODUCING RAILROADS INTO JAPAN.

In speaking of the project of building a railroad between Tsuruga and Kanazawa, the building of which is soon to be commenced, the Yokahama Weekly Mail, of Japan, says: The five provinces of Kaga, Noto, Yetchiu, Yechizen, and Yechigo have been for centuries known as the chief domiciles of Buddhist devotees in Japan. In feudal times, indeed, it was often found necessary to impose some legal restraint upon the fanatical generosity of the people, who were forever seeking opportunities to carry their money and goods to the treasuries of the great shrines. It was then that the feudal chiefs instituted a species of protection very much less irrational than that which seeks nowadays to make streams of useless metal debouch upon some favored country, until, as an eminent writer says, its inhabitants perish, like Midas, amid heaps of gold. The great feudatories drew a military cordon round their fiefs and gave the sentries orders to admit, without question, anybody carrying a parcel inward and to stop all who attempted to leave the Province similarly incumbered. This action must have seriously diminished the votive offerings at the shrines, but it gradually converted some of the fiefs into immense warehouses of valuables, and at the present moment the western midland districts contain the wealthiest and best furnished yeomen's dwellings in all the breadth of the land.

Quite recently we have had occasion to record instances of enthusiastic munificence displayed by the people of the central counties in the matter of rebuilding one of the great Monto shrines at Kiyoto. Now it is the priests of these very shrines, Nishi-hongwan and Higashi-hongwan, who propose to visit every house in Kashiu and Yechizen, selling shares in the new railway company. Crafty gentlemen these Monto shavelings! Given a railroad running from Kiyoto, along the banks of Lake Biwa, to Tsuruga, and another passing thence through the heart of Yechizen and Kaga, and we can fancy that the cloisters of Hongwan-ji would echo with the sounds of a good many multitudes of feet on saint-days. We know, at any rate, how it fares with "Daishisama" of Kawasaki on the 21st of every month.

But however this may be, it is to be hoped that the proposed railway will prove something more than a line in the clouds. Our malcontent contemporary, whose motto seems to be, "What good can come out of Japan?" points the shafts of his weighty wit at the notion of his improving harbors before the ships to call there exist. To be consistent he should be equally jocular at the expense of railroads constructed before the goods they are to carry have been manufactured. But the Yokohama public is lenient. It is still content to find some grain of method in any crop of madness, though at times, we fancy, it must be inclined to say, with Bassanio's permission:

"In print what plea so tainted and corrupt,
But being smothered in a sea of ink,
Obscures the show of evil."

The railway, meanwhile, will progress under holy auspices, and it may be that before the first train brings its freight of pilgrims to Saikiyo, we wapish journalists shall have learned the truth of the old adage: "Troppo disputare la verita facrrare."

UTILIZING ANTHRACITE COAL DUST.

In speaking of the manufacture of pressed fuel in large blocks from anthracite coal dust, which has been carried on at Rondout for some time under the auspices of the Delaware and Hudson Canal Company, The New York Tribune alludes to a machine recently perfected for converting the dust into egg shaped lumps and says:

The difficulty in treating anthracite dust for fuel is two-fold. First, there must be mingled with it some binding material which will hold it together in lumps while it burns, for if the lumps crumble before combustion is completed the grate will be clogged with the dust and the draft stopped. Second, the process of manufacture must be so cheap as to bring the coal dust fuel in competition with coal at the lowest rate coal is sold at. American inventors who have grappled with this double problem have had little aid from European experience.

Pressed fuel is largely used in Europe, but it is made from bituminous coal dust, which can easily be rendered adhesive; and besides, the price of fuel is so much greater there than here that the manufacturer of the artificial article has a larger margin to count upon between the cost of his product and that of coal. Mr. Loiseau first tried clay as a binding substance, and coated his egged-shaped lumps with limewater. The fuel thus prepared burned well, and was exhibited at the Centennial in a separate building near Machinery Hall, but a little experience showed that it would not stand the effect of water or atmospheric action long without crumbling, so the inventor had to begin anew. His present process uses a little bituminous coal dust mixed with the anthracite, and a little coal-tar pitch.

It is claimed that a perfect domestic fuel is produced by the new process, and that the machine now in operation at Port Richmond, Philadelphia, turns out thirteen tons an hour at a cost of manufacture so low that a profitable business can be made of transporting the dust from the mines and converting it into lumps. Doubtless this enterprise and the one at Rondout are but the beginnings of an important industry which will in time make use of the millions of tons of anthracite dust now cumbering the ground around the "crushers" at the entrances to the mines, and will thus open a new source of fuel supply.

HOW SCREWS ARE MADE.

The rough large wire in big coils, by drawing through a hole smaller than itself, is made the size needed. Then it goes into a machine that at one moment cuts it in proper length and makes a head on it, when it is put into sawdust and "rattled" and thus brightened. Then the head is shaped down smoothly to the proper size and the nick put in at the same time. After "rattling" again in sawdust, the thread is cut by another machine, and after another rattling, and thorough drying, the screws are assorted by hand (the fingers of those who do this move almost literally like lightning), grossed by weight and packed for shipping. That which rendered it possible for

machines to do all this is a little thing that looks like and opens and shuts like a goose's bill, which picks up a single screw at a time, carries it where needed, holds it till grasped by something else, and returns for another. This is a wonderful piece of automatic skill and usefulness, 93 gross per day being the regular work of one machine.

Pennsylvania Company.

The Pennsylvania Company, which controls the lines west of Pittsburg that belong to the Pennsylvania Railroad, is a corporation that has recently been brought into prominence by the declaration of a 4 per cent dividend on its capital. This dividend, amounting to $480,000 on the $12,000,000 capital, went into the treasury of the Pennsylvania Railroad, the parent company, which is the sole owner of the Pennsylvania Company stock. This company has recently made a report of its operations in 1880, which shows the following to be the gross and net earnings for the year of each of the railways which it controls:

	Gross Earnings.	Net. Earnings.
Pennsylvania Company:

* Deficit.

After providing for all rentals, &c., the following profits are shown: Pennsylvania Company, Proprietary Department, $68,605; Union Line Bureau, $754,017; Pittsburg, Fort Wayne and Chicago Railroad, $1,589,543; New Castle and Beaver Valley Railroad, $71,226; Lawrence Railroad, $6,868; Cleveland and Pittsburg Railroad, $807,878; Pittsburg, Cincinnati and St. Louis Railroad, $993,798. The following losses are similarly shown: Cleveland, Mount Vernon and Delaware Railroad, $100,526; Masillon and Cleveland Railroad, $27,003; Vandalia line, $54,483; Indianapolis and St. Louis Railroad, $77,699, and St. Louis, Alton and Terre Haute Railroad, $18,887. There is a net profit on all the lines aggregated of $3,071,897. The year's balance sheet of the Pennsylvania Company shows that its revenue for 1880 was $3,401,439, its expenses, interest account and losses in operating leased roads $1,024,952, and the net income $2,376,487. After paying the dividend, a balance of $1,896,487 on the year's operations was carried to credit of profit and loss. The general account of this corporation shows assets of $28,954,140, of which the chief items are $15,921,611 securities held, $2,606,304 value of Union Line property, and $1,286,438 cash. To offset this it has $12,000,000 capital, $8,200,000 six per cent bonds, and various smaller items, aggregating the total above mentioned sum of $28,954,140, included in which is the balance to credit of profit and loss, $3,052,328, all made in the last two years.

Commerce of New York.

Southern Pacific Railroad.

Mr. Charles Crocker, President of the Southern Pacific Railroad Company, having been interviewed by a reporter of the San Francisco Bulletin, is represented to have said that the company were laying a mile of track every day beyond El Paso. They are grading from the other end of the road, and have the road graded for 125 miles and 60 miles of track laid westward from San Antonio. When this work is finished it will give the Southern Pacific a line through to within a few miles of Galveston, Tex, and 100 miles of New Orleans, where connection will probably be made with the Morgan road. Mr. Crocker thought that the plan of the consolidation of the Atchison and Topeka and the Texas and Pacific companies, recently telegraphed, was possible, but not probable. If the plan were really to be carried out the Southern Pacific and the Central Pacific are prepared for such a contingency, and expect to have, in that event, an Eastern connection a long time before the completion of such road into California. In answer to a question if he referred to the Palmer Narrow Gauge or to the Denver and Rio Grande Railroad, Mr. Crocker said:

"That would be a pretty good outlet and probably sufficient, but in case of such a continuation as that referred to we will have an outlet of our own. We now have an engineering party in the field surveying the line from Corinne through the South Pass by way of the Hams Fork coal fields, thence down the Sweetwater to the North Fork of the Platte, thence following down the Platte for about one hundred miles and crossing over to the head waters of the Niobrabra River, and thence to Yankton, Dak. We are assured that this is a fine country, and capable of immense agricultural development. The grades of such route would be much higher than those on the Union Pacific and fully as easy of construction. We expect to build a line through that country for about one-third of what the Union Pacific cost. At Yankton, of course, we would connect with the whole Eastern system of roads, all of which will be willing to unite with us and do business on the best terms. We would rather not build such a line, preferring to be in harmony with the Union Pacific people and do business as was intended by the act of Congress forming the two companies; but, at the same time, we propose to be on the defensive, in case of any antagonism, to protect our interests and those of our constituents. Mr. Huntington informs me that there is no difficulty in raising the capital to carry out this enterprise, and we intend to carry it out, providing the combination spoken of is perfected, and attempts to carry out its project as reported."

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of June, 1880 and 1881, were as follows:

	1880.	1881.
Gross earnings.....	$1,661,812 20	$1,794,982 39
Working expenses..	945,704 45	1,033,752 31
Net earnings...	$716,107 84	$731,230 08

—showing an increase in gross earnings of $133,170 10, with an increase in working expenses of $118,047 86, making the increase in net earnings $15,122 24.

From October 1, 1880, to June 30, 1881, the gross earnings, working expenses and net earnings were:

	1879-'80.	1880-'81.
Gross earnings....	$13,718,841 98	$15,421,430 50
Working expenses	8,643,282 45	9,893,516 98
Net earnings,	$5,075,559 53	$5,527,913 52

—showing an increase in gross earnings of $1,702,588 52, with an increase in working expenses of $1,250,234 53, making the increase in net earnings $452,353 99.

Railroad Earnings 971

New York, Saturday, August 20, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

MEXICO proposes to place a mercantile tax of five dollars per $1,000 upon her merchants and traders in addition to other taxes and duties. Her excessive liberality in granting subsidies and giving away land makes excessive taxation natural perhaps, but none the less to be regretted as a depressing influence upon her commercial interests. When the railroads are running and developing the country they will greatly increase the value of property and be most valuable agents in lifting the burden of taxation, though the burden may be a means of retarding the commercial growth of Mexico during this period intervening between railroad projection and railroad completion.

THE necessity of providing methods for the care of live stock in transit more consistent with humane and sanitary demands, has been urged both in this country and abroad until the subject has become one of international importance, of which the letters from Minister Thornton and Secretary Blaine published by the JOURNAL within the past few months are indications. The company just formed in this city for the humane and economical care of live stock in transit has an excellent basis, in the practical utility of its plan and in the experience and strength of those interested in it, and gives promise of successfully and profitably supplying the long needed want in this direction.

THE managers of the Atlanta International Cotton Exposition have made a wise arrangement concerning the care and supervision of exhibits, which will tend to largely increase the variety and number of the attractions of the great Fair. A department has been provided for the care and supervision of such goods as are sent unaccompanied by any one to take charge of them. The superintendency of these goods will be in the hands of experienced men, and the effect of such an announcement will be to induce many manufacturers and others to send exhibits who otherwise would not be represented, in cases where exhibitors were not inclined to be at the expense of sending a man to take charge of them. The arrangements for all the features of the display seem to be made with a liberality and wisdom that promise most gratifying results.

THE meeting of the American Bankers' Association at Niagara Falls last week will doubtless prove to have resulted in much good to our financial interests. Several valuable papers were read which aimed more at giving facts than at advancing theories, and were proportionately practical and well received, though some of the papers could not be said to have more than a local interest. Considerable was done toward obtaining more uniformity in the methods of banking throughout the country, and among the important measures adopted were those looking to the providing of means for giving all banks prompt information concerning the workings of frauds, defaulters, etc., and toward obtaining from the Secretary of the Treasury relief from the labor and inconvenience of the daily shipping of gold, through the adoption of a plan by which for deposits in any of the Sub-Treasuries of gold coin or bullion in sums of not less than $100, certificates would be issued, thus avoiding the expense and trouble in many cases of shipment.

THE fourth National Convention of Railroad Commissioners, in accordance with a circular issued by Gen. Harding, one of the railroad commissioners of Missouri and chairman of the national executive committee, will be held at Atlanta, Ga., Oct. 11th. The meeting will be one of more than usual importance on account of the general agitation of the railroad question during the past year, and also on account of the recent adoption of railroad commissions by several States and action on the matter pending in several others. Doubtless the present unsettled and unsatisfactory condition of freight and passenger rates will form the text for much expression of opinion and prove a subject which will receive no little consideration and study by the commissioners in their preparations for the convention. The tendency among the most radical element will be to take an undue advantage of the situation, and, unless the province and duties are wisely studied, to overstep the same in ways detrimental, perhaps, to the worthy position which some of the most experienced commissioners have given to their office by careful and unprejudiced study and work. The selection of Atlanta as the place for holding the convention this year seems particularly fitting and in keeping with the increasing interest in railroad and manufacturing enterprises being rapidly developed in that locality.

Personal.

Geo. H. Watrous, president of the New York, New Haven and Hartford Railroad Company is spending, the summer with his family at Bethlehem, N. H.

George W. Riggs, the Washington banker, who has been dangerously ill, was reported on Wednesday to be decidedly better.

P. S. Fustis has been appointed general passenger and ticket agent of the Burlington and Missouri River Railroad in Nebraska.

John Walter, proprietor of the London Times, and his wife and children, who are expected in this country within a few days, are to be the guests of Geo. W. Childs at Long Branch.

George Benedict, formerly a conductor of the Naugatuck Railroad, has been appointed general ticket agent of that road, succeeding W. M. Tomlin, recently deceased.

Gen. Grant has bought a large residence on Sixty-sixth street, between Fifth and Madison avenues overlooking Central Park, and in the vicinity of the new armory of the 7th Regiment. The price paid is said to have been $93,000.

E. E. Aldrich, superintendent of the Troy and Boston Railroad, with which road he had been connected for many years in different capacities, died in Troy, N. Y., on the 11th inst., of typhoid fever, aged 30 years.

The associates of S. W. Cummings in the passenger department of the Fitchburg Railroad, upon his recent retirement from the position of General Passenger and Ticket Agent, made him a present of Johnson's Encyclopædia.

Senator Brown, president of the Western and Atlantic Railroad, predicts that it would ruin the Georgia railroads if the commission were given control of the joint rates in the State and through freights from the outside, as is being urged in some directions.

John I. Blair, of Blairstown, N. J. prominent in railroad matters is said to have property valued at between $15,000,000 and $20,000,000 chiefly in the western railroads. He is about eighty years of age but as active as the average man at sixty.

Col. Joseph L. Stephens, an active railroad man and prominently associated with Jay Gould in the Missouri Pacific Railroad, died suddenly a few days since at Booneville, Mo. He had several times been one of the leading candidates for Governor of Missouri.

Edward R. Hamilton has been appointed chief engineer of the Clark Fork division of the Northern Pacific Railroad. He was formerly in the engineering department of the Troy and Greenfield road and of

late has been assistant to the chief engineer of the Chicago and Grand Trunk Railway.

F. W. Cumberland, late general manager of the Northern and Northwestern Railways, of Canada, recently deceased at Toronto, had been connected with the Northern Railway since 1859. It was said that his services were so highly appreciated as to make him the recipient of a commission on the net earnings of the company in addition to his salary.

Peter Cooper is stopping with friends this summer at Bridgehampton. L. I. The liberality of this venerable philanthropist, now over 90 years of age, does not decrease with his increasing years. He had expended up to Jan. 1, 1881, about $1,500,000 on Cooper Union and the educational facilities furnished at that grand exhibition, and it is said that he proposes to expend upon improvements during the summer between $50,000 and $60,000.

C. A. Goodnow, recently appointed superintendent of the New Haven and Northampton Railroad, now connecting with the Hoosac tunnel line, has for the past six years held a responsible position on the Troy and Greenfield Railroad, of late having had the control of the movement of all trains over the State road at North Adams, Mass. He organized the present system which regulates the movement of trains at the tunnel and was one of the first to recommend and use the system of block signals. The first train through the Hoosac Tunnel was brought through under his direction.

The following gentlemen were elected officers of the American Bankers' Association last week, the old officers being re-elected with the exception of these additions and changes: President, George S. Coe, of New York; first vice-president, L. J. Gage, of Chicago; vice-president for Ohio, Hon. Ben Eggleston, of Cincinnati; for Virginia, George P. Branch, of Richmond. Members of the Executive Council: Mr Henry, of Buffalo; W. P. Halliday, of Cairo, Ill.; J H. Lindenberger, of Louisville; J. D. Vermilyea, of New York; H. D. Lynch, of Indianapolis, and E. D. Randolph, of New York.

Ex-Gov. A. C. Hunt, of Colorado, extensively interested in railroad construction in Mexico and Texas, says: "In old Mexico we have a little army at work, numbering 19,000 men They are working from Mexico each way, and from Laredo also each way. I think our people are illy posted regarding the resources of Mexico. The mercantile world, especially of the States, seem to have very little conception of the resources of Mexico and what she has, so to speak, to swap away or exchange with us. They have almost every kind of tropical fruits precious woods, cochineal, coffee, etc., and in turn they will want our manufactures, machinery reapers, mowers, plows and various classes of agricultural and mining implements."

Organization.

A certificate of the reorganization of the State Line and Juniata Railroad, which had been sold under an order of the Court of Common Pleas of Philadelphia, has been filed at Harrisburg, the name of the new company to be the Susquehanna and Southwestern Railroad Company. Capital stock, $500,000. President, George W. McPherson, Philadelphia.

The Council Grove, Marion Centre and Hutchison Railroad Company filed its charter with the Secretary of State of Kansas on the 10th inst. Capital stock $300,000. The road is to run from Council Grove, Morris County, Kan., through Lincolnville and Marion Centre to Hutchinson, Reno County. The length of the road is estimated at 170 miles.

The Escanaba and St. Paul Railroad Company has been incorporated to build a line from Escanaba, Mich., across Wisconsin to St. Paul. The capital stock is $3,000,000. The incorporators are Walter Brown, Willis Hand, W. S. Button and William Houghton, all of Phillips, Price County, and C. E. Russell, of Neillsville, Wis.

Articles of incorporation of the Rochester and Southern Railroad Company were filed in the office of the Secretary of State of New York on the 11th inst. The road is to run from Rochester to Livonia, Livingston County, about thirty miles. The capital stock is $300,000. The officers and owners are principally residents of Rochester.

At a meeting of the stockholders of the Norfolk and Sewall's Point Railroad Company, held at Norfolk, Va., on the 10th inst., the following named officers were elected: M. Parks, president; directors, J. W. Boteler, Washington, D. C.; W. L. Scott, Erie, Pa.; H. N. Page, John L. Roper, Norfolk, Va.; M. Courtright, Erie, Pa.

The directors of the St. Johnsbury and Lake Champlain Railroad Company, recently elected, are: Horace Fairbanks and Franklin Fairbanks, of St Johnsbury; George W. Hende., of Morrisville; W. H. Rhawn, of Philadelphia; Thomas Coggshall, of Newport, R. I.; Bradley Barlow, of St. Albans; A. B. Jewett, of Swanton; H. D. Hyde, of Boston, and A. B. Harris, of New York.

The directors of the Southern Pacific Railroad Company, elected on the 10th inst., are: Charles Crocker, Charles F. Crocker, H. M. Newhall, Charles Mayne, W. V. Huntington, N. T. Smith and J. L. Willcutt. The directors subsequently elected the following officers: President, Charles Crocker; vice president, Charles F. Crocker; treasurer, N. T. Smith; secretary, S. L Willcutt.

Articles of incorporation of the Springfield and St. Louis Railroad Company were filed with the Secretary of State of Illinois on the 9th inst. Capital stock, $1,000,000. It is proposed to construct a line of railroad from Springfield to East St. Louis. The incorporators and first board of directors are E. B. McClure and D. T. McIntyre, of Mattoon, H. H. Beach and E. Southward, of Litchfield, and C. C. Brown and Geo. N. Black, of Springfield.

A charter has been issued from the State Department at Harrisburg, Penn., for the Germantown, Norristown and Phoenixville Railroad Company, the line of which will run from Thirteenth street and Ridge avenue, Philadelphia, to Pœnixville. The capital stock is $1,500,000, and among the directors are A. J. Cassatt, George B. Roberts, John Price Wetherill, John C. Sims and other Pennsylvania Railroad officials.

A charter has been issued to the Allegheny and Susquehanna Railroad Company, the line of which commences at a point on the Allegheny River, opposite the mouth of the Red Bank, in Armstrong county, Penn., and runs to Brookville, Jefferson county, a distance of fifty miles. The capital stock is $500,000. Among the stockholders are T. H. Fahnestock, of Pittsburg; Walston H. Brown, of New York, and W. C. Mobley, of Pittsburg.

The Iowa Eastern Railroad, a narrow gauge road extending from Beulah on the Chicago, Milwaukee and St. Paul Railway to within two miles of Elkader, has been merged into a new organization by the name of the McGregor and Des Moines Railroad Company, with the main office at McGregor. It is said that the new company propose at once to extend the Iowa Eastern track to Elkader and next year to push the extension to Des Moines. The following are the officers: William Larrabee, president; Frank Larrabee, vice president and treasurer; H. Meyer, secretary. Directors—Wm. Larrabee, Frank Larrabee, E. H. Williams, D. R. N. Williams and H. Meyer.

The Dawson, Broadford and Mount Pleasant Railroad Company has been incorporated in the State Department at Harrisburg, Penn. The road will run from Dawson, Fayette County, parallel with the Pittsburg and Connellsville and the Mount Pleasant and Broadford, to Porter's Gap; thence up the valley, running beside the line of the Southwest Railroad to Mount Pleasant. Distance, 12½ miles. The principal office of the company is in Pittsburg. The capital stock is $200,000, divided into 4,000 shares of $50.

The Green Bay, Stevens Point and Northern Railway is the title of a newly organized company that propose to construct a road from Plover to Stevens Point a distance of 5½ miles, with a capital of $75,000. The incorporators are John I. Blair, New Jersey; Samuel Sloan, P. R. Pine, of Blairstown; William E. Dodge, Benjamin J. Clarke, New York; W. C. Larned, Chicago; Timothy Case, W. G. Abrams, Green Bay. The company was organized in the interests of the Green Bay, Winona and St. Paul Railroad Co.

A company has been organized at Decatur, Ala., under a charter from the State of Alabama, with a capital stock of $2,000,000, with the title of Birmingham Coal, Coke and Iron Company. J. C. Neely, of Memphis, was elected president. The company recently purchased 50,000 acres of coal and iron land in the vicinity of Birmingham, Ala., and contemplate the erection of several large furnaces. They will also mine coal on a very large scale and propose to establish the largest coke works in the South.

Articles of consolidation of the Louisville, New Albany and Chicago Railway Company and the Chicago and Indianapolis Air Line Railway Company were filed in the office of the Secretary of State of Illinois on the 9th inst. The latter company has a railroad in process of construction from Indianapolis to a connection with a railroad at or near Glenwood, Cook County, and the consolidation forms a line of railroad connected from New Albany and Indianapolis to Chicago. The capital stock of the new corporation is to be $5,000,000. The board of directors is to be the present board of the first named company.

Articles of incorporation of the Lake Superior and Dakota Railway Company have been filed with the Secretary of State of Minnesota. The purpose is to construct in as nearly a direct line as possible a railroad from Duluth to a point on the Red River of the North north of the seventh standard parallel, with a branch line to the boundary between Wisconsin and Minnesota. The capital stock is fixed at $5,000,000, and the names of the incorporators are I. Harbaugh, C. K. Davis, J. A. Stewart and C. W. McIntyre, St. Paul; R. Fairweather, William Anglim and Frank Ives, Cookston, and M. Graves and Charles Lockwood, Pittsburg, Pa.

At a meeting of the grantees of the New Zeland Railroad, held in Plymouth, N. H, on the 13th inst., the following directors were chosen: J. Thomas Vose of Boston, Joseph A. Dodge of Plymouth, J. P. Pitman of Laconia, Samuel N. Bell of Manchester and Henry L. Tilton of Littleton. The line will commence on the White Mountain Railroad at a point about a mile below the Fabyans. Near the starting point it will cross the Ammonoosuc and will then follow the New Zeland River to its headwaters, a distance of about 12 miles. The line will be located in the towns of Carroll and Bethlehem. The directors estimate that it will cost from $150,000 to $200,000 to build the line and equip it for freight use, and the capital required can be had as fast as needed.

The Chesapeake, Ohio and Southwestern Railroad Company, which is to have a through line from New-

port News to Memphis, was organized on the 10th inst. at Paducah, Ky., with the following board of directors: C. P. Huntington, New York, president; John Echols, of Virginia, vice president; Ex Norton, Thomas C. Platt, John E. Devlin, Isaac E. Gates, New York; Henry D. McHenry, Kentucky; E. D. Standiford, Louisville; H. Cummins, Tennessee. Under the laws of Tennessee the consolidation of the road from Paducah to Elizabothtown cannot be consummated until sixty days' notice has been given. The board of directors will therefore meet at Rieves, Tenn., October 17, when all the legal requirements will be fulfilled and the two roads will become one.

The incorporators of the Yuma, Port Isabel and Guaymas Railroad Company, recently organized, are: Charles Crocker, George Crocker, Timothy Hopkins, W. P. Huntington, and Leland Stanford, who are also named as directors. The purposes of the company are stated to be the construction and maintenance of a first class broad gauge railroad, to run from a point on the northern boundary line of Mexico, south of Yuma, in Arizona, by way of Port Isabel, on the Gulf of California, to the city of Guaymas, in Mexico, with intermediate branches to such coal mines as may be hereafter decided upon by the directors, to further which end they propose receiving concessions from the Mexican Government. The estimated length of the road is 400 miles. The capital stock is $10,000,000, divided into 100,000 shares of $100 each.

The Humane Live Stock Express Company.

The plan devised by A. D. Tingley for feeding and watering cattle in transit without removing them from the car has att acted a great deal of attention during the past few months among railroad men and shippers, and arrangemen's have just been completed which are to place the device in operation upon some of the leading railroads at once, while ultimately its adoption must be very general on all important cattle carrying lines. Mr. Tingley's plan, as previously described by the JOURNAL at length, consists in brief of feeding and watering stations erected along both sides of the track sufficient in length to accommodate a long train of cars. The stations consist of simple mechanical arrangements by which the food and water is placed under the animal's head, the same feeder being used both for food and drink. The ordinary cattle car is used, the only alteration necessitated being the removal of one board on each side of the car, or so fixing it that a board could be swung on a hinge or opened or shut as desired. The stations are to be erected at a distance of about a ten or twelve hours' run, in this way affording a very simple and economical method for feeding and watering the cattle twice in every twenty-four hours. The plan is evidently destined to be a very popular one on account of its simplicity and the vast amount of saving in shrinkage that will be acquired by it at a very slight expense to the shippers, while by the economy of time and labor and the prevention of waste in feed, the railroad companies and the company which controls the new and humane method of caring for cattle in transit will receive a good profit from the working of the plan.

The Humane Live Stock Express Company was organized in this city this week, a number of prominent capitalists, railroad men, cattle dealers and others being interested in it. The trustees are Stephen B. Elkins, a well known railroad man, Elisha W. Andrews, president of the American District Telegraph Co., Wm. B Sipes, Augustus Ebert, Stephen W. Sears, A. D. Tingley and L. H. Roberts all of this city; T. E. Sickles, of Philadelphia, builder of the Union Pacific and Omaha bridge; Geodrich H. Bush, of Westfield, Mass.; Richard C. Kerens, a barge and steamboat owner, and Robert D. Hunter, the largest cattle shipper west of the Mississippi, of St. Louis; Thos. H. Sherman of Washington, and Herrick P. Frost, of New Haven, president of the Conn. Telphone Co. The officers are Wm. B Sipes, president, Elisha W. Andrews, vice president, Stephen B. Elkins, treasurer, Thos. H. Sherman, secretary, A. D. Tingley, general manager, and the following executive committee Wm. B. Sipes, Elisha W. Andrews, Herrick P. Frost, Stephen B. Elkins, and Stephen W. Sears. Arrangements have been made for establishing a line of stations between St. Louis and New York at once, work to be begun right away upon two stations on the Wabash line, one on the Erie line and one on the St. Louis, Iron Mountain and Southern.

Railroad Earnings.

St. Paul, Minneapolis and Manitoba, week ending Aug. 7, $101,092 ... responding week last year, $61,815 02; ... Aug. 1 $2,436,861 53, corresponding ... r $1,771,905 82.

Flint and ... Ma quette, week ending Aug. 7, $31,894 70, corresponding week last year $25,395 00; from Jan. 1 to Aug. 7 $1,074,200 75, corresponding period last year $881,999 95.

Great Western of Canada, week ending Aug. 5 $95,488, corresponding week last year $98,434; aggregate increase from Jan. 1 to July 30 over corresponding period last year $198,764.

Denver and Rio Grande, second week of August, $128,630; corresponding week last year $95,488. Miles operated this year 933, last year 510.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 6, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad...	166,259	4,994,451	4,344,197
Schuylkill Canal....	22,056	802,453	239,516
Lehigh Valley.....	118,319	3,681,228	2,820,634
Del., Lack. & Western	91,880	2 401,214	1,894,407
Shamokin Valley....	17,623	615,010	465,165
Central New Jersey.	71,730	2,447,756	1,945,641
United R. R. of New Jersey..	29,792	897,236	666,180
Pennsylvania Coal ..	31,532	741,799	574,760
Delaware and Hudson	60,569	1,015,406	1,675,566
Huntingdon & Broad Top Mt.....	11,813	300,124	272,362
Penn. and New York.	37,271	964,957	726,375
Clearfield, Pa.....	52,358	1,428,880	891,636

The total tonnage of anthracite coal from all the regions for the week ending August 6, as reported by the several carrying companies, amounted to 551,186 tons, against 400,852 tons in the corresponding week last year, an increase of 144,334 tons. The total amount of anthracite mined for the year is 15,640,779 tons, against 12,423,483 tons for the same period last year, an increase of 3,217,296 tons. The quantity of bituminous coal sent to market for the week amounted to 63,636 tons, against 47,195 tons in corresponding week last year, an increase of 16,441 tons. The total amount of bituminous mined for the year is 2,856,111 tons, against 2,419,782 tons for the corresponding period last year an increase of 436,329 tons. The total tonnage of all kinds of coal for the week is 614,822 tons, against 454,057 tons in corresponding week last year, an increase of 160,775 tons, and the total tonnage for the coal year is 18,496,890 tons, against 14,843,265 tons to same date last year, an increase of 3,653,625 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending August 6 was 188,328 tons, of which 135,074 tons were coal and 53,254 tons coke. The total tonnage for the year thus far has been 5,804,897 tons, of which 3,835,120 tons were coal and 1,469,278 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 6 were 50 517 tons, and for the year to that date 1,189,129 tons, a decrease of 35,068 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 24,964 tons; year, 783,679 tons; decrease as compared with 1880, 166 tons; Chesapeake and Ohio Canal—week, 16,874 tons; year, 253,315 tons; decrease as compared with last year, 49,758 tons. Pennsylvania Railroad—week, 8,631 tons; year, 151,715 tons; increase compared with 1880, 14,447 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 40,869 tons; year, 1,091,131 tons. Baltimore and Ohio Railroad—week, 1,340 tons; year, 88,249 tons. George's Creek and Cumberland Railroad—week, 8,750 tons; year, 56,865 tons. The Reading Railroad tonnage for last week ending August 13, was 186,300 tons, of which 49,000 tons were sent to and 53,500 tons shipped from Port Richmond, and 15,000 tons sent to and 15,000 tons shipped from Elizabethport.—[Phila. Ledger, Aug. 15.

Anthracite Industry in Pennsylvania.

The Census Bureau at Washington has issued a preliminary statement containing statistics of the anthracite industry in Pennsylvania during the census year beginning June 1, 1879, and ending June 1, 1880, which shows that the number of working collieries has increased during the past ten years from 225 to 273, or 21⅓ per cent. The average horse power used has, however, increased from 216 to 375, or 73.6 per cent. The average number of hands has increased from 235 to 250, or only 6.4 per cent, while the average product per colliery has increased from 69,320 tons to 100,488 tons, a gain of 45 per cent. A comparison of the census returns of 1880 and 1870 shows that the output has increased from 15 596,257 tons to 27,433,329 tons, or 11,837,072 tons, a gain of 75.9 per cent, while the gross value has increased only 5.25 per cent. But the value of the product of 1870 was reckoned in paper dollars. The apparent fall of the average price per ton is from $2 49 to $1 47 or $1 02 about 41 per cent, considerably more than the change of standard would account for. The total capital, real and personal, invested is reported as aggregating $150,161,196. In 1870 the total amount invested was only $50,807,285, which shows an increase in favor of 1880 of 195 per cent.

Workmen are now engaged in changing the location of the Fitchburg Railroad between Baldwinville and Royalston by running to the south of the present location. They will save half a mile, and do away with four covered bridges over Miller's River. Between Baldwinville and Gardner the road bed for the second track is nearly ready for the rails. At the Templeton station the foundations for a new station are being laid.

The Chief of the Bureau of Statistics reports the total values of the exports of petroleum and petroleum products from the United States for the month of June, 1881, to have been 5,553,268, against $2,225,813 for the month of June, 1880; and for the twelve months ending June 30, 1881, $40,315,596, against $36,216,625 for the corresponding period of 1880.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $51,467,372 02; interest repaid by transportation of mails, &c., $14,426,644 65; interest repaid by cash payments: 5 per cent net earnings, $555,198 87; balance of interest paid by United States, $36,385,428 50.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 30, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Aug. 16, 1881.

The market continues very firm with an active demand. Sales made this week are generally at an advance of from 50c. to $1 00 per ton over those booked last week. We quote as follows—

FOUNDRY.

	No.		Mos.
Hanging Rock Charcoal	1	26 00@27 00	4
Strong Neutral Coke	1	22 50@23 50	4
American Scotch	1	20 00@21 50	4

GREY FORGE.

Neutral Coke		20 00@21 50	4
Cold Short		19 00@20 00	4

CAR WHEEL AND MALLEABLE.

Hanging Rock Cold Blast		36 00@38 00	4
" Warm "		30 00@32 00	4
Lake Superior 1 and 2		32 00@33 00	4
Lake Superior 3 to 6		34 00@36 00	4
Southern Car Wheel		34 00@35 00	4

The ownership of the Sault Ste. Marie Canal has been transferred from the State of Michigan to the United States Government. The tax imposed upon vessels using it was last month removed.

Philadelphia Stock Exchange.

Closing Prices for the week ending Aug. 16.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Aug. 18, 1881.

The rates for call loans to the stock brokers this morning were 4 to 6 per cent, to United States bond dealers 3½@4 per cent. Time loans were 3½ to 6 per cent with few below 4 per cent on any collateral. Prime mercantile paper, 5@6 per cent. In the afternoon the quotation for call loans at the Stock Exchange was 6 per cent.

The posted rates for prime bankers' sterling were 4.82½@4.84½; the actual rates, 4.81@4.81¾ and 4.83@3¾, cables 4.83½@4.84, and prime commercial bills 4.79½@3¾. The actual rates for Continental exchange are as follows: francs 5.25@5.25⅛ and 5.21⅞@5.22½; marks, 93⅞@94½ and guilders 39 8 16@39 15 16.

The First Comptroller of the United States Treasury at Washington has rendered a decision affecting mutilated United States bonds which may be presented for redemption or for the purpose of receiving a reissue thereof. He holds that in the absence of clear proof of the destruction of a missing portion of a bond the United States government can only pay for that part of the bond produced a sum which would bear the same proportion to the whole amount of the bond as the part presented would bear to the size of the bond of which the fragments might be a part.

The stockholders of the Boston, Barre and Gardner Railroad Company have voted to issue bonds to the amount of $100,000 payable within fourteen years from date, for the purpose of providing for the payment of its floating indebtedness; said bonds to be in addition to the bonds

heretofore issued or authorized to be issued, to wit: bonds to the amount of $400,000 secured by a mortgage dated June 21, 1873, and bonds to the amount of $300,000 secured by a mortgage dated July 16, 1875, which bonds and mortgages were also confirmed and ratified.

The closing quotations on Thursday were: Adams Express, 133@135; American Express, 84⅜@84⅝; American District Telegraph, 47⅜@47⅝; Chicago, Burlington and Quincy, 154⅜@154⅝; Canada Southern, 63@63¼; Chicago and Northwestern, 122⅜@122⅝; do. pref., 136⅜@136⅝; Central of New Jersey, 90⅞@91⅛; Chicago and Rock Island, 133⅝@133⅞; Central Pacific, 89⅞@90; Chicago, Milwaukee and St. Paul, 111¼@111½; Cleveland, Columbus, Cincinnati and Indianapolis, 87⅝@87¾; Columbus, Chicago and Indiana Central, 21⅜@21⅝; Delaware and Hudson Canal, 107¼@107½; Delaware, Lackawanna and Western, 121@121¼; Hannibal and St. Joseph, 93⅜@93⅝; do. pref., 112⅝@112⅞; Illinois Central, 129⅜@129½; Lake Erie and Western, 52⅞@53⅛; Lake Shore and Michigan Southern, 121⅞@122⅛; Metropolitan Elevated, 80¾@81; Manhattan Elevated, 18⅜@18⅝; Michigan Central, 93@93¼; New York Elevated, 106⅛@107; New York, Lake Erie and Western, 42¼@42½; do. pref., 81⅞@82⅛; New York Central and Hudson River, 142⅛@142⅜; Ohio and Mississippi 36@36⅜; Ohio Central, 25⅛@25⅜; Pacific Mail, 47⅞@48⅛; Panama, —@260; Texas and Pacific, 50⅝@50⅞; Union Pacific, 122¼@122½; United States Express, 67@69; Wells Fargo Express, 125@133; Western Union Telegraph, 85½@85½; Wabash, St. Louis and Pacific, 47⅛@47⅜; do. pref., 83½@83¾.

Philadelphia and Reading Companies.

President Bond's plan for the reorganization of the Philadelphia and Reading Railroad Company, a brief allusion to which was given in our last issue, has been submitted to the directors of the company and approved by them. It must now be passed upon by the shareholders. The main features of the plan, as heretofore given, are, first, a new issue of stock to the amount of $18,000,000, and second, the placing upon all the property of the railroad company and coal and iron company a consolidated mortgage under which two classes of bonds are to be issued, the one class to bear 4½ per cent interest and the other 3 per cent. Both classes are to run 75 years. The 4½ per cent bonds are to be used in retiring existing mortgages, mortgage scrip, floating indebtedness and other obligations; the 3 per cents are to be exchanged for certain outstanding bonds and other certificates specifically described in Mr. Bond's schedule, and the new stock is to be used at par in paying off the general indebtedness. Mr. Bond places the total capital stock at $34,278,175 28, and the principal of the debt at $166,861,170 81. He proposes to reduce the interest, rentals and sinking fund requirements so as to bring the whole expenditure within the present revenue-producing capacity of the company to be about $8,418,008, or $100,000 more than will be needed.

Railroad Law.

COURT OF APPEALS KENTUCKY.

OPINION FILED MARCH 5, 1881.

SHAWHAN etc., vs. LYNN, etc.

1. Corporations—Rights of Stockholders—A stockholder has no right to sue to enforce a corporate cause of action, unless the officers of the corporation refuse to sue to assert the cause of action led by him, and in order to show or manifest his right to sue in such a case, the stockholder must allege that the officers of the corporation refuse to sue to assert that cause of action, and he must also make the corporation a party to his suit.

In this case the stockholder's petition was properly dismissed absolutely by the lower court, because he did not allege that the officers of the corporation had refused to sue, and also because he did not make the corporation a party defendant to his suit.

PRYOR, J.—An action was pending in the Kenton Chancery Court between the Covington and Lexington Railroad Company, as plaintiffs, and Bowler's heirs and others, defendant's, involving the right of Bowler's heirs to hold the road as purchasers at a decretal sale subjecting the road to the payment of a large sum of money, secured by mortgage, and sold at the instance of the mortgagees, under a petition in equity filed in the Fayette Circuit Court. The right of the parties was finally determined on an appeal to this court, in an opinion holding that the purchase inured to the benefit of the Covington and Lexington Railroad Company, and a mandate issued directing certain proceedings to be had in the court below. After this opinion was delivered, on a petition for a rehearing filed, in which it appeared that the heirs of Bowler were not all before the court, the mandate or opinion was modified, and the heirs of Bowler were permitted to make defense, and if no proper defense was interposed, the judgment directed to be entered as required by the original opinion.

The parties who purchased under the sale of the Fayette court had organized a new corporation known as the Kentucky Central Railroad Company.

After the return of the cause from this court the president, directors, etc., of the Covington and Lexington Railroad Company (the old corporation) entered into a compromise with the new corporation, or the purchasers of the road, by which the action for its recovery by the old corporation was dismissed, and the stock transferred by the agreement to the new corporation, thereby leaving the purchasers at the decretal sale the owners of the road.

Whether the president and directors, or a majority of them, were authorized to make the agreement at a meeting of the stockholders does not appear, and whether such power could have been conferred is not material to inquire. It is evident, however, that where the franchise has already been sold, the power of the president and directors to compromise with the purchasers in a controversy involving the validity of the sale, would not be controlled by the well established rule that the directors of a corporation have no power to destroy its corporate existence.

The appellant in the present case alleges that he is a stockholder, and that the board, or a majority of them, combining with the defendants in the original action, for the purpose of defrauding the stockholders, entered into the compromise by which the action for the recovery of the road was dismissed and all the rights and franchises transferred to the new corporation, thereby destroying not only the existence of the old corporation, but rendering the stock of the appellant valueless. He asks that the action dismissed by the directors be reinstated on the docket, and that he be permitted to prosecute the action, and that the compromise agreement be disregarded.

It is plain that the president and directors of the old company, having the right to institute the action, had the power to dismiss it, and certainly one out of many stockholders may not, and in the name of, or for the corporation, will not be permitted to prosecute the action in his own name, against the will and consent of the directors. A stockholder may sue for the corporation or his associate stockholders, when the rights of the corporation are involved and the directors decline to sue, or refuse to permit the stockholders to prosecute the action in the name of the corporation. Such facts must be alleged, and the corporation must be a party, plaintiff or defendant, and this is indispensable because, as said in the case of Davenport v. Davis, 14 Wallace, "The relief is asked in behalf of the corporation and not the individual stockholder." There is no allegation that the directors decline to reinstate the case on the docket, or that any demand was ever made of them, or either of them, by the stockholder bringing this action, or any parties in interest, to continue its prosecution; nor is the corporation, the Covington and Lexington Railroad Company, a party to the action, and its prosecution, therefore, by the stockholder would be no bar to a subsequent action by the corporation.

This is not merely a defect of parties (the failure to bring the corporation before the court) to be taken advantage of by special demurrer, but the omission to make the corporation either a plaintiff or defendant, leaves the stockholder without a cause of action; in other words, the party entitled to the relief is not before the court. The stock of the stockholder in the old corporation, or his rights under it, cannot be affected if the directors have no power to make the compromise, but this is a different question from the relief sought here, viz: That the stockholder may institute and prosecute the action in his own name. We have the stockholder asserting this right, and the president and directors in court asking its dismissal, and the court very properly sustained the demurrer.

"It is admitted that such a suit would be defective, and that in every case where the question, whether of ultra vires or of fraud, is one which concerns the corporation itself, the corporation must be a party either as plaintiff or defendant. A decision in the absence of the corporation, would be a decision affecting the rights and liabilities of an individual not before, and not heard by, the court:" Green's Brice's Ultra Vires, page 571.

If this stockholder can institute an action in his own name and for his own benefit, every other stockholder may bring a like action, and therefore the necessity of bringing the party entitled to the relief before the court, and if no such party appears a demurrer should be sustained.

It was not necessary or proper for the court below to dismiss the action without prejudice, as it cannot affect the rights of any of the parties, nor was it proper for the court to require the appellant to bring the corporation before the court—this was the appellant's duty, as in the absence of the corporation no relief could have been granted.

Many other questions have been raised on the appeal as to the insufficiency of the petition. These questions have not been considered for the reasons already indicated.

The demurrer was properly sustained.

C. W. West, for appellant.

Wm. Lindsay, W. P. D. Bush, for appellee.

—[Chicago Legal News.

According to the report of the receiver of the Manhattan Elevated Railroad Company, the inventory of property owned and leased by that corporation includes 198 locomotives and 571 passenger cars in daily use; 44 engines are employed on the Second Avenue line, 71 on the Third, 62 on the Sixth, and 21 on the Ninth; on the Second Avenue line 110 cars are required, on the Third 208, on the Sixth 190, and on the Ninth 63; of the 3,274 men employed, 600 are charged to the Second Avenue line, 1,267 to the Third 1,005 to the Sixth, and 553 to the Ninth Avenue lines.

SECOND QUARTO SERIES, VOL. XXXVII., No. 35.] NEW YORK, AUGUST 27, 1881. [WHOLE No 2,366 VOL. LIV.

HOW THE NEW TUNNEL THROUGH THE ALPS IS BEING WORKED.

A striking illustration of the improvement made in the methods of mountain travelling within the past few years is shown in the following comparison given by a correspondent of the London Times, between the speed attained in boring the Mt. Cenis and the St. Gothard tunnels and that with which the Arlberg tunnel is being worked: The Mount Cenis tunnel was bored at the rate of 1,112 metres a year, the St. Gothard at the rate of 1,670 metres and the Ariberg is expected to be pierced at the rate of 2,160 metres. The Arlberg engineers are also profiting by the experience of their predecessors in the matter of cost, for while the outlay on the Mount Cenis tunnel was £400 per running metre and has been hitherto on the St. Gothard £250, the expense of making the Arlberg will not exceed £150 the metre. In this regard, however, the tunnel last named benefits by its shortness, since the longer the tunnel, other things being equal, the greater is its relative cost.

An interesting experiment is being made in the Arlberg tunnel with a new sort of perforator. As is well known, the perforators used in the Mount Cenis and St. Gothard tunnels consisted of a series of chisels (not diamond-pointed, as has sometimes been stated) driven with a quick, hammer-like action by compressed air, the machine for the production of which were actuated by turbines at the two ends of the galleries. This system is the one in use on the eastern or Austrian side of the Arlberg. The chisels cover a space of 7 square metres, and make 20 to 25 holes at one time, each from 1½ to 2 metres deep. These are then filled with dynamite and the mine exploded. Every blast lengthens the drift by about 1¼ metres. The perforators move forward on wheels, and the air, compressed to a pressure of five atmospheres, is supplied through flexible tubes. On the west side drills are employed of a diameter of 70 millimetres, to which by means of a water pressure of from 60 to 100 atmospheres a rotary movement is communicated. Six or eight of these drills are as effective as twenty or twenty-five of the atmospheric perforator, and the holes they make are so much wider that equal results are produced with lighter charges of dynamite.

But the greatest difficulty in Alpine tunnelling consists less in quarrying out a passage than in getting rid of rubbish. After every blast, the outcome of it, in the shape of loose material, must be removed before boring operations can be resumed; and when an atmosphere already close and impure is still further fouled by the smoke of an explosion the labor of removal becomes dangerous as well as difficult. Fatal accidents sometimes happen. The leading miners in the Arlberg tunnel, when engaged in this work, cover their mouths and nostrils with sponges which have been steeped in vinegar, an expedient which has been found singularly efficacious in neutralizing the bad effects of the poisonous air they are often compelled to breathe. The important part which the removal of rubbish plays in these undertakings is shown in the fact that of the five years required for the making of the Arlberg tunnel, two and a half will be occupied in actual boring and excavating, and two and a half in carrying away loose material. Since June, 1880, when the work first began, the gallery on the east side has been driven 1,010 metres, that on the west 710.

THE WEAKENING OF STEEL BY HEAT.

Examples of the mysterious failure of steel are not uncommon, and although much of the mystery which used to attend the qualities of steel is disappearing before modern research, it cannot be said that increased knowledge always leads to better confidence. One of the peculiarities of spring and tool steel which has lately been investigated by several observers—Mr. Adamson among the number—is the known liability of steel that is very flexible when cold to break at the blue annealing temperature. It has sometimes been supposed that only inferior metal is subject to this tendency; but the workers in Ural iron, which is remarkably pure in quality, have often observed the same action. Mr. Adamson has found that steel of this kind becomes actually "powdery" at a temperature of between 500° and 700° Fah., or the point at which willow twigs take fire; and he has decided that this is the point when the metal is at its weakest, possessing little or no coherencer. This phenomenon, if it can be substantiated as universal or even frequent, is suggested as a possible explanation of a large number of accidents, such as the breaking of steel [illegible], shafts, and parts of machine tools which may be strong enough when cold, but become raised to the stated temperature by the effects of friction, etc., they are not able to withstand the slight strain, and, in fact, drop into pieces by their own weight. The quickness with which broken parts of machinery or tools would, under ordinary circumstances, cool down, and therefore regain their strength, would naturally lead an ordinary observer away from the truth which Mr. Adamson claims to have discovered.—[Scientific American.

THE ST. GOTHARD RAILWAY.

The construction work of the St. Gothard Railway is rapidly nearing completion, and the Swiss guide-books are already beginning to publish its schedules of fares. Starting from Rothkreuz, eleven miles from Lucerne, the line runs along the western shore of Lake Zug, around the base of the Righi and past Lake Lowerz, striking the Lake of Lucerne at Brunnen. From Fluelen the line begins to ascend the valley of the Reuss, attaining an altitude of 1,558 feet above the level of the sea at Erstfeld. Up to that point the gradient nowhere exceeds 10 in 1,000, but from Erstfeld to Amsteg it reaches 26 in 1,000. From Amsteg the line runs through a number of short tunnels and over a number of bridges to Gurtnellen, eight miles from Finelen, where it attains an altitude of 2,427 feet. From Gurtnellen the line ascends the mountain-side in a series of bold spirals, crossing the Reuss several times, and passing through the Pfaffensprung tunnel, 1,487 metres in length. The running through the Wattingen tunnel, it reaches the station of Wasen, 3,008 feet above sea level. Leaving Wasen the line runs back

again in the direction of Fluelen; then, turning, passes through the Naxberg tunnel, 1,570 metres in length, and reaches the station of Goschenen. There the St. Gothard tunnel, nine and a half miles long, begins.

New York, West Shore and Buffalo Railway.

The New York, West Shore and Buffalo Railway Company has executed a first mortgage on its property and effects to the United States Trust Company of New York, as trustee, to secure the payment of bonds to be issued to the amount of fifty million of dollars. The instrument, which was filed of record at Albany, N. Y., on the 21st inst., recites that as the party of the first part has undertaken to construct and maintain a railway from Weehawken, N. J., through Hudson and Bergen Counties to a point at or near Tappantown, Rockland County, and thence along or near the west shore of the Hudson River via Haverstraw, West Point, Newburg, Kingston, Catskill, Athens and Coxsackie, to or near Schenectady, thence along the South Shore of the Mohawk to Utica, thence via Syracuse to Buffalo with branches to Middletown, Albany, and Rochester, the directors have duly authorised the issue of said bonds to the amount of $50,000,000, or £10,000,000, to pay for the same. The bonds are to be $1,000 each, payable in gold, and run to 1931. The usual provisions are contained in the document, with reference to the payment of the interest and principal of the bonds, and in case of default the property of the company may be sold after the usual six months' notice has been published in three papers in New York City, one in Albany, one in Buffalo, and two in London, England. In case of the resignation of the trustee the Board of Directors are authorized to appoint a successor, notice of the same being given by publication, at least once a week for three months, in papers located as above mentioned. The instrument is signed by Horace Porter, President, and Alex. Taylor, Secretary for the Railway Company, and Wm. H. Macy, Vice-President, and J. S. Clark, Secretary of the United States Trust Company.

West Virginia Central Railway.

The route of the West Virginia Central Railway, which is chartered by the State of West Virginia, begins at Ceredo, on the Ohio river and runs thence through Cabell and Putnam Counties to Charleston, on the Great Kanawha River, where it crosses the Chesapeake and Ohio Railroad. It then runs up the northern bank of the Great Kanawha to the Gauley river, and up that stream to its source, passing through Kanawha, Fayette, Nicholas, Webster and Pocahontas Counties, and then over the border into Virginia at Harrisonburg, and through the Virginia counties of Madison, Culpepper, Fauquier and Stafford to Belle Plain and Acquia Creek, on the Potomac river, The entire length of the road is about 150 miles and passes through the great coal measures of Virginia and West Virginia, and crosses six railways on the route. The capital is $6,000,000, with the privilege to increase to $10,000,000. The work of construction (the charter not having been acted under for several years) was begun about two months ago, and has been certified by the Secretary of State of West Virginia. The office of the company is in Philadelphia.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of July, 1881 and 1880:

	1881.	
Gross receipts:	Month.	Year to date.
Railroad traffic ...	$833,311 22	$4,935,634 07
Canal traffic.....	72,873 42	174,700 17
Steam colliers.....	19,892 13	138,923 36
Richmond coal barges	L592 71	L1,260 55
Total Railroad Co.	$925,404 06	$5,247,997 05
Reading Coal & Iron Co	165,676 80	531,595 44
Total of all...	$1,091,080 86	$5,779,592 49
Tonnage and passengers:		
Tons of coal on railroad..	747,728.05	4,828,199.04
Tons of merchandise...	584,857.15	4,124,626.19
Passengers carried..	999,085	6,582,088
Coal transp. by steam colliers..	51,705.00	354,065.00
Tons of coal mined:		
By Coal and Iron Co	392,875.10	2,244,997.06
By tenants....	127,219.10	908,995.07
Total mined from lands owned and controlled by Co. and from leasehold estates.	519,595.00	3,153,992.18

	1880.	
Gross receipts:	Month.	Year to date.
Railroad traffic....	$524,094 86	$4,507,465 86
Canal traffic.....	34,411 71	124,446 30
Steam colliers.....	9,806 93	124,798 11
Richmond coal barges..	L1,654 26	2,968 78
Total Railroad Co..	$566,659 24	$4,759,679 05
Reading Coal & Iron Co	33,951 85	L59,076 82
Total of all....	$600,614 09	$4,600,602 78
Tonnage and passengers:		
Tons of coal on railroad.	460,411.14	4,228,145.16
Tons of merchandise....	463,187.06	3 919,789.18
Passengers carried	908,049	6,225,409
Coal transp. by steam colliers	50,406 00	353,940.00
Tons of coal mined:		
By Coal and Iron Co	211,634.04	2,021,452.09
By tenants	79,214 16	694,252.10
Total mined from lands owned and controlled by Co. and from leasehold estates....	290,849.00	2,715,804.19

Total of both companies for month of July, 1881: Gross receipts, $3,129,316 88; gross expenses, $2,03,256 02—profit, $1,091,060 86.

The Spartanburg (S. C.) Spartan says that President Verdery is pushing the Greenwood and Augusta Road. The bridge across the Savannah river has been completed at a cost of $27,000. They are now putting up the trestle work on this side. The land is low and swampy for six miles and quite a number of trestles will have to be built. After they come to high land the work will be easy, and the president hopes to get to Greenwood in January. Should the road be completed to that point by the first of June, the company will do well. On the line from Danville to Mocksville they are grading rapidly with a large force, and preliminary surveys have been made all the way to Spartanburg.

Anthracite Coal Tonnage.

The following is an official statement of the anthracite coal tonnage for the month of July, compared with the same period last year:

	July. 1880.	July. 1881.	Increase.
Reading Railroad....	639,578	392,428	247,150
Lehigh Valley R. R.	492,033	329,715	162,317
Central R. R. N. J,..	378,635	228,798	149,837
Del., Lack. & Western	281,508	235,184	146,324
Del. & Hudson Canal	285,804	164,324	121,481
Pennsylvania R. R..	206,517	173,188	33,329
Pennsylvania Coal Co	140,289	75,852	64,437
N. Y. L. E. & Western	47,732	37,852	10,426
Total..... 2,572,099		1,636,795	935,804

The following is the statement for the first seven months of the current year, compared with the same period last year:

	1881.	1880.	Increase.
Reading Railroad.	3,564,665	3,024,659	540,006
Lehigh Valley R.R.	2,990,436	2,250,616	739,819
Central R. R. N. J.	2,210,045	1,743,023	467,021
Del., Lack. & West.	2,330,356	1,838,480	491,875
Del. & Hud. Canal.	1,702,042	1,425,259	276,783
Pennsylvania R. R.	1,240,441	895,085	345,355
Penns. Coal Co..	731,867	549,543	182,324
N. Y., L. E. & W.	269,739	222,246	47,493
Total 15,039,596		11,948,916	3,090,680

The stock of coal on hand at tide water shipping points, July 31, 1881, was 674,716 tons; on June 30, 1881, 598,505 tons—increase, 76,161 tons.

Columbus, Hocking Valley and Toledo Railroad.

A certificate of incorporation consolidating the Columbus and Hocking Valley, the Columbus and Toledo and the Ohio and West Virginia Railroad Companies was filed with the Secretary of State of Ohio on the 20th inst. The Consolidated Company will be known as the Columbus, Hocking Valley and Toledo Railroad Company. William M. Greene was chosen Secretary of the Consolidated Company until a new secretary is chosen. The meeting to elect new directors has been called for September 12.

The lines are all of the same gauge. The authorized capital of the new company will be $20,000,000, of which $10,217,000 will be issued in exchange for stock in the companies forming the consolidation, the proportion being for each share of the Ohio and West Virginia Railway, one and one-half shares in the Consolidated Company; for each share of the Columbus and Hocking Valley Railroad stock, one share share in the Consolidated Company, and for each share of the Columbus and Toledo Railroad stock, one share in the Consolidated Company.

The total length of the main line, from Toledo to Portsmouth, including the short branches from Logan to the coal fields, is now 322½ miles An extension of 30 miles to the Chesapeake and Ohio Railroad at Scarry Creek is arranged for, and should the connection be made it will open another line from the northwest to the seaboard through Columbus.

New York, Saturday, August 27, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

A very discouraging blow has been given to M. De Lessep's Panama Canal scheme by the amount of sickness and death experienced among the workmen. The construction of the railroad across the Isthmus was accompanied by a similar fatality among the workmen, it being a common estimate that a life was lost for every railroad tie laid. The work on the canal is naturally fraught with still more danger, as the vast amount of excavation required adds to the abundant causes conducive to the increase of the much dreaded fever. The great mortality among De Lessep's men is a stronger obstacle to the canal project than any application of the "Monroe doctrine" is likely to prove.

THE question of the desirability and practicability of building a ship canal across the isthmus of Delaware and Maryland, which has been written about and discussed so much, appears to the Baltimore Gazette to be finally settled and the construction of the work to be now a mere matter of time. In speaking of the work that paper says: "The money for that purpose has actually been obtained, and the money being ready the rest is easy. It looks like a simple thing in these days of great international enterprises in which millions figure as mere units of calculation to say that $6,000,000 have been obtained to construct a short canal between the Delaware and Chesapeake bays, but it is doubtful if anything of more importance to Baltimore's commercial interests has happened since the beginning of the Baltimore and Ohio railroad. * * * It places Baltimore two hundred and twenty-five miles nearer the ocean than she now is, and makes her the natural seaport of the West. It is impossible to overestimate the importance of the construction of this great inter-oceanic highway. Its value to Baltimore and the West is manifold and great.'

TENNESSEE is nourishing and developing the new spirit of enterprise which to such a marked degree is apparent in some of the South Atlantic States. At an immigration convention recently held at Jackson, Tenn., it was decided to form an organization to be known as the West Tennessee Immigration and Manufacturing Association, to be chartered as a stock company, with a central organization at Jackson and branch organizations in each county, the presidents of the branch organizations with the officers of the central organization constituting the executive committee. Senator H E. Jackson in speaking of the objects to be aimed at in such an organization and the means which should be adopted for their attainment made the point that no place possessing the ability to manufacture should make commerce of its raw material. He uttered truths which if rightly comprehended and acted upon, as fortunately there seems to be an increasing determination that they shall be in the South, will do more than any political work possibly could do for the development of that region, when he took the ground that what is needed is not so much immigration as manufactories; that the farming population could be decreased and the manufacturing class in Tennessee increased with benefit to both and that the boys and girls of Tennessee should be taught useful occupations, and that labor is honorable and not a disgrace.

THE vast amount of traffic that is seeking the Eastern seaboard through the Hoosac Tunnel and the increasing number of railroad interests reaching toward that great thoroughfare, bring to mind in strange contrast the doubtful feeling concerning the utility of the tunnel in the days when the gigantic engineering work was slowy progressing; a feeling expressed by one of the laborers who upon being asked if he thought "the great bore," as it was then called would ever pay, said no "but then it will be such an ornament to society, sure." Notwithstanding that so short a time has passed since the tunnel was opened it requires every available part of the State's facilities to accommodate the traffic now coming from so many different connecting roads and Superintendent Locke is required to push the work of double tracking the line with all possible speed. The latest connection made with the tunnel is that just effected by the New Haven and Northampton Railroad, which by connecting with the New York, New Haven and Hartford Railroad forms the only direct line from New York to the Hoosac Tunnel. Three trains are run daily with through cars from New York. In this way, a most delightful and quick trip up the beautiful Connecticut and Deerfield valleys, through the great tunnel to the famous "Berkshire Hills" and on to Saratoga is affordod, and it has already obtained great popularity.

THE ninth Cincinnati Industrial Exposition, which opens to the public September 7th and closes October 8th, promises a display of unusual interest and variety, its premiums extending over a wide range of departments, including those of machinery, minerals, metals, provisions, furniture, textiles, science, fine arts, horticulture, etc. The Cincinnati expositions command in a marked degree the confidence of exhibitors and the general public, a result due in a large measure to the generally good management they have had, being under the direct control of fifteen commissioners, of whom five are appointed by the Chamber of Commerce, five by the Board of Trade and five by the Ohio Mechanics' Institute, of Cincinnati. The exposition has earned a character of much more than local reputation as is shown from the fact that in 1880 it had exhibitors from twenty-four States and was attended by 300,000 visitors. The arrangements this year are said to be more extensive and complete than usual and a successful exhibition seems promised from the interest manifested in it throughout the country. Boston is now having a liberally attended and exceedingly interesting exhibition, the Atlanta International Cotton Exposition is guaranteed a brilliant success, our own American Institute Fair is always deservedly popular and with the exposition about being opened at Cincinnati the North, South and West seem to offer all that could be desired in the way of displays of American skill and ingenuity and of the varied resources of our country.

AN idea of the importance from a pecuniary standpoint of the adoption of judicious means for the care of live stock in transit is seen in the following estimates of the average shrinkage occasioned during transportation from the West to Eastern seaports under ordinary treatment. Professor Horsford estimates the shrinkage at about 14 per cent, the Massachusetts Railroad Commission at from 10 to 15, and the Massachusetts Society for the Prevention of cruelty to animals at 10 per cent. From humane and sanitary standpoints the reasons

for the most careful treatment of live stock intended for food are far stronger than those which arise direct from pecuniary considerations, and on these grounds much interest in the subject has been awakened in the mind of the public. The question has grown to be one of leading importance in its bearing upon our export trade, and it would not be surprising if the coming winter should see the matter placed among the various ones over which the clamorers for more railroad regulating and legislating will exercise themselves somewhat. A magazine article is not infrequently a precursor of such demands, and an article on this subject has just been published (skillfully and strongly prepared it must be admitted) in the North American Review. But the more that the spirit of the best railroad managers is understood the more clearly will their views be seen to be in sympathy with the demand of the public that cattle dealers and shippers, with whom the responsibility for the illtreatment of cattle in transit chiefly rests, shall provide means for their proper care; the reasonableness of which is fully established when the economy resulting from a compliance with it is so plainly demonstrated.

Organization.

The Buffalo, Rochester and Pittsburg Railroad Company has been incorporated. The line is to run 50 miles, from Machias, Cattaraugus county, to Buffalo. Capital, $500,000.

The directors of the Camden (N. J.) Horse Railroad Company, elected on the 22d inst., are: Thomas A. Wilson, Thos. McKeen, John Hood, Wilbur F. Rose, Calvin S. Crowell. The officers are Thomas A. Wilson, president; John Hood, secretary; and Thos. McKeen, treasurer.

A certificate of the reorganization of the State Line and Juniata Railroad, which had been sold under an order of the Court of Common Pleas of Philadelphia, has been filed at Harrisburg, the name of the new company to be the Susquehanna and Southwestern Railroad Company. Capital stock, $500,000. President, George W. McPherson, Philadelphia.

The Tennessee Southern Railroad Company was organized at Memphis Tenn, on the 18th inst. The road will extend from Memphis to Vicksburg. The directors are: N. M. Jones, Jno. M. Peters, Wm. P. Hunt, W. D. Lee, J. Henry Brooks, L. A. Campbell, Geo. M. Klein, Eugene Martin and R. A. Speed. The officers are: Eugene Martin, president; N. M. Jones, vice president; Geo. M. Klein secretary and treasurer.

At the annual meeting of the Calumet and Hecla Mining Company recently held in Boston, the following gentlemen were re-elected directors for the ensuing year: Alexander Agassiz, Quincy A. Shaw, George Higginson, H. Hollis Hunnewell and James N. Wright. At a meeting of the directors, held subsequently, Mr. Agassiz was re elected president and Charles W. Seabury treasurer and secretary. The treasurer's report showed the net earnings for the financial year ended April 30 to have been $2,882,876 14.

At the annual meeting of the stockholders of the Boston, Hoosac Tunnel and Western Railway Company held at Mechanicsville, N. Y., on the 17th inst, the principal business transacted was the election of directors, resulting in the re-election of the old board, as follows: Geo. I. Post, Fairhaven, N. Y; M. P. Bush, Buffalo, N. Y; E. B. Phillips, Boston; C. G. Francklyn, New York; Wm. L. Burt, Boston; F. L. Ames, Boston; Elisha Atkins, Boston; Estes Howe, H. M. Benedict, New York, Daniel Jas. King, New York; Josiah Case, Vernon, N. Y; W. V. Reynolds, Schagticoke, N. Y.; S. V. White, New York.

Articles of incorporation of the Danville and East St. Louis Railroad Company were filed in the office of the Secretary of State of Illinois, on the 18th inst. It is proposed to construct a railroad from or near the city of Danville, through the counties of Vermillion, Champaign or Edgar, Douglas, Moultrie, Shelby, Christian or Fayette, Montgomery, Bond, Madison and St. Clair to East St. Louis. The capital stock is $5,000,000, and the incorporators and first board of directors are: H. W. Beckwith, Peter Wilber, T. H. Meyers, Chas J. Palmer and Will H. Beckwith, all of Danville. The principal office of the company is to be established at Danville.

Personal.

Vice president J. T. Gause of the Harlan and Hollingsworth Company, Wilmington, Del., arrived home from his European trip last week.

W. Whyte, formerly stationed on the Grand Trunk line at London, Ontario, has taken the position of agent of the Chicago and Grand Trunk Railway at Chicago.

George D. Davis, Jr., upon retiring from the position, of cashier of the Manhattan Elevated Railway Co. was presented with a handsome set of Hawthorne's poems by the employees of the cashier's office.

Senator Joseph C. Brown having resigned as president of the Atlanta Cotton Exposition, Gov. A. P. Colquitt of Georgia, has been elected to the office. The executive management remains the same as heretofore in charge of Director-General Kimball.

D. S. H. Smith formerly secretary and treasurer of the International and Great Northern Railroad has been appointed local treasurer of the Missouri Pacific railroad and its leased lines—St. Louis, Iron Mountain and Texas Pacific—with headquarters in St. Louis.

G. C. Broed, purchasing agent of the Louisville and Nashville Railroad is quoted as saying befor othe Tax Assessors of Railroads for Tennessee that "the more a railroad costs the less it is worth for railroad purposes, and therefore it should not be assessed according to its cost."

The Boston Times ideal of a travelling companion is one who never "fusses," who has very little luggage and still less temper, and who balances these negatives by exhaustless faculty for enjoyment, freshness of spirit, and appreciation of the true, the beautiful, and last, but far from least, the humorous and the comic.

Sir Alexander Galt, Colonel Dennis and Mr. John Lowe, Secretary of the Department of Agriculture, of Canada, have gone up into Manitoba to visit the extensive harvest fields of that region, on the line of the Canadian Pacific Railway. A special officers' car was tendered to them for the trip by A. B. Stickney, general superintendent.

Prof. Rarhael Pumpelly, has been appointed chief of the scientific exploring expedition organized by the Northern Pacific Railroad Company and the Oregon Railway and Navigation Company for the purpose of examining into the mineral, agricultural, and other resources of the territory tributary to the two companies between Lake Superior and the Pacific coast. He has already gone to Montana for the examination of the principal mining districts in that territory. The work of the expedition will extend through several years.

At the meeting of the American Express Company, on the 18th James C. Fargo of New York was elected president, in place of William G. Fargo, deceased. Theodore M. Pomeroy of Auburn remains vice president. Mr. Chas. Fargo of Chicago was elected second vice president, James C. Fargo was elected director of the Wells, Fargo & Co. express, to fill the vacancy in the board caused by the death of Wm. G. Fargo. T. M. Pomeroy was designated director of the Merchants' Despatch Transportation company, in place of Wm. G. Fargo, deceased.

Manufacturing.

Herr Krupp's great German steel works have been so pressed with orders recently that 8,000 more workmen have been employed making a total force of 13,000 men.

The Columbus (Ohio) Machine works have received and shipped 509 cars since December, 1889, when the railroad track was run into their yards.

It is said that iron or steel immersed in solution of carbonate of potash or soda a few minutes will not rust for years.

The Street Car Starting Gear Company, for the sale of a contrivance to aid in starting street cars has been organized in Boston with Francis Bartlett, president, and W. W. Swann, treasurer; capital stock, $25,000.

The United States Safety Car Company has just perfected an invention which will go far to mitigate the horrors which frequently accompany railroad accidents by the inability of passengers to escape from burning cars. It is a scuttle escape to be placed in the roof of passenger and express cars. Two or three are constructed in each car, the number contingent on the length of the coach. When a car is turned over at an angle of 45 degrees the scuttle will open and allow ample escape from fire and water, and without necessitating the breaking of glass. The cost of the appliance is $600 for each car. It is already in use on the New York Central and Hudson River Railroad and seems destined to meet with a very general adoption.

The following process has been introduced in Berlin for the recovery of old vulcanized rubber—such as the discarded buffer rings of railway cars, &c. These are heated in the presence of steam, the sulphur distilst off, and the rubber melts and bows into hot water, where it collects at the bottom of the vessel, the steam preventing the rubber from burning The effect of this operation is to considerably alter the properties of the rubber, it becoming a tolerably fluid, dark mass, which remains liquid at common temperatures, but drying on exposure to the air, and is imprevious to water. Its elasticity is lost, and it is chiefly valuable for preparing water-proof covering cloths for out-door service; also as a lacquer for various articles of hardwnre manufacture.

Concerning the naptha locomotive the Scientific American says that a number of experiments made in June on the consumption of naptha, on Tamboff Saratoff line by the engineer M. Paretsky, shows the following results:

(1.) Steam was got up from cold water to a pressure of 100 lb. on the square inch in two hours, and by burning 4 poods—or 144 lb—of naptha. Usually in the same locomotive, with coals aided with wood, there and a half hours are required and 26 poods of coals and wood—936 lb. (2.) The apparatus can be kept in use forty-eight hours without stoppage for cleansing, after which only two hours are required to clean out, (3.) In running 1,500 versts it was only required to stop the locomotive twenty minutes for fuel, and the driver and stoker have almost nothing

to do, except to stop and start, the apparatus simply requiring opening more or less of the fuel. (4.) The flame is so well thrown over the whole of the fire box that after running 40,000 versts it is considered only one-half remount is necessary as opposed to coals. (2.) While it was found possible to evaporate 13 15-16 lb. of water with 1 lb. of naphtha, the absolute result with new men and on the whole runs was 9 lb., or about two and a half times more than the coals used.

Railroad Earnings.

The St. Paul, Minneapolis and Manitoba week ending Aug. 14, $97,516 47; corresponding week last year, $56,259 14; from Jan. 1 to Aug. 14, $2,534,378 00; corresponding period last year, $1,823,164 96.

Chicago and Grand Trunk, week ending Aug. 13, $33,166, corresponding week last year, $28,046; aggregate increase for first half of year over corresponding period last year $11,732.

Flint and Pere Marquette week ending Aug. 14, $33,201 45 corresponding week last year, $31,484 40; from Jan. 1 to Aug. 14, $1,107,402 20, corresponding period last year, $913,484 35.

The Boston, Hoosac Tunnel and Western Railroad Company has located the bridge crossing the Mohawk River at Crawford's, N. Y., about seven miles west of Schenectady. James Shanahan has the contract for furnishing the stone for the abutments and piers, and a railroad is to be constructed from the canal to carry the material to the spot where it will be required.

The St. Paul Minneapolis and Manitoba Railroad Company have completed their grade from Grand Forks to the British line. This extension completes the line running from Fargo north. This new road runs northwest and north from Grand Forks and parallel with the Red River. Keeping about twelve miles west of the river. A large number of men are laying iron, and about fifty mies will be laid within the next sixty days to Grafton, in the centre of Walsh County.

Work has been commenced on the Chicago and Indianapolis Air Line Railroad south of Delphi. Some 500 men and teams are already employed, and the force is to be increased next week. The friends of the road say that trains will be running between Delphi and Indianapolis before January 1, 1882.

The Canadian Pacific Land Department is now in full operation. Applications for 300,000 acres were on file when the office opened, and on the first day some fifty personal applications to purchase were made. A map has been received from the Department of the Interior at Ottawa in which the Canadian Pacific as well as the Southwestern railway subsidized lands are shown, and officers of the former company are now out to verify its correctness.

A double track nearly a mile in length is being laid opposite each of the stations on the Grand Trunk Railway of Canada, between Toronto and Colborne.

The extension of the Chicago and Northwestern Railway from Madison, Wis., to Montfort, has been completed, and regular trains will be run from Galena, Ill., to Madison via Montfort, as soon as the necessary side tracks are put in at that place, giving another outlet to Chicago and Milwaukee.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 18, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad...	189,253	5,183,704	4,465,138
Schuylkill Canal....	16,326	818,779	249,323
Lehigh Valley.....	136,110	3,817,339	2,901,231
Del., Lack. & Western	92,515	2 401,849	1,954,513
Shamokin Valley	30,378	645,388	485,115
Central New Jersey.	93,351	2,541,108	2,014,279
United R. R. of New Jersey..	26,587	923,823	629,906
Pennsylvania Coal ..	34,754	776,553	596,403
Delaware and Hudson	78,249	2,093,655	1,722,309
Huntingdon & Broad Top Mt.....	12,933	313,057	280,347
Penn. and New York.	36,785	1,001,742	744,112
Clearfield, Pa.....	45,333	1,474,213	929,928

The total tonnage of anthracite coal from all the regions for the week ending August 13, as reported by the several carrying companies, amounted to 635,914 tons, against 417,564 tons in the corresponding week last year, an increase of 218,350 tons. The total amount of anthracite mined for the year is 16,276,693 tons, against 12,829,946 tons for the same period last year, an increase of 3,446,747 tons. The quantity of bituminous coal sent to market for the week amounted to 91,160 tons, against 83,954 tons in corresponding week last year, an increase of 7,206 tons. The total amount of bituminous mined for the year is 2,947,271 tons, against 2,508,736 tons for the corresponding period last year an increase of 443,535 tons. The total tonnage of all kinds of coal for the week is 727,074 tons, against 501,518 tons in corresponding week last year, an increase of 225,556 tons, and the total tonnage for the coal year is 19,223,964 tons, against 15,333,682 tons to same date last year, an increase of 3 890,282 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending August 13 was 180,838 tons, of which 132,595 tons were coal and 48,246 tons coke. The total tonnage for the year thus far has been 5,485,236 tons, of which 3,967,712 tons were coal and 1 517,524 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 13 were 45 967 tons, and for the year to that date 1,285,096 tons, a decrease of 28,974 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 19,321 tons; year, 803,009 tons; decrease as compared with 1880, 1,415 tons; Chesapeake and Ohio Canal—week, 18,817 tons; year, 272,133 tons; decrease as compared with last year, 45,291 tons. Pennsylvania Railroad—week, 7,715 tons; year, 159,493 tons; increase compared with 1880, 17,262 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 34,282 tons; year, 1,125,142 tons. Baltimore and Ohio Railroad—week, 1,458 tons; year, 39,707 tons. George's Creek and Cumberland Railroad—week, 10,138 tons; year, 67,004 tons. The Reading Railroad tonnage for last week ending August 20, was 165,330 tons, of which 47,000 tons were sent to and 60,000 tons shipped from Port Richmond, and 10,700 tons sent to and 14,000 tons shipped from Elizabethport.—[Phila. Ledger, Aug. 22.

In 1879 there were 4,189 miles of railroad in Spain, in 40 different lines, worked by 25 different companies. On these roads during the year 14,115,268 passengers and 6,425,655 tons of freight were carried, and their total earnings were $26,344,405, or at the average rate of $6,288 per mile.

The stockholders of the Virginia Valley Railroad have authorized the Board of Directors to negotiate a mortgage of $1,000,000, the proceeds to be applied to the construction and completion of the road from Staunton to Lexington, and for the equipment of the entire line from Harrisonburg to the latter point. It is announced that the work of construction will begin at once, satisfactory arrangements having been made for a connection with the Richmond and Allegheny Road at Lexington.

The directors of the Rochester and Pittsburg Railroad Company have decided to extend its line from Salamanca to Brookville, where connection for Pittsburg is made with the Pennsylvania Low Grade and the Pittsburg and Western railroads. This line is 120 miles long, including a 15 mile branch to the coal fields to Ridgeway. A branch 45 miles long will be constructed from a point near Machias to Buffalo, making the entire new road to be constructed 165 miles.

The West Chester and Philadelphia, and the Philadelphia and Baltimore Central Railroad Companies have by agreement appointed the Philadelphia, Wilmington and Baltimore Railroad Company their agent to operate their lines, which will be known as the Central Division of the Philadelphia, Wilmington and Baltimore Railroad. The President, Henry Wood, will for the present act as Superintendent of the division.

The Pennsylvania Railroad Company is erecting a new freight depot at Trenton, 411 feet long by 92 feet wide, of corrugated iron, with a two-story brick office in front, 81 feet by 21 feet 10 inches. It is upon the site of the old one, near the Trenton lock of the Delaware and Raritan Canal.

The surveys for the extension of the Quebec Central Railway to deep water at Levis have been completed, and work will shortly be commenced. It is expected the whole will be completed by the 1st November next.

The Boston, Concord and Montreal Railroad are having six of their thirty-five wood burning locomotives changed into coal burners and some have already made their appearance. A growing scarcity of wood has induced the change.

The entire debt of the United States does not amount to the national income for five months in the year. In 1865 the debt amounted to $78 25 per capita; in 1880 it was $37 74 per capita.

The first train from Philadelphia through Seaside Park to Lavalette City, N. J., was run by the Pennsylvania Railroad Company on the 19th inst. The rails are being laid to Point Pleasant.

The Lehigh and Hudson Railroad having passed into the hands of the Pennsylvania Railroad Company, a line to connect the two is being laid at Belvidere N. J.

During the past year over $1,000,000 have been spent in improving and extending the Credit Valley Railway.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 30, 1881.

WILLIAM WINDOM,
Secretary of the Treasury.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Aug. 28, 1881.

If anything the market is stronger than reported last week and the demand very active. We quote as follows—

FOUNDRY.

	No.		Mos.
Hanging Rock Charcoal	1	26 00@27 00	4
Strong Neutral Coke	1	22 50@23 50	4
American Scotch	1	20 00@21 50	4

GREY FORGE.

Neutral Coke		20 00@21 50	4
Cold Short		19 00@20 00	4

CAR WHEEL AND MALLEABLE.

Hanging Rock Cold Blast		36 00@38 00	4
" Warm "		30 00@32 00	4
Lake Superior 1 and 2		32 00@33 00	4
Lake Superior 3 to 6		34 00@36 00	4
Southern Car Wheel		34 00@35 00	4

The survey of the Keysville and Clarksville Railroad in Mecklenburg county, Va., has been completed. Advertisements have been made calling for proposals to furnish 40,000 cross-ties, which would indicate that the road will soon be in process of construction.

Philadelphia Stock Exchange.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Aug. 25, 1881.

In the money market this morning 5@6 per cent was the ruling quotation for call loans, time loans and prime mercantile paper. In the afternoon the quotation was 6 per cent, and at the close 3 per cent.

The posted rates for prime bankers' sterling were 4 81@4 84; the actual rates, 4 80@¼ and 4 82¾@4 83¼ with cable transfers 4 83¼@½. Prime commercial bills were 4.77¾@4.78. The actual rates for continental exchange are as follows: francs, 5.26¼@⅜ and 5.23¼@¾; marks, 93⅞@94 and 94¼@⅜, and guilders 39¾@39⅞.

The Secretary of the Treasury issued on the 22d inst., the following notice to holders of called five per cent. registered bonds.

Notice is hereby given that the department will redeem upon presentation, without rebate of interest, the outstanding five per cent. registered bonds (funded loan of 1881) embraced in the 104th call, maturing October 1 next. Parties transmitting bonds for redemption should address them to the Secretary of the Treasury, Loan Division, Washington, D. C., and all the bonds included in this notice should be assigned to the "Secretary of the Treasury for Redemption." Where checks in payment are desired in favor of any one but the payee the bonds should be assigned to "The Secretary of the Treasury for Redemption, for account of——" (here insert name of person or persons to whose order the check should be made payable.

The aggregate amount of these bonds, the payment of which it is thus proposed to anticipate, is about $30,000,000; and there are, in addition to these sums about $10,000,000 of coupon bonds of the same series that were not continued

at the lower rate. These were payable on the 12th inst., on which date interest ceased, but thus far not more than $1,500,000 have been presented for payment. The Treasury now holds a large surplus, which is being daily increased by unusually large receipts. The receipts for August from Customs and internal revenue have averaged about $1,250,000 per day. The action of the Secretary in thus anticipating, six weeks in advance of maturity, so large an amount of the public debt, cannot fail to have a good effect abroad on American credit. Under the present notice it is not expected that any large amount will be presented at once, but that the payment of the bonds will be extended through the remainder of this and perhaps all of next month. The payment of these bonds is the last act in the plan by which the loans have been continued at the reduced rate of interest, and the Secretary is anxious to have the transactions closed as soon as practicable.

A Plan for an American Railroad Clearing House.

A correspondent of the Baltimore Sun has laid out a plan for the establishment of a railroad clearing house, which is editorially summarized and commented upon by that paper as follows:

There is to be a compact entered into for a period of five years by the trunk roads, binding themselves to submit all business now competitive, or which may hereafter become competitive, to the control of a clearing-house, and yield to it the contrivance of such checks and guards as will secure the purposes of the compact. This compact is to be renewable at the will of a majority of the parties concerned. There is to be a commission to determine the quota of traffic in and out of each centre of trade which should fall to each party to the compact. There is to be a board of governors, invested with executive powers only, who shall hold office but one year, being selected by representatives of the trunk lines in convention assembled. As the pools heretofore formed could not enforce their agreements for want of penalties, it is proposed that each trunk line shall make with the clearing-house a deposit of money or securities, to be forfeited by any member withdrawing from the compact or neglecting its requirements, said deposit to be then divided pro rata among those who remain faithful to the arrangement.

The authorities thus created and fortified with the means of inflicting penalties will, in conjunction with a representative of each road, proceed to fix quotas of traffic, establish classifications, determine rates, and where shippers prefer a particular road and give it excessive business, determine what the road preferred shall have for its extra expense and labor. One of the most important features of the plan is that the division and allotment of net earnings shall belong exclusively to the clearing-house, for, through its exercise of the function of clearing accounts, it will be in a position to enforce its decisions—a thing pools have never been able to do. Each railroad will have the management of its own business with its customers, but will be required to send duplicates of its bills of lading and duplicate way-bills to the clearing-house. In such data will be found the basis for determining quotas of business, etc., and for the clearing of accounts. The clearing-house will also certify to the correctness of claims for overcharges, rebates, etc., and indicate monthly the amount due each road—"allowances" to be made out of a general fund to prevent suspicion of unfair dealing by individual roads.

The house is also to have charge of mileage and car-service accounts, thus saving a vast amount of trouble to the parties to the arrangement. Yardmasters and conductors will report to the clearing-house in order to establish liabilities for repair, equipment, etc. A very desirable thing will be effected, the writer holds, by the operations of the central clearing-house, namely—the introduction of a uniform method of keeping railroad accounts. Economy will result, and it will be possible for each road to inspect the books and understand its obligations to other roads at a glance. Railroads are shown to need such an agency for the harmonizing of their differences as a means of protecting themselves from the bother of conflicting legislation, whether from the individual States or from the general government, and the writer thinks, that a show on the part of railroads of a desire to settle their differences would appease the growing popular clamor for their absorption by the government. The English system of clearing-house operations, though not so thorough in its details as that now proposed, has attained considerable success, and put the plan proposed beyond the stage of mere theory.

The Chief of the Bureau of Statistics reports that the total values of the exports of domestic provisions, tallow and dairy products during the month of July, 1881, were $11,542,029, and during July, 1880, $12,860,517; for the seven months ended July 31, 1881, $82,708,977, and during the same period in 1880 $82,286,346; the total values of provisions and tallow for the nine months ended July 31, 1881, $95,899,277, and for nine months ended July 31, 1880, $68,321,037. Dairy products for three months ended July 31, 1881, $7,764,456, and for the same period in 1880, $8,516,057.

The Chicago, Milwaukee and St. Paul Railway Company has completed laying its track on the James River division south from Aberdeen, D. T., to Mellette, a distance of 21 miles. The grading is now progressing at Ashton, 32 miles south from the former point. Although the work at Mitchell has been suspended for a time it is expected that a force will be put on soon and a connection established between the line leading north to Mitchell and the one south from Aberdeen.

The Akron, Cleveland, Mt. Vernon and Delaware Railroad, which was sold at Cincinnati, Ohio, on the 20th inst., by William H. Upson, Special Master Commissioner, was purchased by W. H. Smithers, of New York; J. A. Horsey, of New York, and J. M. Adams, of Cleveland, the purchasing committee representing Holland bondholders, for $1,140,200. No other bids were made. Important improvements and extensions will follow.

The Texas and New Orleans Railroad Company has acquired and will hereafter operate the Louisiana Western Railroad. This line of road extends from Vermillonville, La., to the Sabine River, in Texas, and is about 106 miles long.

The extension of the Indiana, Bloomington and Western Railroad in the eastern part of Indiana has been finally located. It is to run through the southern townships of Randolph County. The line is now located between Indianapolis and Springfield, O., except for a short distance east of Troy.

Pennsylvania Railroad.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for July, 1881, as compared with same month in 1880, shows:

An increase in gross earnings of	$330,774
An increase in expenses of.....	142,308
An increase in gross earnings of....	$188,466

The 7 months of 1881, as compared with the same period in 1880, show:

An increase in gross earnings of..	$2,450,543
An increase in expenses of	1,359,380
An increase in net earnings of....	$1,091,013

All lines west of Pittsburg and Erie for the 7 months of 1881 show a surplus over liabilities of $1,804,316, being a gain as compared with the same period in 1880 of $146,380.

The managers of the Canadian Pacific Railway Company are now advertising for proposals for the clearing up and grading of 60 miles of the Sault Ste. Marie Railway, from Algoma Mills on Lake Huron easterly to a point near the north side of Spanish River. It is the intention to complete this line without delay, in order to make connections for a through Canadian line, via the lakes, from Montreal to Winnipeg.

A railroad is to be built from Verndale, in Wadena County, Minn., to Shell City, also in Wadena, and thence northerly to a point on the north or west boundary of Minnesota, between the 94th and 97th degrees of longitude. The capital stock is placed at $1,000,000, to be paid in installments not to exceed 20 per cent. on each share.

The Indianapolis, Peru, and Chicago Railway, recently purchased by the Wabash, St. Louis and Pacific Railway Company, extends from Indianapolis north to Michigan City, on Lake Michigan. It crosses the main line at Peru, and the Logansport and Detroit line at Denver, Ind. The road is 161 miles long.

The tolls collected at Ottawa for the first three months of the current season of navigation were as follows: Rideau Canal, $2,116; Ottawa River, $18,757. Both show an increase over the receipts for May, June and July of last year.

As soon as the survey of the Baltimore and Drum Point Railroad, which is being made on the line of the Annapolis and Elkridge Railroad, near Waterbury, is completed, the work of construction will be commenced.

The Brownsville extension of the Pittsburg, Virginia and Charleston Railroad has been completed. It is fifty-three miles in length, and cost $1,836,170.20. The track is mostly laid with steel rails.

The Hanover Junction and Susquehanna Railroad, located in York and Lancaster counties, Penn., is to be sold in Lancaster on September 15, by order of the Court.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

ELECTRICITY AS A MECHANICAL POWER.

In quoting the lecture recently delivered before the Society of Arts in London, by Alexander Siemens, an exchange says: The practicability of an electric railway is already demonstrated. People may see it for themselves at the Crystal Palace, and the German capital gives yet more convincing proof. The great potency of the invention consists in the transmission of the motive current by a simple wire. Whether through a cable or mere strand, nothing can be more facile than this mode of communication. The wire can be buried or hung aloft, or twisted and turned in any desired direction. The distance to which the current can be conveyed, and the amount of energy lost in transit, are matters which more immediately affect the economical aspect of the question. But allowing that only half the power expended can be recovered and turned to account, Mr. A. Siemens shows that cheapness would be effected in many instances as compared with the use of small steam engines.

The idea is that of a central station, where powerful steam engines, working on the most economical principles, would drive a number of electrical machines to produce the required currents. It would be easy to lay wires from the central station, in the same way as we see them now laid in cast iron pipes in the city. From these main wires there would be junctions leading into the houses, and there would be no difficulty in providing two separate currents—one for lighting and the other for power—to be used as acquired. Already we have the city illuminated by means of currents generated at a distance once thought impracticable. The transmission of power by the electric current is shown, not only by the Siemens Railway, but by various other applications. Cranes are worked and ropes are pulled by this agency at Charlton, near London, while double furrow plows and also a threshing machine have been worked by a Gramme machine in France.

Dr. Siemens is making the electric current perform all kinds of handiwork at his country residence near Tunbridge Wells, the result being that one man at the farm is enabled to do the work which otherwise would occupy three—a fact which may claim attention from the agricultural interest hard pressed by foreign competition. Sir William Armstrong has utilized the power of falling water for the working of a machine, whereby he gains sufficient electricity to light up 30 or 40 Swan lamps. Dr. Siemens turns a wire fence to account by making it take the return current. It is to be hoped no ingenious device of this kind will lead at any time to an unexpected mishap. The danger of meddling with cold iron may assume unwonted proportions, if powerful electric currents are to be traveling along wire fences and other unsuspected places.

PNEUMATIC CLOCKS.

The system of driving and regulating clocks, by currents of compressed air sent through tubes from a central station, seems to be making progress in Paris. The Pneumatic Clock Company, established in March, 1880, has now sixteen miles of main pipes laid, and controls fourteen public clocks, with thirty-three dials, and 2,000 clocks in 500 private houses. The system consists of central works, at which the air is compressed by means of steam engines working air compressors, and stored in reservoirs at pressures varying from fifteen pounds to forty-five pounds per square inch. The air thus compressed and stored is led to distributing receivers, passing on its way to each through a pressure regulator by means of which a periodical transfer or discharge of compressed air from the reservoir into the receivers takes place, replacing the air which is discharged every minute from the receivers to the clocks.

The central or normal clock is an instrument of great precision, and is fitted with an equilibrium or balanced slide valve, that is successively opened and shut by the action of the clock, which is self-winding. The intermittent current of air on reaching the receiving clocks acts upon their mechanism, transmitting the time to one and all at the same instant. These clocks are made as simple as possible, having an ordinary minute wheel and a wheel of sixty teeth controlled by a catch fixed on a lever which receives its motion from a leather bellows. Another catch prevents the wheel returning upon itself when once it has been moved one tooth. The pressure conveyed through the system of pipes every minute from the main clock causes the bellows of each receiving clock to expand, thus advancing the wheel one tooth, and the minute hand through a one-minute space. The main air pipes, which are laid in the sewers, are only about an inch in diameter, and these are tapped at intervals to meet the requirements of the customers. The system appears to be simple, its action certain, and its cost to the public moderate.

A SAD PICTURE OF SUFFERING AMONG THE PANAMA CANAL LABORERS.

A physician from this city, Dr. Chas. Peitzch 141 West Thirty-second street, who has just returned from Aspinwall and Panama, is reported by the Tribune as giving the following gloomy account of affairs on the Isthmus. "If any of your friends think of going to Panama," said the Doctor to a Tribune reporter, "advise them not to. In all my travels I never saw a more sickly, poverty-stricken and forsaken people. I was induced to go there by the promise of a large business in my profession. There was plenty for me to do, but no money in it, and I came away as soon as I could. There are about 250 people at work on the Panama canal, 200 of whom are negroes. Half of them are sick, haggard, and starving, and the death-rate is alarming, although the facts are suppressed as much as possible. There are not more than 100 able-bodied men at work at any time, and the force is constantly being renewed, because the laborers fall victims to disease; then lose their places and starve, or die of fevers and a peculiar wasting away of the system. The canal company wants to get all the laborers possible, and it offers the inducement of high wages, board, plenty of work and free passage. Agents gather laborers up wherever they can find them and take them by boat to Aspinwall

and rail to Panama. They receive $17 a month, and the worst board imaginable. They are crowded into shanties and fed on the cheapest kinds of food; rice twice a day, tea or coffee in the morning only, salt beef once a day and no bread; fresh meat, never. Once there, it is impossible for laborers ever to return, as the men have no money, and it costs $25 to ride back to Aspinwall, a distance of forty-seven and one-half miles, and they are too weak to walk. White people soon become yellow and look like death, and beg tourists to take them away.

"Work is advancing very slowly on the canal, and there is nothing to show for the money spent. It is generally believed in that country that the canal will never be finished. It is about as wide as Broadway from house to house. There are some stakes driven down and planks laid along and the earth stirred up a little, but that is all. It seems hardly possible to live in that country. It is marshy and malarial, and infested with alligators and serpents and poisonous insects. I was bitten in the hand by an insect and my arm has swollen up and been useless for a month. The population is composed of negroes and Spanish and French of the lowest class. The climate is warm, terribly warm, moist and oppressive, and tends to induce the use of stimulants. St. Louis beer costs 35 cents a bottle, Milwaukee beer 25 cents. Whiskey is cheap, and the best imported Holland gin only 40 cents a quart. Beef and fish are very plentiful and cheap, as are also fabrics. On the whole, the country is no place for any but a very patient man with plenty of money."

Marietta and Cincinnati Railroad.

Referring to the proposed re-organization of the Marietta and Cincinnati Railroad Company, Messrs. John A. Hambleton & Co., of Baltimore, Md., in their circular of last week, say:

At a meeting of the Baltimore bondholders of the Marietta and Cincinnati Railroad held on the 26th inst., there were present many of our most influential citizens; and although the amount of bonds represented was not definitely known, it was roughly estimated that the parties present held or controlled about $1,000,000 of the first, second and third mortgage bonds. A statement was made that an examination of the reports of the Receiver showed that the company was in a very prosperous condition, and that the Receiver's statements on file in the Ross County Court showed that the road was earning net $700,000 per annum. Much indignation was expressed that the reorganization of the road had been so long delayed, and it was the universal sentiment that it was necessary that the bondholders should take steps to protect their interests and to effect an early and satisfactory settlement of the affairs of the road. The sentiment of the meeting seemed to be that an amicable arrangement could be made with the Baltimore and Ohio Railroad, but that if necessary the bondholders should insist upon a foreclosure under either the second or third mortgage and a sale of the road. By agreement with the New York bondholders, who are now represented by a committee of seven, three of their number are to be dropped and their places are to be filled by a like number from the Baltimore bondholders. This committee of seven are to prepare a plan of reorganization of the Marietta and Cincinnati Railroad, which plan is to be submitted to a general meeting of bondholders to be called for that purpose. The committee were also requested to take such action as should be necessary looking to the appointment of a receiver, who will manage the affairs of the Marietta and Cincinnati road in the interest of the bondholders. The New York committee consists of Mr. Kountze, of Kountze Bros.; Mr. Dumont, of Jesup, Paton & Co.; Mr. Arents, of Arents & Young, and Mr. Bacon of the law firm of Field, Dorsheimer, Bacon & Deyo. The Baltimore members of the committee are H. Irvine Keyser, Skipwith Wilmer and T. Edward Hambleton. The bondholders of the Marietta and Cincinnati Railroad may make up their minds, if they have not already done so, that an early reorganization of the road can only be effected by their own action, and the sooner they assert their rights the better. The managers of the Baltimore and Ohio company are well satisfied with the present state of affairs, and are content to draw 7 per cent interest on the bonds and 8 per cent interest of the stock of the Cincinnati and Baltimore and Baltimore Short Line Railroad, while the bondholders of the Marietta and Cincinnati Railroad get nothing.

The Pacific Railroads.

The Central and Union Pacific Railroads were united May 8, 1869. The record of through travel from that date to the end of 1869 has never been published. A recent application from this office brought out the following estimate of through travel for that period, or rather from June 1, 1869, to December 31, 1869:

	Arrived.	Departed.
June, 1869	553	476
July	1 282	1,086
August	2,110	2,060
September	3,594	3,153
October	4,498	2,518
November	3 679	2,218
December	1,815	1,573
Totals	17,531	13,084

We have the official figures for every subsequent month up to May 1, 1881. Dividing the years so as to make them conform to the life of the road, we are enabled to present the following complete statement of the through passenger traffic of the Central Pacific and Union Pacific Railroads to and from San Francisco for the twelve years ending May 1, 1881:

Years.	Arrived.	Departed.	Gain.
1869	26,600	18,100	8,500
1870	30,600	24,300	6,300
1871	28,700	20,700	8,000
1872	38,100	22,800	15,300
1873	52,900	26,100	26,800
1874	63,300	25,700	37,600
1875	70,300	32,800	37,500
1876	61,400	37,000	24,400
1877	42,500	29,800	12,800
1878	37,700	25,100	12,600
1879	34,700	24,700	10,000
1880	34,800	29,000	5,805
Totals	521,100	316,100	205,000

The net gain was the largest during the two years ending May 1, 1876. It was the smallest last year in the history of the road.

The transportation of these 837,200 passengers has been a fine thing for the railroad companies. Averaging each fare at $100, it will foot up a total of $83,720,000, and possibly $100,000,000 would be nearer the mark. This is only an incidental gain. The freight traffic has been a still greater source of profit to the companies. The employment which the road has given is another benefit. The gain to California and the Pacific Coast is the permanent addition to our population of 205,000 souls. These have not all stopped in this State, but they are to be found in some of the Pacific States and Territories, less the number that have gone to foreign countries, and to that other country from whose bourne no traveler ever returns. Most of those immigrants brought money. Coming as they did from the Atlantic States, rather than from Europe they must have brought considerable funds. Allowing for an average of even $50 per head, the sum total would be $10,250,000, or of $100 per capita, there is a total of $20,500,000, besides muscle and brains of still greater value in a new section of country like ours.

According to the census, the population of California was increased 304,000 in the past decade. This is equal to a gain of 55 per cent. The gain in the material development of the State during the past 12 years has been even greater. The wheat crop has been doubled during this interval, and the same is true of many other crops.—[San Francisco Bulletin.

Greenwood, Laurens, and Spartanburg Railroad.

Active movements are in progress looking towards the building of the road beween Greenwood, Ga., and Spartanburg, S. C., where it is to be met by the proposed Midland Railroad, whereby a through line between Baltimore and Augusta, Ga., is to be secured. A correspondent of the Baltimore Sun calls attention to the fact that the counties of Spartanburg and Laurens, S. C., have each subscribed $75,000, instead of $50,000 each, as heretofore stated, to the Greenwood, Laurens and Spartanburg Railroad, and it is expected this will be increased at least $50,000 more by private subscription, making a total county and private subscription of $200,000, which is certainly ample demonstration that the people of those counties are in earnest. A meeting of the stockholders of the company is to be held in Spartanburg, September 7, for the purpose of organization by the election of a president and other officers. As recently stated, work on the Midland extension is in active progress between Danville, Va., and Mocksville, N. C., and it is to be hoped that the entire line between Danville and Spartanburg will be completed by the time the Southern connection from Augusta reaches Spartanburg.

During the month of July the Scotch importations of butter and cheese from America were very heavy. For Glasgow alone the boxes of cheese during the month numbered 137,852, and the tubs of butter 39,650, of which latter 2,500 were oleomargarine. This was an increase of 47,000 boxes of cheese and 19,900 tubs of butter, the largest increase known in any month in the year. For the seven months since January last there had been an aggregate importation of butter of 98,220 tubs, which was an increase of 12,518 over the same period last year. Of cheese the aggregate was 257,724 boxes, and the increase 81,492. More than one-half these 257,724 boxes of cheese came in the month of July, and for the last week of that month 40,000 were arriving every seven days. Every lot of American cheese, as soon as it arrives, is picked up in Scotland, and the quality is described as "very fine." Prices have gone up to $30 per ton.

Track laying on the Louisville, New Albany and St. Louis Air Line Railroad, between New Albany and the Tunnel, has been commenced.

New York, Saturday, September 3, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

As it has been so clearly proved that the most prolific source of railroad accidents is found in the careless habit of walking on the track the adoption of any just means tending to prevent such murderous recklessness and to make it a severely punishable form of trespassing would be of great benefit. A strict enforcement of rules and laws on this subject would greatly decrease the number of railroad casualties. In Massachusetts, where most careful records of railroad accidents are kept officially the returns show that on an average one-third of all the casualties are in cases of trespassers, where persons, especially children, are illegally walking or playing on the track or stealing rides on the cars. In fact it has been shown by statistics both here and in France that the number of deaths by railroad accidents to passengers is so small as compared with the death rate from other accidents as to make warranted the statement that a person can be in no safer place than on a good railroad car travelling over a well managed road. That proportion would be still more striking were it not for trespassers of human and brute kind, for a large number of the accidents to passengers are occasioned by the cars being thrown from the track through coming in contact with trespassers on the railroad. Unfortunately also the greater portion of the human kind found walking on the track carelessly are under the influence of liquor to such an extent as to make them incapable of appreciating the manner in which they are endangering their own and others' lives. The system of covering the entire surface of the road with broken stone having sharp and uneven edges is a good one so far as it goes for it certainly makes an uninviting foot-path, but there is still needed more stringent laws against trespassing on railroads and a more vigorous enforcement of them.

A REMARKABLE development of coal and iron resources has been witnessed in the Hocking Valley during the past six years. In 1875, only 1,250 tons of iron were made in the valley while for 1880 the amount of the manufacture reported was 85,179 tons, the coal production for last year being 2,800,000 tons. A consolidation of many of the coal and iron interests of the valley was effected last week at Columbus, Ohio, by the incorporation of the Standard Coal and Iron Company, which has acquired about 90,000 acres of land. Among the prominent men connected with the new company are mentioned J. Henry Brooks, John W. Brooks, John N. Denison, Oliver Ames, Frederick L. Ames, Oakes A. Ames, Alfred W. Nickerson, William P. Hunt, Cyrus Woodman, John M. Glidden, and George W. W. Dove, of Boston; William D. Lee, Governor Charles Foster, General Samuel Thomas, William Monypenny, John C. Larwell, of Ohio; Walter P. Warren jr., George Chapman, William Walter Phelps, and Joseph Vilas, of New York; and Secretary Blaine and General James A. Hall, of Maine.

CONSIDERABLE interest has been manifested of late in practical tests of the merits of consolidated engines, and the impression seems to be growing that on roads of light grade the Mogul engines are more economical than eight-wheel engines, while on roads with heavy grades the consolidated engines do better service with less fuel than do the Moguls. The Indianapolis Journal has recently had a representative in the East visiting railroad men, and making inquiries on the subject. He speaks in that paper of interesting experiments having been made on Western and Eastern lines, and says: "In every case has it been demonstrated that by the use of the heaviest freight engines is the most saving in fuel effected. From Superintendent Shepherd, of the New York and New England Road, we learn that for months he tested the heavy consolidated engines against the Mogul engines in service on that road, and he found that the consolidated engine which hauled forty-five loaded cars over the road consumed less coal than did the Mogul engines, which hauled twelve to fifteen cars, and so satisfied was he with the experiment that on his advice President Wilson has ordered twelve consolidated engines built, weighing fifty tons each, and the Hinkley Locomotive works now have three of them on the stocks and well along toward completion. The Fitchburg Railroad Company on the heavy grades west of Fitchburg has, after careful test, come to the same conclusion, and President Stearns states that in the future all the freight engines ordered will be of the consolidated pattern, five of which are already ordered. On Western roads the tests have been much the same in results. The Chicago, Burlington and Quincy Road is now having built at the Baldwin Locomotive Works twelve consolidated engines, which will weigh fifty-five tons each. The Indianapolis, Bloomington and Western has also ordered twenty, eight of which are to be built at the Rogers Locomotive Works, and twelve at the Brooks Locomotive Works; and the tendency is with all managements to order heavier engines whenever purchasing new ones."

Personal.

John King, Jr., formerly of the Baltimore and Ohio Railroad Company, expects to leave for Europe next month, to be gone three months.

George Jones of the New York Times, and John Walter of the London Times, member of Parliament, are on the steamer Bothnia, coming to New York.

It is reported that Captain W. W. Peabody, general superintendent, is to succeed John King, Jr., as receiver of the Ohio and Mississippi Railroad.

J. W. Soper is reported to have resigned the general managership of the St. Louis and Iron Mountain Railroad to take charge of the Wagner Car Company's business.

James C. Fargo, the new president of the American Express Company, is the youngest brother of the late William G. Fargo, has been general superintendent of the American Express Company for some years, and is looked upon as one of the ablest expressmen in the country.

John F. Moody, Superintendent of the New York Division of the New York, New Haven and Hartford Railroad, requests of President Watrous the appointment of an assistant superintendent and a train dispatcher, owing to the great increase of the business of the company.

Poor's Railroad Manual mentions the fact that Horatio Allen, who ran the first locomotive ever used in the United States, is now living in New York, and says, it is only fifty-two years since this event took place, but the period covers a greater revolution than any former epoch of ten times its length in the history of the world.

J. H. Barrett, the newly appointed Superintendent of the Cincinnati, Hamilton and Dayton Railroad, was the recipient on Saturday night at his old home, Dennison, O., of a banquet and reception tendered him by the employes of the Pittsburgh, Cincinnati and St. Louis Railway, as a mark of their respect and esteem.

James F. D. Lanier, one of the founders of the banking house of Winslow, Lanier & Co., died at his residence in this city last Saturday in the 81st year of his age. He was also one of the founders and incorporators of the State Bank of Indiana, and later,

of the Third National Bank of New York. He retired from active business about ten years ago.

The fifty-fifth anniversary of the birth of John H. Starin was celebrated at Starinville, last Saturday, by the presentation of a bronze bust of himself by his employes from New York. About 1,000 persons were present. The presentation speech was made by J. R. Truax.

Kainz, the actor at the Bavarian Court Theatre in Munich, enjoys the friendship of King Ludwig II, and it is a friendship which he finds worth the having in more ways than one. He went recently to Vienna to visit his family, and rode alone in the King's magnificent saloon car, which had been placed at his disposal for a fortnight. Earlier in the season Kainz was the guest of the King at Linderdorf, and on his return to Munich was laden with presents of a choice and costly kind—a chased gold cup, two diamond set watches, a traveling alarm clock in lapis lazuli, diamond studs, and chalk drawings of scenes from the life of Tell.

Harvey B. Conway leading actor at the Haymarket Theatre, London, is staying at the Sturtevant House, for a few days. Mr. Conway is on a holiday trip to this country and yielding to the desire of his old friend J. S. Clarke has consented to perform at the Walnut Street Theatre Philadelphia, for a few nights. Thence he goes to Boston, Toronto and Montreal, whence he starts for home in time for the reopening of the Haymarket Theatre in November. It is to be regretted that the New York public will be deprived of the pleasure of witnessing Mr. Conway's performance on this occasion but it is to be hoped that he may arrange to appear here during his vacation trip next year.

A New Orleans paper has been at the trouble of making estimates concerning Jay Gould's ownership on railroads and other enterprises which are probably about as near accuracy as the average of the thousand and one estimates concerning this unfathomable man. It places his ownership in railroad mileage as follows.

Texas and Pacific	1,396
Missouri Pacific	3,952
Galveston, Houston and Henderson	50
East Line and Red River	124
Wabash, St. Louis and Pacific (including from Danville to Vincennes and Cairo)	2,746
Union Pacific system	3,446
Total Gould mileage	11,714

This does not include the Mexican, Oriental, Interoceanic and International Railway of 1200 miles which would increase the mileage of the Gould system to about 13,000 miles. Rating the capital of this road at $50,000,000, and adding $6,000,000 for the Western Union Telegraph, and we have the following as the money value represented by the enterprises which Mr. Gould controls:

Texas and Pacific	$69,200,000
Missouri Pacific	160,000,000
Galveston, Houston and Henderson	2,500,000
East Line and Red River	5,000,000
Wabash, St. Louis and Pacific	93,600,000
Union Pacific	180,000,000
Western Union Telegraph	86,200,000
Mexican, Oriental, etc., Railroad	50,000,000
Total	$646,500,000

Concerning how much of this is actually owned by Mr. Gould in person the paper in question does not attempt to estimate.

The San Francisco and Ocean Side Railroad has been surveyed from San Francisco to Santa Cruz, and ground was broken on the 30th ult. on the beach near Lake Merced. This road is the connecting link in the California Central Railroad line, which is projected to Utah, and thence to New Orleans.

Manufacturing.

The great destruction by fire of fencing, grass and hay stacks, bridges and even depots by locomotives, consequent on the long drought, has become alarming to railroad men. An improvement relating to causing locomotives and fire and portable and stationary engines to consume their own smoke consists in placing on top of the stack or chimney a valve or damper which can be sifted so as to open or close the entrance to the pipe which connects with the ash-pit, whereby the products of combustion can be turned directly into the pipe and be conveyed back into the furnace, or can be turned into the open air. Scientists claim that 50 per cent of the very best part of the fuel passes out of the stack in the present wasteful practice. This improvement further consists of extending the ash-pits in locomotives underneath their axles to the front of the boiler or a little beyond, with an adjustable valve in tha mouth of the same under the control of the engineer, and move the head light forward so as to permit a return flue from the top of the chimney to pass down and connect with the extended ash-pit. The damper on the top of the chimney being under the control of the engineer, is kept open when the engine is standing still, but when the engine is in motion the closing of the damper on the top of the chimney will cause the exhaust steam in the chimney to force the smoke, cinders, &c., down the return flue into the mouth of the extended ash-pit, whose adjustable valve will admit a blast of fresh air, consequent on the advancing train, and commingles with and forces the smoke, &c., back along the extended ash-pit and into the furnace, thus supplying the necessary oxygen mingled with the gasses of combustion to the fire, where they are consumed and constitute a great economy of fuel and safety from external fires, as well as comfort to passengers. Should it be desired to increase the amount of combustible matter, there may be introduced under or into the furnace, so as to mingle with the products of combustion, vaporized oils or similar substances, which can be vaporized by passing live or exhaust steam through the same, or fed into the furnace in any other suitable manner. This improvement is the invention of John McMurty, of Lexington, Ky.—[Pittsburgh Chronicle.

The London (Ont.) Free Press says Mr. Webb, of Crewe, has recently been directing his attention to the construction of Bessemer steel sleepers, which bid fair, from the result of their behavior in the road, to supply what is alone wanted to afford the necessary amount of strength, durability, and safety to the permanent substructure of the principal main lines of railroad in this country. Between the steel sleeper and the seats of the chairs is interposed a stout paper packing, the effect of which when the chairs rock up, besides contributiag to the elasticity of the substructure, effectually prevents any jar or noise.

The iron and steel works now being erected at Goshen, Rockbridge county, Va., on the Chesapeake and Ohio Road, it is said will be the largest in the South. The company, which is composed altogether of English capitalists, is styled the "Iron and Steel Works Association of Virginia." W. N. Page, of Virginia, is the superintendent of construction. The company has a capital stock of several million dollars. Two furnaces with capacity for a hundred tons a day each will be built, and also a large rolling mill and steel works.

It is said that a new locomorive, to be run with the Holland hydrogen fuel process will be tried in a few days on the Pennsylvania Railroad. The machine weighs 40,000 pounds, and its inventor promises to draw a full train at usual speed, from Jersey City to Philadelphia, at a cost of $1 for fuel.

Railroad Earnings.

Chicago and Grand Trunk, week ending Aug. 20, $32,920, corresponding week last year $36,351; aggregate increase for 7 weeks ending Aug. 20 over corresponding period last year, $8,301.

Indiana, Bloomington and Western, week ending Aug. 20, $30,156 95, corresponding period last year, $30,439 84.

St. Paul, Minneapolis and Manitoba, week ending Aug. 21, $91,645 87, corresponding week last year $50,355 50; from Jan. 1 to Aug. 21, $2,626,023 87; corresponding period last year $1,878,520 46.

Flint and Pere Marquette, week ending Aug. 21, $35,268 60; corresponding week last year $29,515 25; from Jan. 1 to Aug. 21, $1,142,670 80, corresponding period last year $942,999 60.

Organization.

The Mount Pleasant and Latrobe Railroad Company has been chartered at Harrisburg, Pa. The capital stock is $130,000. The road is to be built at once.

Articles of incorporation of American Palace Sleeping Car Company were filed at Albany, N. Y., on the 26th ult. The capital is $10,000,000. The incorporators of the company are Adam H. Ward, Aaron H. Cragan, Joseph H. Parsons, Horace E. Dillingham, Edward M. Clark, Frank W. Allen, and Isaiah E. Emery, of New York; Cornelius S. Bushnell, of New Haven, and Sheppard Homans, Englewood, N. J. The corporation is to continue 50 years.

Articles of incorrpoation were filed on the 22d ult. in the office of the Secretary of State of Wisconsin, of the Neillsville and Northwestern Railway Company, formed to build a line of railway from Neillsville, Clark County, to Wausau, Marathon County, Wis., with a branch to Merrill, Lincoln County. The capital stock is $1,300,000. The incorporators are: W. H. Uphan and L. A. Arnold, of Marshfield; John Ryngle, of Wausau; James Hewitt and R. J. MacBride, of Neillsville.

The Lehigh Construction Company has been organized with Senator G. A. Hobart, of Paterson, N. J., as President, H. R. Low Secretary, and Hon. A. S. Hewitt Treasurer. The company has bought 4,000 acres of Lehigh coal fields and mines near the line of the Philadelphia and Reading Railroad, formerly held by the Alliance Coal Company. The capital stock of the company is $1,400,000. Besides those named as officers, S. J. Tilden, Peter Cooper, Judge Lathrop, John I. Blair and other well-known gentlemen are stockholders and directors.

The Point Pleasant and Ohio River Railway Company was incorporated at Wheeling, W. Va., on the 22d ult. This road is to commence on the boundary line between Ohio and West Virginia, where the Pomeroy and Ohio River Railroad strikes that line, and run thence to a point at or near Point Pleasant The capital stock is $500,000, divided into 5,000 shares. The incorporators are: George I. Seney, of New York; Samuel Thomas, of Columbus; A. N. Dennison, of Columbus; C. S. Brice and Charles N. Lamison, of Lima, Ohio, and Samuel Shelton, of New York.

Articles of incorporation of the Gulf and East Texas Railroad Company were filed in the office of the Secretary of State of Texas on the 24th ult. The proposed line of road will commence at Bolivar Point, in Galveston County, and extend to a point in Jeffer-

son County at or near the town of Beaumont, with a branch to Sabine Pass. The principal office of the company will be in the town of Beaumont. The capital stock of the company is placed at $2,000,000, divided into 20,000 shares of $100 each. The following are the incorporators: E. P. Hill, Samuel M. McAshan, T. W. House, Henry Fox, P. B. Watson, J. C. Zimmer, I. G. Owen, C. A. Burton, W. B. Baker and W. M. Shaw, of Houston, Tex.

Articles of association of the Creve Cœur Lake Extension Railroad Company of St. Louis have been filed with the Secretary of State of Missouri. Capital, $350,000; length of road, 15 miles, running from a point at or near large Creve Cœur lake, in St. Louis county, to a point on or near the western line of said county, and at or near such point on the Missouri river, as may be suitable for the establishment of a ferry, with the right to extend said railroad into Franklin county, so as to connect with other and existing railroads and thence into other counties. Incorporators Edward A. Shedd, Chas. B. Shedd, John S. Field, of Chicago; Horace A. Stephens, Frances E. Stephens, Augustus B. Corey of St. Louis.

At a meeting of the Illinois and Mississippi River and Canal Improvement Commission, held in Chicago on the 25th ult., the following officers were chosen for the ensuing year: President, J. A. Allen, Geneseo; secretary Edward Russell, Davenport; treasurer, T. J. Robinson, Rock Island. A committee consisting of S. M. Clark, Keokuk; Chas. Randolph, Chicago; S. C. Hastings, San Francisco; J. H. Foster, Oshkosh, and Peyton Ranney, Kalamazoo, was appointed to prepare a memorial to congress in behalf of the construction of a canal westward from Hennepin to the Mississippi river on the best practicable route, said canal to be for commercial purposes, and not to exceed seven feet in depth. A resolution was unanimously adopted expressing hearty sympathy with the objects of the St. Louis improvement convention, which meets on the 26th of October.

Articles of incorporation of the Houston, Shreveport and Chesepeake Railroad were filed in the office of the Secretary of State of Texas on the 24th ult. The proposed line commences at or near the town of Liberty, passing as nearly as is practicable on a direct line through the counties of Liberty, Harden, Polk, Tyler, Jasper, Angelina, San Augustine, Sabine, Shelby and Panola to a point on the Louisiana line. The capital stock is placed at $5,000.000, divided into 50,000 shares of $100 each. The association is composed of the following named persons: Isaac E. Gates, of Elizabeth, N. J.; Edward H. Pardee and Wm. C. Emery, of New York City; Jas. B. Hawes, of Tarrytown, N. Y.; Asa M. Hawley, of Hawleyville, Conn.; Jos. P. Loyd, East Orange, N. J.; E. P. Hill, J. F. Crosby, C. A. Burton and P. B. Watson, of Houston, Tex. The road will be operated in conjunction with and be controlled by the California Pacific syndicate.

At a meeting of the stockholders of the Atlantic and Northwestern Railway Company, held in Montreal on the 30th ult., the following named gentlemen were elected directors: George Stephen, president, and Duncan McIntyre, vice-president of the Canada Pacific; Bradley Barlow, president of the Southeastern; Peter Mitchell, ex-Minister of Marine and Fisheries; Senator Thibeaudeau; J. J. C. Abbott, M. P.; C. C. Colby, M. P.; A. B. Chaffee, director of the Southeastern, and Robert J. Kimball of New York. The directors were instructed to take immediate steps for the survey, location and construction of a bridge over the St. Lawrence, near Montreal, and a road westward from the bridge to form a connection with the Canada Pacific Railway, and eastward to form connection with the present system of railways south and east of the St. Lawrence River, as they may deem expedient. This new enterprise was incorporated by the Dominion Parliament in 1879, and authority was given under the act to construct a line of railway from the Bay of Fundy to Lake Superior via Montreal, and to build branches necessary to connect with railways in the United States or Canada. The company has full powers to build a bridge over the St. Lawrence anywhere between the present Victoria Bridge and Lachine. The capital is ten millions. The company is authorized to issue mortgage bonds to the extent of $20,000 per mile upon the entire length of the railway.

Railroad Law.

COMMON CARRIER—BILL OF LADING—CONTRACT LIMITING LIABILITY.

Plaintiff shipped five valuable race-horses, some saddles, etc., on a car of defendant, the Pennsylvania Railroad company, for transportation from Jersey city, New Jersey, to St. Louis, Missouri. The bill of lading received by him contained the following printed condition, viz: "That the carrier assumes a liability on the stock to the extent of the following agreed valuation: If horses * * * not exceeding $200 each; * * * if a chartered car, on the stock and contents in same, not exceeding $1,200 for the car load."

The bill of lading was signed by both plaintiff and defendant. The horses were not shipped in a chartered car. Through defendant's gross negligence, one of the horses, alleged to have been of the value of $15,000, was killed, the others injured, and the saddles, etc., lost while being transported to their destination. This suit was brought to recover $25,000 damages from defendant, alleged to have been suffered by plaintiff in the manner above stated. The question was, whether or not the plaintiff should be limited by said condition in the bill of lading, and the agreement therein as to the value of the horses. The case was tried before a jury. The defendant objected, upon the trial, to the introduction of any testimony tending to show that the horses were worth more than $200 each.

Judge McCrary, in sustaining the objection, said, that even if the shipper and the railroad company enter into an agreement that the company shall not be liable for its own negligence in so many words, that it would be void, and no court would enforce it. But that it is competent for a shipper, by entering into a written contract to stipulate the value of his property, and thereby limit the amount of his recovery in case it is lost, and so instructed the jury. Plaintiff and defendant agreed that $1,100, was all that the plaintiff was entitled to, under the the charge of the court, and a verdict was rendered accordingly. Hart vs. Pennsylvania Railroad Company. United States Circuit Court, Eastern District, Missouri, April 6, 1881.

ASSAULT AND BATTERY—RIGHT OF PASSENGER TO REMAIN IN RAILROAD STATION.

McKay was convicted of assault and battery on Cooley, at a railway station. McKay was station keeper, and the assault originated in an altercation between them caused by Cooley's spitting on the floor. The defendant made a somewhat violent assault, and subsequently called in another servant of the company who compelled Cooley to leave the room, which he had refused to do at the demand of McKay. Cooley was a passenger on a train stopping temporarily at the station. The court charged the jury that if Cooley violated any rule made either by the company or the agent which had been brought home to his knowledge, the respondent had a right to require him to leave the waiting room, and to remove him by such force as was necessary. Held, that this charge was quite strong enough in favor of respondent. It is absurd to claim that the travelling community are bound to govern their behavior by the whims of an obstinate station house keeper, or to leave the room whenever he thinks proper to drive them out. They are invited by the railroad company, and are entitled to remain there so long as they have occasion to do so, and commit no offense against the good order of the place and the reasonable regulations made to govern it. Michigan Supreme Court, June 23, 1881. People of Michigan vs. McKay. Opinion by Campbell, J.

Canadian Pacific Railway.

Gen. Rosser, Chief Engineer of the Canadian Pacific Railway, who has just returned to Winnipeg, Manitoba, from a visit to the end of the survey, reports that the air line between Winnipeg and Portage La Prairie is all under control, and that it will be open for traffic by the 1st of October. West of Portage La Prairie rails have been laid for two miles beyond Pine Creek, and continue to be laid at the rate of a mile and a half a day. The grading on the line has been finished to Brandon and for four miles beyond that point. Piles are being delivered on the banks of the Assiniboine river at Brandon, and pile driving for the new bridge will be begun immediately. The structure will be completed in time for traffic to open to Brandon on October 1st. Contractors are at work over the entire main line, and the projected branches within the province, and for twenty miles into the northwest territories. General Rosser went as far West as Weed Hills, at which point the line has been located by Mr. Brereton. At that place that engineer connects with Mr. Barclay, who has located the line still further West to Old Wive's Lake, crossing the Qu' Appelle at Moose Jaw Creek. General Rosser also reports that Major Rogers has completed his reconnoissance of the Rocky Mountains, and that he has effected a junction with the survey parties under Mr. Hynham at Old Bow Fort, beyond Fort Col. Garry. Mr. Rogers will here direct the men to make instrumental surveys of the passes he has reconnoitred. He is very sanguine of ultimate success.

At a meeting of the committee of the stock and bond holders of the Marietta and Cincinnati Railroad Company, held at the offices of Field, Dorsheimer, Bacon & Deyo, on the 30th ult., the committee was permanently organized by electing Augustus Kountze, President, and Macgrane Coxe, Secretary. Resolutions were passed directing counsel to take immediate steps to bring the foreclosure proceedings to a speedy determination, and also to apply for the appointment of a Receiver in the place of Mr. King, who is shortly to resign.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 20, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1881.	1880.
Reading Railroad, ..	168,880	5,347,535	4,587,980
Schuylkill Canal	16,829	835,609	258,654
Lehigh Valley	110,732	3,928,071	2,992,174
Del., Lack. & Western	91,098	2 492,948	2,015,318
Shamokin Valley	24,143	669,532	503,711
Central New Jersey.	100,003	2,641,111	2,083,400
United R. R. of New Jersey..	26,529	950,353	657,847
Pennsylvania Coal ..	36,387	812,941	617,187
Delaware and Hudson	86,180	2,179,835	1,767,850
Huntingdon & Broad Top Mt.....	10,024	323,082	286 141
Penn. and New York.	30,246	1,031,988	763,810
Clearfield, Pa..	50,117	1,524,330	965,261

The total tonnage of anthracite coal from all the regions for the week ending August 20, as reported by the several carrying companies, amounted to 604,376 tons, against 424,387 tons in the corresponding week last year, an increase of 179,989 tons. The total amount of anthracite mined for the year is 16,881,089 tons, against 13,253,452 tons for the same period last year, an increase of 3,627,617 tons. The quantity of bituminous coal sent to market for the week amounted to 95,575 tons, against 84,033 tons in corresponding week last year, an increase of 11,542 tons. The total amount of bituminous mined for the year is 8,042,846 tons, against 2,587,769 tons for the corresponding period last year an increase of 455,077 tons. The total tonnage of all kinds of coal for the week is 699,951 tons, against 508,420 tons in corresponding week last year, an increase of 191,531 tons, and the total tonnage for the coal year is 19,923,915 tons, against 15,841,221 tons to same date last year, an increase of 4,082,694 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending August 20 was 181,215 tons, of which 139,381 tons were coal and 41,834 tons coke. The total tonnage for the year thus far has been 5,666,451 tons, of which 4,107,093 tons were coal and 1,559,358 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 20 were 44,154 tons, and for the year to that date 1,279,250 tons, a decrease of 26,036 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows : Baltimore and Ohio Railroad—week 25,252 tons ; year, 828,252 tons ; increase as compared with 1880, 141 tons ; Chesapeake and Ohio Canal—week, 12,886 tons; year, 285,019 tons ; decrease as compared with last year, 46,504 tons. Pennsylvania Railroad—week, 5,123 tons ; year, 165,275 tons ; increase compared wi h 1880, 19,623 tons. The coal was brought from the mines as follows : Cumberland and Pennsylvania Railroad—week, 34,732 tons; year, 1,160,144 tons. George's Creek and Cumberland Railroad—week, 7,782 tons ; year, 74,786 tons ; Baltimore and Ohio Railroad—week, 1,460 tons; year, 41,167 tons. The Reading Railroad tonnage for last week ending August 27, was 188,000 tons, of which 40,500 tons were sent to and 54,900 tons shipped from Port Richmond, and 18,000 tons sent to and 16,500 tons shipped from E izabethport.—[Phila. Ledger, Aug. 29.

The report of the directors of the Buffalo and Lake Huron Railway company for the half year ending 30th June, 1881, states that the balance of revenue, including the balance from the previous half year, after providing for the payment of interest on the bonded debt, is £14,410, which will allow of a dividend of 5s. 8d. per share of £10, less income tax, carrying to the next account £625. The bond account remains as previously stated.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Aug. 30, 1881.

There has been no change in the market since our last report. Stocks in hands of makers and consumers are light. The immense consumption noted in our previous reports continues and the reports from all points are very favorable. Furnaces as a rule feel confident of higher prices and are declining to sell for future delivery longer than 2 or 3 months ahead at present prices.

FOUNDRY.

	No.		Mor.
Hanging Rock Charcoal	1	26 00@27 00	4
Strong Nutral Coke	1	22 50@23 50	4
American Scotch	1	20 00@21 50	4

Lake Superior 3 to 6		34 00@36 00	4
Southern Car Wheel		34 00@35 00	4

A mortgage for $5,500,000, given by the New York, Susquehanna and Western Railway Company to the Central Trust Co. of New York was recently recorded in the Bergen County Clerk's office, at Hackensack, N. J. It embraces all the franchises of the old New Jersey Midland Railroad, the Paterson Extension, Midland Connecting Railroad, North Jersey Railroad, Delaware Water Gap Railroad, and the Pennsylvania Midland Railroad. The mortgage recently filed in Albany, N. Y., of the New York, West Shore and Buffalo Railroad company for $50,000,000 to the United States Trust Company has also been filed in the Bergen County Clerk's office.

The Soyran and Orenberg Railway, bridge across the river Volga, in Russia, just finished, cost $8,000,000. Where the bridge is built the river is more than a mile wide. The fourteen piers which support the girders are 100 feet above the mean level of the water, and the girders 364 feet long and 30 feet wide.

The Mexican government has paid the Palmer Sullivan Company $96,000, the first installment of the subsidy for completing the first section of the Zacatecas division of their railway. They get $8,000 a mile on this division and $11,000 on the Matamoras branch.

The Proliminary Survey for the Morrisburg and Ottawa Railway is about half-completed, Metcalfe village having been reached. The route so far is very feasible and a line can be readily and cheaply built.

The Canada Atlantic Railway is completed from Coteau to Alexandria village, and the number of men employed on the other portion of the line is being increased as rapidly as possible.

The gross earnings of the Philadelphia and Erie Railroad for the month of July, 1881, were $291,669 47, the gross expenses $219,070 63, and the net earnings, $72,598 84.

Philadelphia Stock Exchange.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, Sept. 1, 1881.

In the morning 5@6 per cent was the ruling rate for call loans and prime mercantile paper; in the afternoon the quotation was 6 per cent, plus a commission of 1 64 of 1 per cent a day; and in the last hour the rate fell to 3 per cent.

The posted rates for prime bankers' sterling were 4.80½@4 84. The actual rates were 4.79 to 4.79¾@4.82¾ to 4.83¼. Cable transfers were 4.83¼@½ and prime commercial bills, 4.77½@¾. The actual rates for continental exchange are as follows: francs, 5.25⅛@⅜ and 5.33⅛@¾; marks, 93⅜@⅞ and 94⅜; and guilders, 39⅝@¾ and 39⅞@15 16.

The public debt, during the month of August, has been decreased $14,181,221.

The Treasury disbursements for August, exclusive of interest or principal on the public debt, were $18,105,414.

To-day, September 1, the quarterly interest on the United States 4½ per cent funded loan is payable at all the United States Sub-Treasuries. The entire amount on which 1⅛ per cent quarterly interest is payable is $250,000,000.

United States registered 5 per cents, "called" and due October 1, will be anticipated and paid on presentation with interest to that date. This will be the final settlement of the refunding operations. The call of the coupon Fives matured August 12

Of the $2 896,000 Marquette, Houghton and Ontonagon consolidated mortgage sixes, due 1908, $1,750,000 have been drawn by lot, and the principal will be paid September 1 in this city

after which interest will cease. The coupons due September 1 are payable at the New England Trust Company, Boston. This will leave $646,000 of these bonds outstanding.

United States pensions, both for soldiers and sailors, are paid quarterly on the 4th days of March, June, September and December.

The Wabash, St. Louis and Pacific Railroad Company notified the Stock Exchange on the 29th ult. that at the expiration of thirty days they would issue 5,632 shares common and 5,632 shares preferred stock to cover the Toledo, Butler and St. Louis Railroad consolidation.

The capital stock of the Pittsburgh, McKeesport and Youghiogheny Railroad Company has been fixed at $3,000,000.

The capital stock of the Sabine and Western (Texas) Railway Company has been increased to $3,000,000. It has also been decided to bond and mortgage the road.

The Canadian Pacific Railway directors have arranged with a syndicate of Montreal and New York bankers to float $10,000,000 of bonds secured in their land grant in the Northwest. The bonds will bear 5 per cent interest, and the syndicate has purchased them at 92½. The Bank of Montreal has $2,500,000.

The Evansville and Terre Haute Railroad has been bonded to the Farmers' Loan and Trust Company, of New York, and Joseph Collett, of Terre Haute, to the amount of $3,500,000.

The net revenue of the Grand Trunk Railway Company of Canada for the past half year will admit of the payment of the Second Preference in full, viz: 5 per cent per annum, leaving $40,000 to be carried forward. This compares with 3 per cent per annum, with $43,000 carried forward the last year.

At a meeting of the directors of the Canada Pacific Railway Company, held in Montreal on the 30th ult., George Stephen, President, in the chair, contracts for the sale of twenty millions of the company's 5 per cent land grant gold bonds were executed and the board authorized the President and Secretary to execute a mortgage as authorized at the shareholders meeting held on the 19th of July. The mortgage securing the bonds is made in favor of Sir Alexander Campbell, C. B., K. C. M. G.; Alexander McKenzie, M. P., late Premier of the Dominion, and Samuel Thorne, of New York, as trustees.

Horace Porter, President of the New York, West Shore and Buffalo Railroad Company, says that 200 miles of the road are under contract between New York and Buffalo, and that that part of the line will be done in eighteen months. The highest grade will be twenty feet to the mile going east, and not more than thirty going west. The company owns one and three-quarter miles of water front at Weehawken, opposite Twenty-third street ferry, New York.

There are now five corps of engineers locating the Macon and Brunswick Railroad between Atlanta and Macon, and it is expected that in the course of a few weeks the whole line will be ready for the contractors. Several parties are at work on parts of the line already located, not less than 2,000 hands being in the employ of the company.

American Exports and Imports.

The Chief of the Bureau of Statistics, in his first monthly statement for the current fiscal year of the imports and exports of the United States, reports that the excess of exports of merchandise was as follows: Month ended July 31, 1881, $10,699,460; month ended July 31, 1880, $13,710,587; 7 months ended July 31, 1881, $108,689,426; 7 months ended July 31, 1880, $44,874,081; 12 months ended July 31, 1881, $256,691,591; 12 months ended July 31, 1880, $171,750,150. The excess of exports or of imports of gold and silver coin and bullion was as follows: Month ended July 31, 1881, excess of exports, $177,222; month ended July 31, 1880, excess of imports, $824,451; 7 months ended July 31, 1881, excess of imports, $22,633,432; 7 months ended July 31, 1880, excess of imports, $1,196,277; 12 months ended July 31, 1881, excess of imports, $90,666,977; 12 months ended July 31, 1880, excess of imports, $76,156,569. The total values of the imports of merchandise during the 12 months ended July 31, 1881, were $683,972,221, and during the previous 12 months, $637,724,475. The total value of exports of merchandise for the 12 months ended July 31, 1881, were $855,722,871, and for the 12 months ended July 31, 1880, $894,416,066.

Negotiations are now pending for the ratification of a contract under which the Detroit, Hillsdale and Southwestern Railroad will hereafter be operated by the Lake Shore and Michigan Southern Railway Company. The length of the Detroit, Hillsdale and Southwestern road is sixty-four miles. It was organized in July, 1871, as the Detroit, Hillsdale and Indiana Railroad, sold under foreclosure December 28, 1874, and reorganized under the present title January 30, 1875. The road was bought by the first mortgage bondholders for $16,000 over the mortgage of $1,152,000.

The contract for the construction of the extension of the Pittsburg and Western Railroad has been awarded to Col. Thomas P. Simpson of New York. The road commences at Allegheny City, Pa., and now ends at the mouth of Slippery Rock in that State. From Slippery Rock Col. Simpson will build the road down the Conneconnessing Creek, from thence to New Castle, Pa., and to Youngstown, Ohio, a distance of forty miles. The present line from Allegheny City to mouth of Slippery Rock is narrow gauge, but will be immediately widened to a standard gauge.

It is stated that the new Welland Canal will be partially open next week. It is not thought however, that the canal will be completed till the season of 1882, when a full tide of traffic may be expected to pass down it.

The grading on the Homestake and Custer Railroad has been completed to California Gulch, a distance of about ten miles, and about one mile of track has been laid.

It is officially reported that 75 miles of the Central railroad of Mexico have been completed, and that 14,000 men are employed in the work of constructing the road. Nearly 9,000 men are employed on the Tehauntepec road, 11 miles of which have been completed.

Northern Central Railway.

The gross earnings, operating expenses and net earnings of the Northern Central Railway for the months of July, 1881 and 1880, was as follows:

	1881.	1880.
Gross earnings	$440,811 45	$450,297 71
Operating expenses	377,548 39	288,774 15
Net earnings	$63,263 06	$161,523 56

—showing a decrease in earnings of $9,486 26, with an increase in expenses of $88,774 24, making a decrease in the net earnings of $98,260 50.

For the seven months ending July 31, the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings	$3 102 679 42	$2,666,088 78
Operating expenses	1,998,954 76	1 815,849 83
Net earnings	$1,103,724 66	$850,238 90

—showing an increase in gross earnings of $436,590 69, with an increase in expenses of $183,104 93, making the increase in net earnings $253,485 76.

Contractor Ryan, who is grading the Philadelphia, Marlton and Medford Railroad, states that he will complete the work on Monday next, and that the rails are to be laid by the 1st proximo. This will complete the road to Medford, that portion between Haddonfield and Marlton having been in use for some weeks.

The survey of the Pennsylvania and Martins Creek Railroad has been completed and the work of construction commenced. A conference has been had with the officials of the Belvidere Delaware branch of the Pennsylvania, for the purpose of locating the connections with that road.

The contract for grading the first fifteen miles southwest from Springfield, Mo., on the Kansas City, Springfield and Memphis Railroad has been awarded, and fifty miles more will be let this week. The object of letting in sections is to expedite the completion of the road.

The engineer corps of the Pittsburgh Southern Railroad have located two tunnels between Library and Pittsburgh, to avoid the long curves and steep grades and shorten the road at least three miles.

The railroad through the Stony Clove, in the Catskills, is completed for a distance of nine miles from Phœnicia. It "climbs" the mountains, rising 1,300 feet in 11 miles, 185 feet to the mile being the heaviest grade.

If the season is favorable the Burlington, Cedar Rapids and Northern Railroad will reach Estherville, in Emmet County, Ia., October 15, and Spirit Lake, in Dickinson County, November 18.

The end of the track on the Rio Grande Division of the Texas and Pacific Railway is now 405 miles west of Fort Worth, Texas.

The Cairo Extension of the Mobile and Ohio Railroad will be opened early in September.

WESTERN GRAIN CROP REPORTS.

The Ohio State Board of Agriculture, having adopted original and thoroughly systematic measures for obtaining information in detail concerning the grain yield of that State, have just issued a report for August on the condition of the crops, which is of great interest and value on account of its authenticity. It gives the following as the real condition of that section in regard to grain so far as could be determined, August 20th, the day on which the returns from the threshers were condensed and summarized:

"In Ohio, we have, by our present estimate, in round numbers, 38 million bushels of wheat. This should be compared with our estimate for 1880, viz: 52½ millions, and not with that of the National Department, 37¾ millions, or with that of the Ohio Secretary of State, viz: 48½ millions. The latter is of course more minute and careful than ours, but always allows more or less (in the minds of the farmers, who report to the tax assessors in May of the following year) for "seed and bread." So that, taking this into the account, it is really in most exact harmony with our estimate, made and published the previous fall, immediately after harvest. This gives the actual yield of Ohio this year, as only 72 per cent of the crop of 1880. Now how does such a shortage affect the amount to be sold.

"Take the two States of Ohio and Illinois, which will fairly represent the condition of the Western wheat States, Ohio being above, and Illinois below the average. Secretary Fisher's latest report is for 22,000,000 bushels from Illinois. Remember, now, that four bushels for each inhabitant is required for seed and consumption, and we have

For 1880.

States.	Total spring and winter wheat.	Required for home use.	Surplus for sale.
Illinois	54,000,000	12,000,000	42,000,000
Ohio	52,500,000	12,000,000	40,500,000
Total surplus			82,500,000

For 1881.

Illinois	22,000,000	12,000,000	10,000
Ohio	38,000,000	12,000,000	26,000
Total surplus			36,000

"In other words, we have a good deal less than half as much wheat to spare from these two States as we had last year. And the same is probably true for the whole "winter wheat belt" of the country. It is known, too, that the spring wheat crop will also be somewhat short, and that the foreign demand will probably be fairly an average one. The reports about Russia's having such immense crops, that "the farmers think they could dispense with harvests for four years to come," have an exaggerated and suspicious air that give them entire discredit. And the effect on the foreign demand is not deemed to be alarming, when it is remembered that for three years past, the surplus of Russia has not been equal to the deficiency in France alone.

"And so it is plain that the advance in prices of wheat though largely speculative in its suddeness and feverishness, is legitimately based on a knowledge of the real facts, and is likely to be permanent even at a higher figure than $1 35. Money is plenty and seeking investment. Crops are short, business is active, and general prices are advancing. And if any one has a right to take the advantage of this firmness of price in wheat, it is the men who have spent the whole year in raising the crop and who have a greatly diminished number of bushels to sell. And so the opinion of our July report is still held, that it will be wise not to sell till the wheat is sweated and fairly ready for market, and the market has found its level as determined by actual threshers' yields for the whole West, including the northern spring wheat belt.

"One fact is worthy of notice. Our May estimate on wheat was that the total yield would be 85 per cent of the crop of 1880; the July estimate was 77 per cent; the August estimate from three weeks' actual threshing is 72 per cent, and it seems to be generally believed that even this is too high, and that the full threshing will not show over 66 per cent. The crop has gone back slightly ever since May 1. Drought, Hessian fly, and extreme heat were the main causes. The heads did not fill so well as was expected for a moderately thin stand.

"The figures show (with average weather till September 5) probabilities for 74 million bushels corn against 105 millions in 1881, or 70 per cent. In some sections the crop is nearly a failure, but in most of the heavy corn counties the yield is likely to be fair. The corn prospect, therefore, in Ohio, is not alarming—[N. B. Since our correspondent reported, however, a very severe drought has begun, and if rain does not come soon the yield will quite likely be reduced to 50 per cent. Oats are not a crop of heavy sale or of special export importance in this State. In most counties they are better than a year ago; in a few not so good. The average is 107 per cent as compared with 1880, or a total of 22½ millions against 21 millions in 1880."

A NEW MOTOR FOR STREET RAILROADS.

It is a question difficult to answer, why steam has not come into general use as a substitute for horse power on street railways. We are of the number who have looked to steam as the way of effectual deliverance for the over-worked horses. Nor do we yet give up this hope; but, in the meantime, regulation by law of the number of passengers to a horse, which a company may carry in its cars must be demanded. The newspapers are telling us now, however, of an experiment of great promise at Berlin with electricity. "A single car is propelled by the current at an average speed of nine miles an hour, though this rate can be doubled if necessary." The electric railway at Berlin is about a mile and a half long. No difficulty has been experienced in using one rail as the positive and the other as the negative conductor. The car is constructed to hold twenty persons, the dynamo machine being placed underneath the car. "Over any other system," says Harper's Weekly, "worked by steam or compressed air, the electrical has the advantage that no heavy machinery has to be carried about to set the train in motion. The carriages can, therefore, be built in a lighter manner, thus reducing the power necessary to move them, and permitting all bridges and other superstructures to be

built more cheaply than usual. Several carriages, each with a dynamo machine, can be joined to one train, and by this distribution of motive power much steeper inclines can be overcome than when the same train is drawn by a single locomotive."—[Our Dumb Animals.

A Russian's Views of Railways.

Mr. William Robert Ebell, a Russian gentleman of broad education and close observation, is stopping in the city for a few days. To a reporter of the Times, who made some inquiries concerning the railroad system in Russia, he gave most comprehensive answers:

"How extensive is the railway system of Russia?"

"There is spread over Russia a net of railways of nearly 10,000 English miles. The different roads are the Nicolai, from St. Petersburg to Moscow, 300 miles; St. Petersburg and Warsaw, 600; Moscow and Nishnivogorod, 200; Baltic, 300; Riga and Dunaburg, 100; Volga and Don, 40; Moscow and Rjazan, 120; Kosloff and Voronesh, 80; Voronesh and Kosloff, 300; Kosloff-Voronesh and Rostoff, 400; Dunaburg and Vitebsk, 120; Rjazan and Kosloff, 100; Warsaw and Terespol, 100; Moscow and Kursk, 250; Rjebsk and Morshansk, 260; Orel and Grazz, 140; Shuja and Ivanova, 80; Orel and Vitebsk, 250; Kursk and Kieff, 220; Mitau, 60; Kyrsk, Charkoff and Azoff, 400; Grjazi and Zarizin, 300; Tamboff and Saaratoff, 200; Moscow and Brest, 500; Poti and Vifis, 140; Liban, 240; Riga and Bolderaa, 10; Warsaw and Bromberg, 60; Lodz, 15; Iaroslaw and Vologda, 90; Rjask and Vjasma, 40; Odessa, 500; Charkoff and Nicolajeff, 300; Kijeff and Brest, 400; Landwaroos and Rombj, 220; Lozovo and Sevastopol, 100; Brest and Grajewas, 100; Zarskoje Sselo, 15; Tamboff and Kosloff, 35; Novotorgok, 15; Rybinsk and Bologgoje, 140; Konstantin, 40; Warsaw and Wien, 160; Livno, 30; Rostoff and Vladikafkas, 350; Morshansk and Sizran, 250; Borovitchi, 15; Fastoff, 100; Orenburg, 300; Schtja and Ivanova, 30; Livni, 50; Lodz, 20. The government railways of Finland are: The St. Petersburg and Helsingfors, 200 miles. It has three branches, viz: Hango and Hyvinge, 80 miles; Richimakka and Tammerfors, 60; Riebimakka and Abo, 100. Then there are the Kervo and Borga, of 15 miles, and the Sestrorezk and Walkeasari, of 4 miles, making in Finland in all 459 miles of railway, and in Russia, 9,165 miles."

"At what time was the first railway built in Russia?"

"The first railway for passenger and freight traffic opened in Russia was the Nicolai, so called after Nicholas I. It was in November, 1851, and in January, 1857, a law was passed which authorized the building of a system of railways in the empire. In 1865 there was created a board of land and water communication, which had control of all matters pertaining to internal transportation. All railway building is carried on under and by approval of this board. A project for a new road has to be indorsed by this board, and then the emperor writes the word 'Utvershdaja' (I grant it), and signs his name. Then a statute is framed and promulgated, and from this time the limited company can issue stock and place it on the market. The material for constructing a road being contracted for, the grading is then let in sections of ten versts, or five miles, each. The contractors have their agents in the country and engage the peasants to do the work. The wages range from ten to twenty copeuns a day, five to ten cents, and even then these poor fellows are often cheated out of their small wages by rascally sub-contractors. Not infrequently these men have to deposit their passports with the contractors to get a small advance to leave with their families, and, no matter how great may be their dissatisfaction, they have to continue at work during the sweet will of the grasping boss. While these peasants are away at work on the railroads their wives and children do the farm work at home."

"What is the cost per mile of building a railroad in Russia?"

"Thirty-five Russian miles, or about 165 English miles of the Richimakka Travasthehus Finnish railway have cost $7,000,000, or $42,424 per English mile. The Russian railways cost nearly three times as much, yet could be built for the same price as Finnish. It costs to build and equip a road from 20,000 to 70,000 rubles. The government railways in Finland did not cost over 30,000 rubles per mile, and almost any of the roads could be built for about that sum; but there is so much dishonesty and extravagance connected with the whole system that the legitimate cost is just about doubled. When a railway is completed the governmental guarantee is attached to the bonds of the company, and they are sold in the foreign markets. The guarantee means that the government shall make good the interest on these bonds every year, should the road fail to pay it."

"How are the railway operatives and employes paid for their services there?"

"The officers of a railway are generally an inspector from the land and water board, the president of the company, and from three to five directors and several smaller officials, each drawing a salary of from 15,000 to 30,000 rubles a year. The next person in importance is the secretary, who is paid from 1,500 to 6,000 rubles a year. The book-keepers and other employes receive from 300 to 1,000 rubles each year, and work from 9 o'clock in the morning until 4 or 6 in the afternoon. The superintendence of the line is in the hands of an engineer, who is the chief manager and acts for the board of directors. He has a salary of from 6,000 to 10,000 rubles a year, and he is commonly the engineer who has built the railway. Station inspectors and their clerks have salaries ranging from 600 to 1,000 rubles a year. The salaries of chief conductors and conductors range from 300 to 1 000 rubles a year, and those of the small employes from 100 to 300 rubles a year; on Finnish railways the pay of conductors and small employes range from 1,000 to 3,000 marks, a mark being 25 copecks in gold or silver."

"What system of ticket is in vogue on the Russian railroads?"

"Through tickets for long distances, extending over several lines of railways are unknown in Russia. Each road sells its own tickets over its own line, and there the matter rests. The through-ticket system, as in the rest of Europe and in this country, would be a great help to the Russian people and largely increase travel on the railways of the country. There is only one or two railways which make through rates in freight beyond the empire. All the Russian railways are divided into groups, and the railways belonging to one group must give free passes to members of the board of management of the other groups—and thus you can see a Russian priest, traveling with wife and children on passes issued to members of the board of directors, which he obtained through friends, be they directors or conductors."—[Chicago Times.

Articles of consolidation of the Evansville, Seymour, and Bellefontaine and the Bellefontaine, Troy and Indiana Railway companies, under the name of the Evansville, Seymour and Bellefontaine Railway Company, have been filed in Indianapolis, Ind. The line will run from Evansville to Bellefontaine. Capital, $6,000,000.

The first narrow gauge car completed in the shops of the New York, Lake Erie and Western Railroad made a trial trip to Paterson on the 1st inst. It is a smoking and baggage car, finished in light woods with very high roof and abundant ventilation. It is one of the handsomest passenger cars on the road. It is to be followed by a number of ladies' cars of a still handsomer description. With the lighter cars the company expects to shorten its running time materially.

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of August, were:

ENTERED FOR CONSUMPTION.

New York, Saturday, September 10, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

A PLAN originated in New Orleans by Dr. S. S. Herrick, of the board of health of that city, for establishing a railroad sanitary service has attracted considerable attention, and has been received with favor by the managers of three of the leading railroad lines terminating in the Crescent City, as doubtless it will also be received by other railroad men with some modifications and alterations. In brief the plan proposes a system of medical service for attendance upon those injured in railroad travel and work, for the inspection of the sanitary conditions of depots, rolling stock, etc., for the physical examination and care of employes, for guarding against improper treatment of live stock in transit, and the danger of infectious diseases and for representing the railroad company in sanitary and quarantine consultations wherever its interests may be concerned. Some of the features of the plan, being managed by a company, would be of the nature of insurance, and if a further development of the scheme, which is rather crude in form as yet, should show as fair a proportion of good points as a hasty glance shows now, there would seem at least to be something in it worthy of consideration.

CONCERNING the care of live stock in transit, the Springfield Republican, which represents the most substantial and enterprising New England element, and is situated on the line of a great cattle carrying road, where near the end of their long journeys the suffering of the animals is notoriously apparent, and has attracted a great deal of public attention, in an editorial directly to the point says: "The fit carriage of live stock on long railroad journeys is at present an unsolved problem. There is no doubt that under the existing system cattle are seriously injured to the loss of the western producer, the risk of the eastern consumer, and the serious danger of diminishing our foreign export, which turns on the delivery of sound meat abroad. Congress has interfered in railway management at this point, the only place where it has interfered, and seven years ago passed an act requiring cattle to be fed and watered once in 24 hours; but the act has remained nearly a dead letter because of the practical difficulty of carrying out its provisions. The cattle cannot be unloaded, and each of the patents for baiting cattle on the cars, of which there are scores, involves more or less expensive changes in rolling stock, all out of the question in a traffic whose profit turns on close management. The Humane Live Stock Express Company of New York City proposes to solve the problem by erecting feeding stations from which cattle in cars will be fed by buckets supplied by a hollow pipe, and inserted in the cars by removing a single boarding at the proper height. The important feature of this method is that it requires no change in the cars, except provision for dropping a single side board, that it involves no delay, and that both food and water can be supplied at the same time. The shrinkage in weight, to say nothing of the unwholesome character of the meat, from the carriage of cattle for 40 or 70 hours without water is so great that any economical system which delivers cattle at the sea-board as heavy as they were loaded in the interior is certain of ultimate adoption. The plan of the Humane Live Stock Express Company seems to offer a practical device likely to effect this."

Judge Daniel's Timely Decision Concerning Subscriptions for Stock.

The recent decision of Judge Daniels, of the Supreme Court of this State, an abstract of which we give in another column, is exceedingly timely. Never in any year in the history of this country have such an immense number of stock companies been formed as during the last twelve months. Speculation has run wild. Rights and privileges which have only consisted of the power to compel assessments have sold frequently at a premium. This torrent of new stock ventures of various kinds has been so continuous and overwhelming that conservative corporations and worthy enterprises have been seriously and unjustly embarrassed by its unhealthy influence.

When the crash comes, as it will come, to this class of corporations, many unscrupulous methods and devices for avoiding the laws will come to light. Until then Judge Daniel's decision will at least make it a little more difficult to establish bogus corporations, although it will not suppress them.

The plan of paying "ten per cent. of the par value of the stock subscribed for in cash" by giving a check for the amount reminds us of the Englishman who received a legacy of five thousand pounds on condition that one half of that amount should be buried with the testator. He was sorely puzzled at first how to keep the whole of the money and comply with the conditions of the will, but upon taking legal advice was told to make out a check for twenty-five hundred pounds, payable to the order of the deceased, and put it in the old gentleman's coffin. Let us hear from Judge Daniels again.

Personal.

James Ferris has been elected president of the Montreal and Champlain Railway Company.

M. H. Smith has resigned as general freight agent of the Baltimore and Ohio Railroad.

W. H. Hurlbut, of Chicago, has been appointed general passenger agent of the Canada Southern Railway in place of Frank E. Snow, lately resigned.

H. G Marquand has been elected director of the Union Pacific Railroad, vice Joseph L. Stephens, deceased.

Geo. H. Crosby has been appointed general freight agent of the Kansas City, St. Joseph and Council Bluffs Railroad in place of J. E. Smith, resigned.

T. A. Phillips, formerly superintendent of the New York, Pennsylvania and Ohio (Western Division), last week assumed the general managership of the Toledo Delphos and Burlington (narrow gauge) Railroad.

Joseph Crandall it is said will be the superintendent of the Troy and Boston Railroad, succeeding E. E. Aldrich recently deceased, Mr. Crandall has of late been the general freight agent of that road.

William L. Scott of Erie, Pa., in 1846, was a page in Congress. General Chas. M. Read, member of Congress from Erie, took him home and gave him employment at weighing coal, Mr. Scott's fortune is now estimated at $4,000,000.

John W. Creigh, civil engineer, and party, are making surveys for the Pittsburgh Southern Railroad, commencing at the Springs and running northward to Taylor's Summit, on the National pike, a distance of 250 miles, to connect with the main line.

The officers of the American Telephone Association elected at their meeting in Saratoga on the 6th inst. are: President, George L. Phillips, of Boston; vice-president, Wm H. Eckert, of Cincinnati; secretary, Morris F. Tyler, of New Haven.

J. M. Murray Mitchell, a prominent civil engineer, has made an offer on behalf of English capitalists to construct the Gatineau Valley Railroad Canada, furnishing the funds, floating bonds, &c. A meeting of the provisional directors will be held at Hull on the 14th instant to consider the proposal.

John T. Odell, superintendent of the Western Division of the Kansas Pacific Railway, has resigned to accept the general superintendency of the Mexican Central Road, now being constructed westward from El Paso. Mr. Odell went to Kansas City in 1875, and

has been connected with the Kansas Pacific ever since.

Prof. Pumnelly, Geologist and Mining Engineer of the United States Geological Survey, has resigned, and been engaged by the Oregon Transcontinental Company to make a full survey of the region traversed by the Northern Pacific Railway Navigation Company, including all the adjacent Territories.

The funny man of the Morristown Herald says: "Astronomy is a beautiful science. We are told that if a railway was run from the earth to the nearest fixed star, and the fare was one penny for every hundred miles, and if you took a mass of gold to the ticket office equal to the national debt—$3,800,000,000—it would not be sufficient to pay for a ticket to the nearest fixed star aforesaid. If this be the case, it matters very little to us whether such n railroad is ever constructed. It would be mighty discouraging to go to the ticket office with a mass of gold equal to $3,800,000,000 and be informed that the fare was $5,678,032,000. If the ticket agent wouldn't trust until we got back we'd be compelled to forego the trip."

The New York Correspondent of the Baltimore Sun, September 3, in speaking of J. Gould's son starting in business, says: "Mr. J. Gould, it would appear, has resolved to take a more open part in the ordinary business of 'the street,' and with this view, it transpires this afternoon that he has become a special partner in a new banking and brokerage firm, under the title of W. E. Connor & Co. Mr. George Gould, son of Mr. J. Gould, goes in as 'special broker.' Mr. W. E. Connor and Mr. G. P. Morisini are the other partners. Mr. Connor has, for a long time past, been Mr. Gould's broker, and Mr. Morisini has been, for some fifteen years or more, the great railroad king's private secretary. Mr. George Gould is a bright young man, about twenty-two years old, and for four years past has been clerk in his father's office. He accompanied his father on his recent Western excursion over the Wabash and Southwestern system, and thereby acquired a fair knowledge of his railroad acquisitions. It is understood that Mr. Gould's chief object in entering into an arrangement of the kind is to educate his son to take his place. Mr. Connor is supposed to be worth $500,000. Mr. Morisini has been on a salary ever since he has been in Mr. Gould's employ, but his status in this respect, it is understood, will be improved under the new order of things."

J. B. Power has been appointed Land Commissioner of the St. Paul, Minneapolis and Manitoba Railway Company, vice Charles E. Furness, resigned.

Manufacturing.

There is talk of establishing extensive locomotive works at St. Louis, and A. N. Soper formerly general manager of the St. Louis, Iron Mountain and Southern Railway has been mentioned as a desirable man to lead the enterprise.

The new steamer City of Worcester for the Norwich and Boston line arrived in this city, Sunday from the works of the Harlan and Hollingsworth Company, Wilmington, Del., with superintendent Gardner and several friends from New London and officers of the route. The machinery worked perfectly on the trip, and the steamer left this morning for New London.

The use of sawdust in mortar is recommended as superior even to hair for the prevention of cracking and subsequent peeling off of rough casing under the action of storms and frost. A house, exposed to long storms on the seacoast, had pieces of mortar to be renewed each spring, and after trying without effect a number of substances to prevent it, the owner found sawdust perfectly satisfactory. It was first thoroughly dried and sifted through an ordinary grain sieve, to remove the larger particles. The mortar was made by mixing one part of cement, two of lime, two of sawdust, and five of sharp sand, the sawdust being first well mixed dry with the cement and sand.

The new metal of which it is proposed to construct pipes in which to lay telegraph wires underground is described as very light—only about one-sixth the weight of iron—and, being composed almost entirely of pure carbon, is indestructible; whether in the air or underground it does not rust or change by exposure, and is not affected by heat or frost. The most important characteristic claimed for it, however, in connection with underground wires, is its being a perfect insulator. The pipes of the metal need not, it is stated, be buried very deep in the ground, as they may be of a semi-elastic character, adjusting themselves to the slight upheaval and depression of the ground through the action of frost.

Organization.

The Markland Electric Light and Power Company has filed articles of incorporation in the County Clerk's Office. William Euclid Young, George Bovey and C. Jerome Liquet are the incorporators. The capital stock is $600,000 in shares of $1 each.

The West Side and Yonkers Railroad Company, an adjunct of the New York City and Northern Railroad, have elected the following directors: Messrs. R. M. Gallaway, J. F. De Navarro, C. F. Woerishoffer, W. R. Garrison, Arthur Leary, Geo. J. Forrest, C. K. Garrison, R. C. Livingston and A. V. Stout.

The Wabash Valley and Terre Haute Railroad Company filed articles of association in the office of the Secretary of State of Indiana on the 1st inst. The road will be forty-eight miles in length, and will follow as nearly as practicable the line of the Wabash and Erie Canal. Capital stock, $500,000.

Articles of association of the Toledo, Chicago and Burlington Railroad Company were filed with the Secretary of State of Indiana on the 1st inst. The line in Indiana extends from Kokomo, in Howard County, to the Illinois State line, in Newton County. The capital stock is $1,000,000, most of which is owned by Eugene Ellery, of Evanston, Ill.

The "National Elevated Railway Construction Company" has filed articles of incorporation in the County Clerk's office. Earle H. Smith, Charles D. Yale and William H. McDougall are the incorporators. The capital stock is $500,000 in shares of $50 each. The object of the corporation is to manufacture and erect patented elevated railway structures and rolling stock and machinery.

Articles of incorporation of the Chicago and Southeastern Railroad Company have been issued to John L. Beveridge, Eugene Ellery, D. B. Dewey, Alonzo Schroder and Robert B. Kendall, all of Evanston, Ills., for a road running from Chicago through Will and Kankakee counties, and to the boundary line between Illinois and Indiana, at a point in Kankakee or Iroquois county. The capital stock is $700,000.

Articles of association of the Jerseyville Construction Company were filed on the 2d inst. with the Secretary of State of Illinois. The capital stock is $1,000,000. The object is to construct the Quincy, Vandalia and Eastern Railroad. The incorporators are: John A. Shephard, Elias Cockrell and George W. Ware, of Jerseyville; John D. Wilson, of Plasa, Ill. and John H. Belt, of Fieldon, Ill.

A statement of incorporation was filed in the office of Secretary of State of Illinois on the 3d inst. of the Chicago Railroad Construction and Equipment company; capital, $1,000,000; object, the construction of railroads, depots, etc., and the manufacture of rails, spikes, and articles necessary for the operation of railroads generally. The incorporators are C. D. F. Smith, Samuel Pennock and J. J. McDallen.

At the annual meeting of the stockholders of the Brooklyn, Flatbush and Coney Island Railroad Company, held on the 5th inst., the following directors were elected: Henry C. Murphy, William Marshall, Stephen H. Herriman, Charles Storrs, John Lefferts, William C. Kingsley, James Jourdan, Edward L. Garvin, Albert Daggett, Abram B. Baylis, Benjamin F. Tracy, Robinson Gill and Henry D. Polhemus. Henry C. Murphy was re-elected president, and M. B. Washburn secretary.

Articles of incorporation were filed in Springfield, Ill., on the 30th ult. with the Secretary of State by the Peoria and Western Railroad Company, which proposes to construct a line of road from Peoria to Quincy. The capital stock is fixed at $3,200,000, and the corporators are John G. Fonda, Fred W. Menke and John A. Duker, of Quincy; John A. Finlay, of Warsaw; Henry A. Osborn, of Chicago; David M. Kelly, of Green Bay, Wis.; Henry Ketchum, of New London, Wis.; S. B. Kennick, of Fort Madison, Ia; E. W. Merrill, of Menominee, Mich.

At a meeting of the Mexican Oriental International and Interoceanic Railroad Company, held in New York city on the 1st inst., Jay Gould was elected president and O. D. Ashley and Major Francis De Gress of the City of Mexico vice presidents. Major De Gress will represent the company in Mexico. Three engineering parties are now in the field, employed in surveying the proposed line. The distance from Laredo to the City of Mexico by this route will be about 600 miles, and the promoters of the enterprise expect that the road will be completed within two years. It is stated that the Missouri, Kansas and Texas Railroad will reach Laredo, the point of connection in a few weeks.

Articles of incorporation of the Sandusky Street Railroad Company have been filed at Columbus, Ohio, also, Branch line of the Wheeling and Lake Erie Railroad Company, from the main line starting at Norwalk, through Bellevue and other points; also, the Central and Ohio River Railroad Company, commencing at Corning, Perry county, and passing through Perry, Meigs and Galia counties to the Ohio river opposite the terminus of the Point Pleasant and Ohio River Railroad in West Virginia. The principal office is to be in Columbus. The capital stock is $1,500,000. The incorporators are: S. A. Baxter, O. M. Hughes, Jr. Charles N. Lamison, George B. F. Cooper, Jonathan K. Brice and W. E. Hackedon, all of Lima. It is another southern outlet for the Ohio Central.

A new road, to be known as the Ottumwa and Kirkville Railroad Company, has just been organized under the laws of the State of Iowa. This company is to construct, own and operate a line of railway in Wapella County, Ia., between Ottumwa and Kirkville, and such branches and extensions as may hereafter be determined upon. This corporation is also organized for further purpose of buying, selling and owning coal lands, and mining, buying and selling coal and all kinds of minerals and dealing in all kinds of coal. The amount of capital stock is $500,000 divided into shares of $100 each. The incorporators are Thomas J. Potter, general manager of the Chicago, Burlington and Quincy; W. B. Bonnifield, President of the National Bank of Ottumwa, and J. C. Osgood, H. B. Scott and C. M. Ladd. These gentlemen have purchased in fee-simple about one thousand acres of coal lands near Kirkville and have op-

tions on a good deal more coal land in that vicinity, which is included in one of the very finest coal fields in Iowa.

A certificate of incorporation has been issued by the Secretary of State of West Virginia to the Baltimore and Western Railroad Company for the purpose of constructing and operating a railroad in the State of West Virginia, from a point in Jackson county, on the Ohio river, through the counties of Jackson, Roane, Calhoun, Gilmer, Lewis, Upshur, Barbour, Tucker, Pendleton, Grant, Hardy and Hampshire to the line between the two Virginias. The principal office of the company is to be at Capon Springs in Hampshire county, and the corporation is a perpetual one. The nominal capital stock of the company is $4,000,000. One thousand dollars of this has been subscribed for the purposes of incorporation and $100 paid in. The shares are 100 each, and the incorporators are P. B. Borst, J. E. Stewart, B. O. Bent, B. F. Grayson, Sr., C. S. Grayson and Thos. A. Almond, of Page County, Va., and A. J. Brand, of Culpeper County, Va.

Articles of incorporation of the Mexican Pacific Railway Company were filed in the office of the Secretary of State at Albany on the 6th inst. The incorporators of the company are John B. Frisbie, Isaac E. Gates, William C. Emery, Richard T Colbu n, Edward H. Pardee, James B. Hawes, F. H. Davis, Henry Sanford, Gardiner Witherbee and James E. Wheeler. The company is formed for the purpose of constructing, maintaining and operating in the Republic of Mexico, pursuant to a concession by that country to General John B. Frisbee, June 22, 1881, a railroad and a line or lines of telegraph along such line of railroad, and to connect with such other lines as may be deemed advisable, also such lines of steamboats or sailing vessels as may be proper or convenient for use in connection with the railroad. The organization is for ninety-nine years. The railroad is to run from the city of Guaymas, State of Sonora, to points on the Pacific coast mentioned in the concession by Mexico to Francis De Gress, representing the International Railway Improvement Company, and to General U. S. Grant, representing the Southern Mexican Railway Company, and touching at such intermediate ports on the Pacific coast as may seem advisable. The terminal points are, Guaymas, Sonore, Tehauntepec and Oaxaca, passing through the said States and the intermediate States of Sinaola, Jaslico, Michoacan and Guerrero. The capital stock of the company shall be $10,000,000, divided into 100,000 shares of the par value of $100 each. The office of the company shall be in New York. The following are the directors: Henry Sanford, Gardner Witherbee, William R. Garrison and James B. Hawes, of New York; John B. Frisbie, of Mexico, and Isaac E. Gates and Richard T. Colburn, of Elizabeth, N. J. The articles of incorporation were submitted to the Governor, according to the law, and approved by him.

Railroad Earnings.

Great Western of Canada, week ending Aug. 26, $91,344; corresponding week last year, $105,227.

Chicago and Grand Trunk, week ending Aug. 27, $29,998; corresponding week last year, $27,985.

Toledo, Delphos and Burlington, third week in Aug., $16,885; 1880, $6,342.

Louisville and Nashville, fourth week in Aug., $310,300; 1880, $257,500; Jan. 1 to Aug. 31, $1,704,500; 1880, $1,522,900.

Chicago and Northwestern, fourth week in Aug., $393,300; 1880, $570,100; Jan. 1 to Aug. 31, $13,205,441; 1880, $11,952,202.

Chicago, Milwaukee and St. Paul, fourth week in Aug., $600,000; 1880, $325,664; Jan. 1 to Aug. 31, $10,367,000; 1880, $7,465,468.

Mobile and Ohio, month of Aug., $159,348; 1880, $140,593; Jan. 1 to Aug. 31, $1,412,799; 1880 $1,285,922.

St. Louis and San Francisco, fourth week in Aug., $97,900; 1880, $92,900; Jan. 1 to Aug. 31, $1,999,200; 1880, $1,597,800.

Houston and Texas Central, fourth week in Aug., $111,783.94; 1880, $104,135; Jan. 1 to Aug. 31, $2,277,338.67; 1880, $1,977,892.02.

St. Louis, Iron Mountain and Sou'hern, fourth week in August, $146,177.18; 1880, $143,816.45; Jan. 1 to Aug. 31, $4,491,432.59; 1880, $3,594,696.39.

Denver and Rio Grande, fourth week of Aug., $222,620; corresponding week last year, $118,090; month of Aug., $606,193; Aug. 1880, $396,472, miles now operated, 933; operated last year, 510; gross earnings for first eight months, 1881: Jan., $307,074; Feb., $317,682; March, 408,493; April, $433,212; May, $514,767; June, $584,230; July, $548,284; Aug., $606,193; total, $3,720,335.

Lake Shore and Michigan Southern Railway.

The report of the Lake Shore and Michigan Southern Railway Co. to the Railroad Commissioner of Ohio for the year ending June 30, 1881, shows the gross earnings from the transportation or passengers to have been $3,392,693.82; from transportation of freight, $13,668,659.93; from mail service, $656,980.31; from express freight, $279,523 82; from other sources, $133,586.32—a total of $18,631,894.20, being $1,219,978.59 over the gross earnings of the preceding year. The net earnings for the year were $8,686,938.97, against $8,770,857 26 for the previous year, a decrease of $83,918.29. This is largely due to the increased operating expenses; the amount expended in the maintenance of way and structures this year exceeds that of the preceding year $346,475.30. The total operating expenses for the current year were 53.57 per cent. of the earnings, while for the preceding year it was 49.62 per cent. of the earnings. The net income over operating expenses and rents paid is $7,473,572.54. Percentage of same to capital stock and debt, 8.57. The net earnings per mile $7,376.37. The transportation of coal this year was 1,441.853 tons, exceeding that of the former year 308,251 tons. Of ore 140,964 tons; excess over last year, 29,499 tons. Manufactured iron, 471,290 tons; excess over last year, 18,880 tons. Grain, flour and other agricultural products, 2,379,494 tons; excess over last year, 66,928 tons. Live stock, 680,612 tons; excess over last year, 129,537 tons. Merchandize, 676,311 tons; excess ovor last year, 88,508 tons. The tonnage yielding revenue is 8,687,762 tons. The average amount per mile received for each ton, 7-10 per cent. The number of passengers carried this year, 3,325,867; last year, 3,012 267; excess, 312,600. The average miles traveled by each, 57.

The simple device brought out by the United States Safety Car Company, under the management of Col. F. A. Seaver, at the Stevens House this city, by which escape scuttles are placed in the roofs of passenger, express, mail and baggage cars, to afford egress in case of accident, is meeting with increasing favor among railroad men and the general public, some of the leading lines having already adopted the id several others holding it in favorable consideration. The cost of the device is only six dollars for a car; to which we call attention especially as through a printer's error the cost was given differently in a recent number of the JOURNAL.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 27, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad...	192,530	5,540,065	4,708,275
Schuylkill Canal....	19,918	855,527	267,459
Lehigh Valley.....	116,863	4,044,984	3,075,405
Del., Lack. & Western	92,917	2 677,745	2,077,540
Shamokin Valley....	22,862	692 894	524,821
Central New Jersey.	154,044	2,795,155	2,193,157
United R. R. of New Jersey..	34,527	984,880	680,050
Pennsylvania Coal ..	33,586	846,527	637,740
Delaware and Hudson	75,628	2,255,464	1,812,318
Huntingdon & Broad Top Mt.....	9,213	332,296	291 901
Penn. and New York.	30,383	1,062,872	788,416
Clearfield, Pa.....	45,283	1,569,613	1,011,240

The total tonnage of anthracite coal from all the regions for the week ending August 27, as reported by the several carrying companies, amounted to 624,958 tons, against 418,216 tons in the corresponding week last year, an increase of 206,742 tons. The total amount of anthracite mined for the year is 17,511,765 tons, against 13,699,166 tons for the same period last year, an increase of 3,812,599 tons. The quantity of bituminous coal sent to market for the week amounted to 94,250 tons, against 102,217 tons in corresponding week last year, a decrease of 7,967 tons. The total amount of bituminous mined for the year is 3,137,096 tons, against 2,689,986 tons for the corresponding period last year an increase of 447,110 tons. The total tonnage of all kinds of coal for the week is 719,208 tons, against 520,433 tons in corresponding week last year, an increase of 198,775 tons, and the total tonnage for the coal year is 20,648,861 tons, against 16,389,152 tons to same date last year, an increase of 4,259,709 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending August 27 was 182,872 tons, of which 143,341 tons were coal and 39,531 tons coke. The total tonnage for the year thus far has been 5,849,323 tons, of which 4,250,434 tons were coal and 1,598,889 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 27 were 47,001 tons, and for the year to that date 1,326,250 tons, a decrease of 28,046 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 28,966 tons; year, 857,218 tons; increase as compared with 1880, 4,886 tons; Chesapeake and Ohio Canal—week, 11,830 tons; year, 296,848 tons; decrease as compared with last year, 56,861 tons. Pennsylvania Railroad—week, 6,104 tons; year, 171,409 tons; increase compared with 1880, 28,654 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 38,526 tons; year, 1,198 680 tons. George's Creek and Cumberland Railroad—week, 6,676 tons; year, 81,462 tons; Baltimore and Ohio Railroad—week, 1,619 tons; year, 41,167 tons. The Reading Railroad tonnage for last week ending Sept. 3, was 184,000 tons, of which 55,000 tons were sent to and 51,000 tons shipped from Port Richmond, and 11,500 tons sent to and 12,000 tons shipped from Elizabethport.—[Phila. Ledger, Sept. 5.

The Baltimore and Cumberland Valley Railroad was opened to passenger travel and freights as far as Chambersburg, Pa., on the 5th inst.

American Railroad Journal.

Financial and Commercial Review.

WEDNESDAY EVENING, Sept. 7, 1881.

The quotation for call loans in the morning was 6 per cent, but in the last hour the rate fell to 4 per cent.

The posted rates for prime bankers' sterling were 4.81@4.81½; the actual rates were 4.79½@4.80 and 4.83¼@4.84, with cable transfers 4.84¼@½ and prime commercial bills, 4.78@4.78½. The actual rates for continental exchange are as follows: francs, 5.26¼@5.22½; marks, 93¾ and 94½; and guilders, 39¾ and 39 15 16.

The statement of the public debt of the United States, published this week, shows a decrease of debt during the month of August of $14,181,221.32, and since June 30, 1881, of $24,259,244.55. The cash in the Treasury at the close of the month of August was $240,498,788.96, and the debt less cash in the Treasury $1,816,339,567.43.

The payments made from the Treasury by warrants during the month of August, 1881, were as follows: On account of civil and miscellaneous, $4,023,053.02; War, $5,194,673.82; Navy, $1,438,425.78; Interior, (Indians), $774,159.98; Interior (Pensions), $6,680,102; total, $18,105,414 60. The above does not include payments made on account of interest or principal of the public debt of the United States.

The Louisville, New Albany and Chicago Railway Company has made to John C. New, of Indianapolis, a mortgage for $2,800,000, with 6 per cent. interest per annum, payable in gold o first days of Febr ary and August in the

New York, the security being the Chicago and Indianapolis Division of the Louisville, New Albany and Chicago Railway, together with all the property, equipment, leasehold rights—in fact, everything belonging to the road. The above mortgage is payable on the first day of August, 1911.

The five per cent St. Louis, Iron Mountain and Southern Railway Company general consolidated and land grant bonds, dated April 1, 1881, have fifty years to run; interest payable April and October 1, secured by mortgage on all the property, franchises, &c., of the company.

The Louisville, New Albany and St. Louis (Air-Line) Railroad Company has filed a copy of the second mortgage of that road to secure the payment of $3,000,000 five per cent. bonds. Robert A. Watts, of Indianapolis, is named as trustee. The first mortgage upon the road is from Indianapolis to Mount Vernon, and is for $4,000,000. The second mortgage covers the same property.

The Government has ordered an appeal in the case of the judgment of the Court of Claims, which awarded the Pacific Mail Company $300,000. This sends the case back to the United States Supreme Court.

The closing quotations on Wednesday were: Adams Express, 136@138½; American Express, 86@87; American District Telegraph, 48@50; Chicago, Burlington and Quincy, 153@154; Canada Southern, 64¼@64½; Chicago and Northwestern, 124½@124¾; do. pref., 137@139; Central of New Jersey, 93⅛@93¼; Chicago and Rock Island, 134⅛@135½; Central Pacific, 89⅜@89½; Chicago, Milwaukee and St. Paul, 118⅜@118½; Cleveland, Columbus, Cincinnati and Indianapolis, 87@87½; Columbus, Chicago and Indiana Central, 20½@21½; Delaware and Hudson Canal, 107¾@107⅞; Delaware, Lackawanna and Western, 123½@123⅝; Hannibal and St. Joseph, 150@200; do. pref., 113¾@114½; Illinois Central, 128¾@128⅞; Lake Erie and Western, 52¼@53; Lake Shore and Michigan Southern, 123⅛@123¼; Metropolitan Elevated, 81⅛@81¼; Manhattan Elevated, 20⅝@20⅞; Michigan Central, 93⅝@93¾; New York Elevated, 102⅛@103; New York, Lake Erie and Western, 42⅞@43; New York Central and Hudson River, 142½@142¾; Ohio and Mississippi, 39@39½; do. pref., 104@109; Ohio Central, 25¾@26; Texas and Pacific, 51⅞@52; Union Pacific, 121@121⅛; United States Express, 67½@70; Wells Fargo Express, 130@135; Western Union Telegraph, 87⅞@88; Wabash, St. Louis and Pacific, 47¾@48; do. pref., 85⅝@85¾.

Subscriptions to Corporate Stock.

NEW YORK SUPREME COURT, FIRST DEPARTMENT, GENERAL TERM, JULY 1, 1881.

EXCELSIOR GRAIN BINDING CO. v. STAYNER.

A New York statute in relation to the formation of corporations provides, that no subscription to the capital stock of a corporation shall be received "unless at the time of making it the person subscribing shall pay ten per cent of the par value of the stock subscribed for in cash." Held, that a payment by a check of the ten per cent did not satisfy the requirement of the statute so as to make the subscription binding on the subscriber.

Action to recover the amount of a stock subscription. From a judgment for defendant plaintiff appealed. The opinion states the facts. The decision appears 58 How. Pr. 273.

DANIELS, J. This action was prosecuted for the recovery of the sum of $5,000, being the defendant's subscription for one hundred shares of the capital stock of the plaintiff. These shares were of the par value of $50 each, and the subscription by which the defendant agreed to take them was made before the company was completely organized. The company was incorporated under the authority of chapter 611 of the Laws of 1875. The certificate required for that purpose was filed, and the persons making it were empowered to open books for subscriptions to the capital stock, as has been provided for by section 4 of this act. And the subscription made by the defendant was taken in the course of the proceedings for that purpose so authorized. But neither at the time when the subscription was made, nor at any time after that, did he pay to the commissioners any part of the amount for which the stock was afterward to be issued to him. All that was done was to subscribe for the stock and deliver his check for ten per cent of the amount of the subscription. After the company was organized the board of directors declared the subscriptions to the capital stock to be due and payable, and because of a failure to pay on the part of the defendant this action was brought against him for the recovery of the amount. It was resisted chiefly because of the omission of the defendant to make the payment which the statute has required for the purpose of constituting a complete subscription to the stock of such a corporation. The provision of the act upon the subject is, that the commissioners shall proceed to open books for subscriptions to the capital stock of such corporations, but no subscription shall be received unless at the time of making it the person so subscribing shall pay to said commissioners ten per cent of the par value of the stock subscribed for in cash. Laws 1875, 756, § 5.

The court at the trial held that this requirement had not been observed; that the execution and delivery of the subscriber's check for the ten per cent was not a payment of the amount of it in cash, and for that reason the subscription was ineffectual, and he never became liable upon it. Before the check was presented for payment it was countermanded by the defendant, and nothing, in fact, was ever received, either by the commissioners or the company itself, on this subscription.

The object of the law in making this requirement was to prevent the organization of corporations upon mere paper capital, and the security of persons dealing with them requires that such organization should not be permitted. If a check could be received as a compliance with what the law has required on this subject from one person it could be from all; and the consequences of such a construction would be that a corporation might be organized without receiving a single cent of actual capital. That would induce the existence of fraudulent corporations, which it must have been the object of the Legislature by means of this provision to prevent. It is a wholesome and proper restraint, and should be observed and enforced according to the fair import of the terms by which it has been created. In no proper sense of these terms can the unpaid or uncertified check of the subscriber be accepted or regarded as cash. And for that reason the provision contained in this statute was not complied with at the time when the defendant's subscription was made. A similar provision is contained in the general railroad laws of this State. 2 R. S. (5th ed.) 669, §4. And in the case of Beach v. Smith, 28 Barb. 254, it was intimated that the ten per cent required to be paid at the time of the subscription might be received in a check or sight draft. But, whether it could or not, was a point not presented by the case for the determination of the court, and for that reason what was said upon this subject cannot be accepted as authority. In that case, as well as the case of the Ogdensburg R. R. Co. v. Davis, mentioned in the opinion, the amount required to render the subscription valid was in point of fact finally and actually paid, and while this was not a formal compliance with what the statute had required, it was substantially so, and the transactions were sustained because the payments had actually been made in fact. This was the view which was taken in the further consideration of the case of Beach v. Smith, in the Court of Appeals (30 N. Y. 116), and for that reason the judgment of the Supreme Court was there affirmed. No binding authority has been found, allowing the payment required by the statute on such a subscription to be dispensed with. It must be made either in cash or its equivalent actually passing into the hands of the commissioners. Neither was done in this case, and therefore what the statute has declared to be necessary was not in this instance observed.

Because of this failure no lawful subscription was made by the defendant for the stock of this corporation. The terms of the statute are clear and explicit that no subscription shall be received by the commissioners unless at the time of making it the person so subscribing shall pay to them ten per cent of the par value of the stock subscribed for in cash. This was a clear prohibition which they had no power to evade. They could receive the subscription in no other manner, and if the payment in cash was not made they were prohibited from permitting the party to become a subscriber. The language used upon this subject is so clear as to be incapable of misunderstanding. It was the intention of the Legislature by means of it to render the requisite payment an indispensable condition to the validity of the subscription. If that should not be made, they could not allow the person proposing to take the stock to become a subscriber for it; and if they did so in contravention of the clear restraint of the statute, the subscriber could acquire no right to the stock, neither could the commissioners or the corporation enforce the formal terms of a contract made for the payment of its price. The principle is a general one that a contract which is repugnant to or contravenes the terms of a statute of the State is unlawful and cannot be enforced. Barton v. Port Jackson, etc., Plank-road Co., 17 Barb. 397; Seneca Co. Bank v. Lamb, 26 id. 595–601.

As the statute must be construed, no binding subscription was made by the defendant for the stock of the company, because of his failure to make the payment mentioned in the statute before the subscription itself could be received by the commissioners. What was done was entirely ineffectual, and for that reason it was properly held at the trial that the action could not be maintained.

The judgment for the reasons already assigned, should therefore be affirmed with costs.—[Condensed from The Albany Law Journal.

The Fort Scott, Topeka and Lincoln Railroad Company, of which Col. T. L. Wilson of Fort Scott, Kansas, is President, Stephen Farnsworth Secretary, and C. O. French Attorney, are making preparations for the completion of the road. It will extend from Fort Scott, Kansas, to Lincoln, Nebraska, and is designed to run in connection with the Fort Scott, Southeastern and Memphis Railroad, which is now completed from Fort Scott to Springfield, Mo., on its way to Memphis, Tennessee. The length of the new road from Fort Scott to Lincoln is about 270 miles.

The Eastern Division of the Peach Bottom Narrow Gauge Railway was sold on the 1st inst., under foreclosure of mortgage, to a committee of bondholders, for $5,000, and the U. S. Circuit Court at Philadelphia has ordered the sale of the Middle Division in December next by the trustees, under foreclosure of the bondholders' mortgage.

A gap of only thirty-five miles remains to be filled on the Canadian Pacific Railway to connect Winnipeg with Lake Superior.

Steel rails have been laid on the New York, Susquehanna, and Western Railroad nearly all the way between Paterson and New York, and also on other sections of the line in the mountains where the old rails were worn out. The substitution of steel rails will be pushed steadily forward. It was intended to double track the road between Paterson and New York this Fall, but it has been decided to defer this improvement until next Spring.

THE

Allen Paper Car Wheel Co.,

General Office 340 Broadway, N. Y.

Works at Pullman, Ills., and Hudson, N. Y.

AN INDESTRUCTIBLE WHEEL FOR PASSENGER CARS AND ENGINES.

D. N. BEARDSLEY & CO.,

Manufacturers of Superior

OAK CAR LUMBER,

AND

Railroad Ties.

Office, No. 9 Murray Street, New York.

E. W. VANDERBILT. E. M. HOPKINS.

VANDERBILT & HOPKINS,

Railroad Ties.

Car and Railroad Lumber, White and Yellow Pine and Oak.

WARRANTED SUPERIOR TO ANY GREASE IN THE MARKET

CHEAP AND DURABLE.

☞ Samples sent by Express on application free of charge. Please state whether Waste is used or not.

The Uncle Sam Lubricating Compound and Axle Grease Works.

WILBUR F. GEDNEY, Prop'r.,

270 West St., N. Y.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent. JNO N. ABBOTT, General Passenger Agent.

Safety Railroad Switches

NO OTHER LINE IS SUPERIOR TO THE

FITCHBURG RAILROAD

HOOSAC TUNNEL ROUTE

WEST.

8.30 A.M. DAY EXPRESS.

Through drawing-room car to Rochester, N. Y., connecting with through sleeping cars for Cincinnati, Cleveland, Toledo, *DETROIT AND CHICAGO.*

2.15 P.M. CINCINNATI EXPRESS.

Pullman Sleeping Car attached, running through to Cincinnati without change. (Only Line running Pullman Cars from Boston.) This car runs *via* Erie Railway, making direct connection for Louisville, St. Louis, Kansas City, New Orleans, and all points in Texas and New Mexico.

3.00 P.M. ST. LOUIS EXPRESS.

THE ONLY LINE which runs a THROUGH SLEEPING-CAR from

BOSTON TO ST. LOUIS WITHOUT CHANGE!

ARRIVING AT 8.00 A.M. SECOND MORNING.

Through sleeping car for Buffalo, Toledo, Fort Wayne, Logansport, Lafayette, Danville, Tolono, Decatur and St. Louis, making direct connection with through Express Trains for Kansas, Colorado, Texas, and all points in the

SOUTHWEST.

6.00 P.M. PACIFIC EXPRESS.

The only line running a through sleeping car *via* Buffalo and Detroit without change, arriving at Chicago at 8.00 A.M. second morning, making sure connections with through Express Trains for Iowa, Nebraska, Kansas, Colorado, the Pacific Coast, Wisconsin, Minnesota, and all points in the

WEST AND NORTHWEST.

THE ABOVE TRAINS RUN DAILY, SUNDAYS EXCEPTED.

This Great Short Line passes through the most celebrated scenery in the country, including the famous HOOSAC TUNNEL, four and three-quarters miles long, being the longest Tunnel in America, and the third longest in the world.

Tickets, Drawing-Room and Sleeping-Car Accommodations may be secured in Advance by Applying to or Addressing

Population of India.

Referring to the new census which has just been taken in India, and from which it appears that the total population in round numbers is 250,000,000, or something more than five times the population of the United States, the New York Times says: Accustomed as one is from very childhood to regard India as a thickly populated country, these figures still awaken surprise and again renew the wonder that an alien power, thousands of miles away, should govern it without more serious trouble. In many ways there is not a more interesting financial showing made by any nation than the Indian budget of Great Britain, and this year it reaches us by mail simultaneously with the news of this completed census. So much has been published of bankruptcy in Indian finances that the facts which this budget gives, when war expenses are eliminated from it, are a striking testimony to the efficiency of the English Government and the vast resources of its far east country. For the year 1881-2 the budget reckons upon a revenue of over $354,900,000, and expenditures of over $350,600,000, showing a clear surplus of nearly $4,300,000. To reach this surplus, however, Lord Hartington reckoned as income the sum of $15,000,000—to be paid in annual installments of $2,500,000—as part of the imperial contribution of $25,000,000 toward the expenses of the Afghan war, which, if taken out of the reckoning, would leave, of course, a considerable deficit. Lord Hartington in a single paragraph made a most suggestive statement of what the Indian finances would be had there been no Afghan war. For 1878-79 there would have been, he said, a surplus of $7,619,425; for 1879-80, one of $17,607,575; for 1880-81, one of $16,115,870, and for the current year, as we have already seen, one of $4,275,000. Thus, for the four years there would have been a surplus of $47,617,870, and the annual famine fund of $7,500,000 would have been allowed for in addition. What the war actually cost, as we now finally learn, was about $117,000,000; or more than double what it was reckoned to be, by the disgraceful error of last year. Besides the imperial contribution of $25,000,000 and the normal surplus of $47,617,870, to meet this war expense has required the use of the famine fund balances, some $20,176,000, and a requisition on the cash balances of $22,567,300 more.

The "Brown Coals" of the Far West.

The United States Territories and the States on the Pacific coast do not contain any coal of the carboniferous age, but they contain an abundance of the kind of fossil fuel called "Lignite" or "Brown Coal." This lignite, which is found in the earth like coal, and has its appearance and uses, and is, therefore, entitled to be called coal, occurs in greater or less quantities in all, or nearly all the States and Territories between the Missouri River and the Pacific coast. The principal localities where it is most in demand and found of the best quality, are along the line of the Union Pacific and Kansas Pacific Railroads, in the southern part of Wyoming and the northern part of Colorado. It is also abundant on the Northern Pacific Railroad. "Lignite" tends to crumble soon after exposure to the weather. This tendency is the cause of great waste at the mines—all the greater, that those tertiary coals can scarcely ever be made to melt and agglutinate into a firm coke. As ascertained by their analysis, they all contain water in their composition. Hence it is difficult to obtain a strong concentrated heat, such as is needed for welding iron in the forge fire. As a fuel for locomotives and for domestic purposes, including cooking as well as warming, lignite in general answers well. It kindles and burns freely, making a bright fire with a yellow blaze and comparatively little smoke. The odor of the smoke resembles the smell of burning peat.

The presence of iron pyrites in lignite is an objectionable feature, producing danger of spontaneous combustion. These iron pyrites can be removed by washing. Much of the lignite of the Pacific coast is more compact, approaches nearer to true coal and furnishes a better fuel than that of the Upper Missouri. Its great defect, however, is its tendency to crumble by exposure. To convert lignite into good transportable fuel, adapted to manufacturing and domestic uses, is claimed to be feasible. Some recent processes for utilizing bituminous coal dust are soon to be applied to its preparation, and in this way it is hoped that the vast lignite beds of the West, now nearly worthless, will be converted into valuable sources of fuel supply.[—The Tribune.

Cast Iorn in Fine Work.

The extent to which cast iron is used in the manufacture of small articles of light and fragile form, such as ornaments and appendages to dress, etc., is rapidly increasing, and the methods adopted in thus utilizing cast iron illust[illegible] the advancement in iron working which [illegible] few years have witnessed. It was sup[illegible]d ays The Metal Worker, that we had no material or means to reproduce such diminutive and fragile articles from cast iron. But recent improvements, both in material and manipulation, prove that we can almost equal the delicacy of what is known as "Berlin iron."

Fine charcoal iron possessses wonderful properties of fluidity when in a molten state; it finds its way into the smallest interstices of the mould, and comes out cooled, a definite reproduction of the imprint of the pattern. So exact is this reproduction that bare lines, to be represented only by very fine wire, come from the mould perfect in form and quite tenacious in texture. Articles of cast iron, cast in a mould of sand, which require fifty or a hundred to balance a quarter-pound weight, are as readily produced here as articles weighing pounds. It may be doubted if any metal is capable of producing more diminutive objects than iron. As instances of the possibilites of charcoal iron in castings, let any one examine the delicate shoe-buckles and belt-buckles, the shawl-clasps, and ornamental hair-pins, called steel, which bear a burnished surface rivalling that of silver. He will find they are of cast iron, very brittle, and showing a bright iron fracture. Quantities of these articles are made in England. They are said to be cast in sand moulds, the same as masses of iron are cast, and that come out as perfect as the heavier castings.

In short the possibilities of cast iron range from the utmost capacity of adjoining cupolas, capable of melting thirty tons, to the hand-ladle that, with ten pounds of metal, pours for a thousand separate articles.

Connecticut and Passumpsic Rivers Railroad.

The following is an abstract of the report of the Connecticut and Passumpsic Rivers Railroad Company for the year ending June 30, 1881:

Total receipts for year	$774,146 52
Expenses	462,981 61
Leaving net earnings	$311,164 91
From which has been paid:	
Coupons on 7 per cent mortgage bonds	$103,075 00
Coupons on 7 p. c. notes	8,610 00
Coupons on Massawippi 6 per cent bonds	24,000 00
Dividend February, 1881, 2 per cent	51,456 00
Dividend August, 1881, 3 per cent	79,245 00
Interest at bank	9,175 87
	$275,561 87
Leaving of net earnings for the year not disbursed	$35,603 04
To which add surplus of last year	8,880 17
Add also premium on bonds sold	12,819 31
Making a surplus on hand	$57,252 52
Increase in passenger receipts over last year	$14,182 77
Increase in freight over last year	78,269 05
Increase in mails and express over last year	1,611 24
Increase in rents over last year	56 54
Increase in interest over last year	22,478 94
Total gross increase	$116,598 54
Increase in operating the road	31,573 44
Increase in net receipts over last year.	$85,025 10

The tonnage as compared with last year was:

	1880.	1881.
Total tons	219,604	308,935
Tons carried one mile	13,670,452	19,726,622
Trains, mileage	449,978	525,171
Passengers carried	158,934	176,313

During the year there has been added to the equipment of the road 140 freight cars, costing $68,700, which have been paid for by the sale of 687 shares of stock, making the whole stock now issued 24,444 shares. Locomotives and other stock, as well as the stations, &c., have been kept in excellent repair, $8,543 having been expended upon the joint passenger station at White River Junction. The gravel train has been run more than two months since the opening of spring in ballasting the road; 1,500 tons of steel rails have been laid in the track, 5,784 rails taken up, welded and relaid, and 86,290 new ties have been put into the track during the year. Workmen are now laying 2,000 tons of steel rails, which will go into next year's account; when these are all laid there will be only about fifteen miles more to be laid to furnish continuous steel rails from Newport to Wells River, where the heaviest traffic passes, and more than one-half of the Massawippi road will also have steel rails. The report concludes as follows:

The long struggle we have had to obtain an efficient through line to Montreal and other points on the St. Lawrence River is over, and the thing is accomplished. We have now, through the means and great energy and perseverance of the Hon. Bradley Barlow, owner and manager of the Canadian line of roads with which we connect at Newport, a well-established line to Montreal, and embracing the line of roads on the north shore of the St. Lawrence River, which is developing a larger traffic than we had anticipated, and which we think is likely to increase and be permanent. Our relations with all connecting roads are of the most friendly nature, and the prospects for business the coming year are encouraging.

Chicago and Northwestern Railway.

The report of the Chicago and Northwestern Railway Company for the year ending June 30, 1881, recently sent to the Railroad Commissioners of the State of Wisconsin, shows the total miles of road to be as follows: in Wisconsin, 750.48; Illinois, 500.15; Michigan, 212.10; Iowa, 888.41; Minnesota, 414; Dakota, 247.61—a total of 2,807.85. Of this amount 487.50 miles are broad and 113.88 are narrow gauge. The company has also 440.19 miles of sidings. Total income, $19,969,335 42; operating expenses, $10,191,868 14; excess of income over operating expenses, $9,777,467.28; taxes in Wisconsin, $156,057 05; taxes in other States, $293,568 85; rentals, $1,412,287 85; interest on bonds, $3,695,548 16; dividends on preferred stock, $1,515,046 75; on common stock, $905,226; sinking funds, $98,120; surplus for the year ending June 30, 1881, $1,576,655 62. Capital stock, $58,568,150 53; bonded indebtedness, $57,471,000; unfunded and floating debt, $5,600,736 18; total of stock and debt, $121,639,886 71; capital stock per mile of road, $25,241 19; bonded indebtedness per mile, $24,768 85; unfunded debt per mile, $1,994 67; total of stock and debt per mile, $52,004 21. The earnings of the road for the year were: from passengers, $4,198,842 12; from express, &c., $315,122 69; from mails, $324,352 49; from freight, $14,978,712 05; total, $19,816,529 35. The earnings per mile of road operated for the year were $7,427 60. The equipment of the road is as follows: locomotives, 476; passenger cars, 207; baggage, mail and express cars, 113; parlor and dining cars, 7; other cars, 16,581.

Chicago and Atlantic Railroad.

Gen. Smith, one of the contractors for the construction of the Chicago and Atlantic Railroad, gives the following description of that enterprise:

The company was organized in 1878. It made but little progress and the project remained at a standstill until March, 1880, when the scheme was revived, and Gen. Smith and Mr. Conant contracted with the company of which Samuel B. Smith of New York is President, to construct and equip the road from Marion, O., to Chicago. Stock to the amount of $10,000 000 was issued. The issue of bonds was fixed at $6,500,000. The bonds were quickly sold, and the entire subscription money is now in bank in New York. The road is intended as a western outlet for the Erie Railway. When completed to Chicago the Erie will have a continuous line over its own roads from New York to Salamanca, the Atlantic and Great Western to Marion, O., and the Chicago and Atlantic to Chicago. The new line from Marion to Hammond, Ind., 242 miles, will involve an expenditure of $7,000 000. This involves equipment, station buildings and round-houses. At Hammond, which is 22 miles from Chicago, connection will be made with the Chicago and Western Indiana Railroad, which is now under contract for extension to that point. The route is now located the entire distance from Marion to Hammond, and graveling and bridge-building operations are in active progress upon every section of the line. The maximum grade will be twenty-six feet to the mile. The entire line from Marion to Hammond will be graded by next spring. No rails will be laid until the road bed is completed. During the months of May and June, 1882, the whole construction force will engage in tracklaying.

Gen. Smith said he had already purchased 27,500 tons of steel rails, and gave assurance that the through trains of the Erie Railway will be running into Chicago over this route by Sept. 1, 1882. This is allowing one year for grading, bridging, ironing, ballasting and equipping 242 miles of road. He said the project was being prosecuted upon a plan which is an innovation in railway construction. Not a shovelful of dirt was turned until the $7,000,000 required for construction had been paid in and deposited in bank. The road will not be opened, as is customary with new lines, in sections or pieces, but will first be perfected and then opened throughout its entire length on a certain day with all operating and running arrangements complete. Gen. Smith thinks the prospects for traffic extremely assuring for the success of the enterprise.

Interwoven Wire Spring Mattress for Sleeping Cars

An improvement in the building of sleeping-car berths has recently been perfected by Mr. Theodore T. Woodruff, mechanical engineer of this city. An examination of the model, now on exhibition at the Franklin Institute, shows the main feature of the improvement to be in the ready application of the celebrated interwoven wire spring mattress. By this method of construction the fact is patent that the seats and couches surpass those of the cars now so generally in use. Mr. Woodruff claims for his appliance comparative cheapness and durability; increased cleanliness, as the wire will not harbor vermin; and the thinness of the hair mattress to be used precludes any extended absorption of offensive odors from the body. He also claims that, being so much lighter in weight and the model of construction permitting all the bedding to be carried below the seats, the usual disagreeable swaying motion so apparent in the top-heavy sleeping cars is avoided; further, that as the wire mattress is perfectly flexible and yields to the slightest pressure, any bed spread upon it must be luxuriously soft and refreshing. It is the intention of Mr. Woodruff to apply his improvement to the fitting out of sleeping berths on steamships and sailing vessels, where it must prove of incalculable service.—Philadelphia Record.

The Treasury Department at Washington has been considering an appeal by Clark, Post & Martin from a decision of Collector Hartranft, at Philadelphia, assessing duty at the rate of 2½ cents per pound on certain so-called steel blooms imported per steamers Illinois, May 25, and Lord Gough, June 2, which the Appraiser, in his return, considered as steel in billets valued under 7 cents per pound. Under date of the 5th instant the Department addressed a letter to Collector Hartranft affirming his decision in the matter.

Ground has been broken for the extension of the Housatonic Railroad from State Line to the Lebanon Springs Railroad at New Lebanon, a distance of 12 miles, to give a through line via Bennington, Vt., between New York and Montreal.

New York, Saturday, September 17, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

AT the close of the alloted time, last week, for which applications for space at the Atlanta cotton exhibition could be received, it was found that about 75,000 more feet of space had been applied for than could be furnished. It has been decided however to increase the accommodations sufficiently to meet the requirements of the late applicants. The enterprising and liberal spirit which the managers of the exhibition have shown throughout has deserved the success which now seems assured to Atlanta's great fair. Excursion tickets good to return within thirty days from the date of purchase, from this city to Atlanta, will be sold during October, November and December for thirty-six dollars.

APROPOS to the question that is frequently raised as to what is the basis upon which capitalists rest their Mexican expectations it is mentioned that Mexico has produced in a year $23,000,000 in silver alone at a time when the annual product of some of the other silver producing countries was as follows: Peru, $6,240,000; Buenos Ayres, $4,850,000; Brazil, $4,360,000; New Granada, $2,990,000, and Chili, $2,060,000. Considerable reliance is also placed upon the agricultural development which is naturally expected to follow the introduction of railroads. What Mexico has produced heretofore has been accomplished without systematized effort and under no inconsiderable disadvantage politically, and for what she can do in the future, the past is not an authentic index. But the lavish bestowal of subsidies is the most threatening influence now upon Mexico's credit and future prosperity, and grave apprehensions are justly felt as to her ability to discharge her enormous obligations.

The Railroads and the South.

Immigration to the South will doubtless assume during the next year a more active character than it has ever before exhibited. For some time railroad men and others interested in Southern development, have been studying and planning for the adoption of such means as would tend to turn southward a fairer portion of the tide of immigration that is flowing so freely to our shores. Especially is this seen in the policy of the management of some of the leading railroads extending through the South Atlantic States. Encouraging results have followed the efforts put forth to draw settlers to that section, and to the enterprise of railroad managers a large portion of the promising outlook in this direction must be attributed.

The Railroad and the State have had to work together to remove prejudices and to offer inducements to settlement; and it must be admitted that without the practical and substantial aid of the railroads the representatives of the people would have had a hard and barren work on hand, notwithstanding that the State policy has in the main been liberal. The great cotton exposition about opening in Atlanta, Ga., will do much to draw attention to the resources and advantages of the South, and this agent itself owes much of its power and usefulness to the hearty cooperation and substantial aid which the railroads have given it from the outset.

The one great difficulty that has stood in the way of Southern growth in the past has been the lack of enterprise and liberality of thought in making known to the world the attractions of that country and its wealth of agricultural and mineral resources. The fact that announcements made now concerning those resources are received with something of surprise, is evidence of the comparatively little that has been done heretofore to make known the inducements offered there to capitalists and settlers. There has been an unfortunate dearth of reliable information published concerning the material interests of the South, and the best of that which has been published has been issued by State or railroad officials rather than through the enterprise of the press or private individuals. Political prejudices are fast fading away at the South, a new impetus has already been given to her industries and her development promises to be measured only by local enterprise, in which the railroads will prove powerful supporters as they have proved willing and far sighted leaders.

Railroad Earnings.

Central Pacific, month of August, $2,059,000; August, 1880, $1,973,437; first eight months 1881, $14,711,544; corresponding period last year $12,318,198.

St. Paul, Minneapolis and Manitoba, four weeks ending August 31, $414,054 24; corresponding period 1880, $232,579 40; from Jan. 1 to August 31, $2,750,723 60; corresponding period 1880, $1,942,670 20.

Chicago and Grand Trunk week ending Sept. 3, $29,685; corresponding week 1880, $26,531.

Denver and Rio Grande first week of Sept. $138,092; corresponding week 1880, $80,517; miles now operated 933, operated last year 541.

Great Western of Canada week ending Sept. 2, $100,867; corresponding week 1880, $101,439.

Indiana, Bloomington and Western, week ending August 31, $3,299,772, corresponding week 1880, $31,822 46; month of August $117,956; August 1880, $111,731 99.

New York and New England, month of July, gross earnings, $240,826 57; operating expenses, $156,729 53; net earnings, $90,091 04; month of August gross earnings, $267,514 58; August 1880 gross earnings, $249,885 23.

Personal.

Charles A. Nimmo has been appointed general ticket agent of the Troy and Boston Railroad.

T. A. Phillips succeeds Major R. G. Butler as general manager of the Toledo, Delphos and Burlington Railroad.

Francis S. Lathrop, Receiver of the Central Railroad of New Jersey, who has been seriously ill at his house at Morristown, is reported to be convalescent.

W. S. Lincoln, of Springfield, Ill., has been appointed chief engineer of the Wabash system of roads, with headquarters at St. Louis.

Receiver King of the Ohio and Mississippi Railroad, it is said, having withdrawn his resignation and asked for an investigation of his management, the petition of Messrs. Pearsall and Chapman filed before Judge Matthews at Cincinnati has been withdrawn.

The following are among the more important of the official changes in the branch lines of the Pennsylvania Railroad recently reported: L. K. Lodge, formerly superintendent of the Central Division, has been appointed superintendent of the Philadelphia, Wilmington and Baltimore Railroad, which also embraces the West Chester and Philadelphia, and the Philadelphia and Baltimore Central Railroads. Mr. Lodge has his headquarters at the West Chester Depot, West Philadelphia. William A. Baldwin who occupied the position of General Superintendent of the Philadelphia and Erie Railroad Division, has been transferred as manager to the Pennsylvania Company, which embraces the leased and controlled lines west of Pittsburg and Erie. Mr. Baldwin has his headquarters at Pittsburg. He is succeeded by Robert Neilson, as General Superintendent of the Philadelphia and Erie Railroad Division. Mr. Neilson was formerly Superintendent of the Elmira and Canandaigua Division of the Northern Central Railway. By this change he also becomes General Su-

perintendent of the Elmira and Canandaigua, and the Susquehanna and Shamokin Divisions of the Northern Central Railway, with headquarters at Williamsport. Spencer Meade assistant engineer on the Middle Division of the Pennsylvania Railroad, has been made Superintendent of the Elmira and Canandaigua Division of the Northern Central Railway. His headquarters are at Elmira. A. B. Starr, Assistant Superintendent of the Philadelphia and Erie Railroad, is transferred to the Superintendency of the Shamokin Division of the Northern Central Railway, in place of L. K. Lodge. E. B. Taylor, Superintendent of the West Pennsylvania Division, is transferred to the Superintendency of the Pittsburg and Columbus Division of the Pittsburg, Cincinnati and St. Louis Railway; and Mr. A. P. Kirtland, Assistant Engineer of the West Pennsylvania Division, is promoted to be Superintedent of that Division.

Organization.

Charters have been issued at Harrisburg, Pa., to the Pittsburg, Rochester and Sharpsville Railroad—capital, $725,000; and to the Mt. Pleasant and Latrope Railroad, Westmoreland County, $130,000 capital. Archibald Hutchinson of Pittsburg, president.

A charter has been issued at Harrisburg, Penn., of the Delaware and Slatington Railway Company, with $300,000 capital. The new road runs from Slatington, on the Lehigh River, for about 27 miles, northeast to the Delaware River at Portland, just below the Water Gap.

At the annual meeting of the Newport and Wickford Railroad and Steamboat Company the following were elected directors: George Miller, J. N. A. Griswold, George Peabody Wetmore and Davis King, jr., of New York; John G. Weaver, of Newport, and S. H. Vaughan, of Wickford, R. I. George M. Miller was elected president and A. S. Sherman secretary and treasurer.

The annual meeting of the stockholders of the Pullman Palace Car Company was held in Chicago on the 7th inst. 53,000 shares of the capital stock being represented. The following directors were elected: George M. Pullman, Charles G. Hammond, John Crerar, Marshall Field, Amos T. Hall, J. W. Doane and R. P. Flower, all being re-elected except Mr. Doane, who fills the vacancy occasioned by the resignation of the Hon. Robert Lincoln.

A certificate of incorporation of the Cincinnati, New Orleans and Texas Pacific Railroad Company has been filed at Columbus, Ohio. The capital stock is $3,000,000. The incorporators are Fred Wolffe, Montgomery, Ala.; Charles A. Page, Boston; Theodore Cook, Edgar M. Johnson, Aaron W. Goldsmith, Cincinnati. Theodore Cook has been named as possible president of the new company, with Col. John Scott as general manager.

Articles of incorporation of the South Chicago Railroad Company were filed with the Secretary of State of Illinois on the 9th inst. The capital is $100,000. It is proposed to construct a road from a point on the Illinois Central between Hyde Park and Grand Crossing to South Chicago. The corporators and directors are W. R. Ackerman, Benjamin F. Ayer, E. T. Jeffrey, J. C. Welling, William S. Mauric and John Dunn.

The directors of the Indiana, Bloomington and Western Railway Company, elected on the 7th inst., are: Austin Corbin, J. R. Maxwell, Henry W. Maxwell, C. H. Odell, E. R. Root, Milton Garrison, L. H. Carhart, F. W. Dunton and Alfred Sully, of New York; J. D. Campbell, of Davenport, Ia.; R. K. Dow, and J. L. Farwell, of Claremont, N. H., and F. W. Peck, of Chicago. The construction of the Eastern Division to Springfield, O., is rapidly pushing to completion.

The Chicago, Brazil and Ohio River Railroad and Coal Company filed articles of incorporation with the State Secretary of Indiana on the 8th inst. Capital, $700,000. Directors, Chauncey Hibbard, Athur Holmes, A. D. Wallick, Fred Schuster, Joseph P. Reford, George B. Gurley and George M. White. The line is designed to run from Jasper, Dubois County, through the counties of Martin, Owen, Clay, Parke, Montgomery, Tippecanoe, White, and Jasper to Hebron, in Porter County. Length, 350 miles.

The Canada Mutual Telegraph Company was organized in Montreal on the 10th inst. with a fully subscribed capital of $1,000,000. The company will commence immediately the construction of lines all through the Dominion. Its connection in the United States will be the Mutual Union Telegraph Company, whose offices it is exrected, will be opened through this country by March next. The officers of the new Canadian company are Charles R. Hosmer, president and general manager; George B. Williams, vice president; A. F. Riddell, secretary and treasurer.

A company has been organized at Fargo to build a line of railroad north from Moorhead to St. Vincent. The incorporators are: Hon. E. G. Comstock, Mayor Burns, A. A. White, W. H. Davy, J. Erickson and others; the object being to build the road running out of Fargo north, and keeping between the Red River and the present line of the St. Paul, Minneapolis and Manitoba route. The matter of securing the right of way and other details are being pushed forward with a view to closing up the whole affair at once, and then commence building the line.

A charter was granted at the State Department, Harrisburg, Penn., on the 9th inst. to the Rostraver Railroad Company, the line of which will run from Bellevernon, Fayette county, on the Monongahela river, to the bank of the Youghiogheny river, near big Sewickley creek, Westmoreland county, a distance of 10 miles. The capital stock is $20,000. D. R. Davidson, of Pittsburgh, is the president, the other corporators being H. C. Frick, Charles H. Spencer, G. B. Bosworth, Pittsburgh; John Guffy, W. C. Guffy, Westmoreland.

Articles of incorporation of the Chicago, Mt. Vernon and Southern Railroad Company have been filed in the Circuit Clerk's office at Salem, Ills. The incorporators are: Jas. A. Creighton, of Springfield; Geo. M. Haynes, Geo. H. Varnell, Seth E. Crewes, of Mt. Vernon, and Bluford Wilson. The new road will pass from Altamont through Effingham, Fayette, Marion, Jefferson, Franklin and Williamson counties, with a branch from Mt. Vernon through Jefferson and Perry to Tamaroa; the capital stock of the road to be $3,000'000—30,000 shares at $100 a share. The survey begins immediately.

Articles of incorporation of the Sierra Iron and Quincy Railroad have been filed in the County Clerk's office, San Francisco. The purpose of the corporation is to construct a two-foot narrow-gauge railway from Quincy, Plumas County, through the Sierra and Mohawk Valleys, by way of Beckworth Pass, to Reno, in Nevada, and a branch to the Sierra iron mines, in Gold Valley, Sierra County, Cal. The estimated length of the road is 100 miles. The directors are Phillip N. Lillienthal, Charles N. Kohler, Frederick Weisenbaum and Caleb T. Fay. Capital stock, $3,000,000. Charles Kohler is treasurer and 10 per cent of the capital stock has been paid.

The charter of the Topeka and Rich Hill Railroad Company has been filed with the Secretary of State of Kansas. The route of the proposed road is from Topeka to Ottawa, Franklin county; thence to Ossawatomie, Miami County; thence to Pleasanton, Linn County; thence to Rich Hill, Bates County, Mo. The directors for the first year are Stephen A. Allen, Pleasonton; D. A. Crocker, Pleasanton; W. F. Dallas, Linn County; Daniel Underhill, Linn County; Reuben Smith, Miami County; H. H. Williams, Ossawatomie; E. H. Brown, Girard; Alfred Ennis, Topeka, and W. L. Parkman, Ottawa. The capital stock of the company is $500,000, divided into 1,000 shares of $50 each. The estimated length of the road is 110 miles.

The directors of the Columbus, Hocking Valley and Toledo Railroad elected on the 10th inst. are: J. W. Ellis, New York City; S. Burke, Charles G. Hickox and W. J. McKinnie, of Cleveland; C. W. Andrews, of Youngstown; and M. M. Greene, of Columbus. The officers are: M. M. Greene, president; S. Burke, vice-president; W. M. Greene, secretary, and F. H. Medory, treasurer. The board re-appointed Orlando Smith, general manager; James A. Wilcox, general counsel; George R. Carr, general superintendent; I. J. Janney, auditor; W. A. Mills, general freight agent, and W. H. Harrison, general passenger and ticket agent. The line is now operated in three divisions—the Lake Erie Division, 124 miles; Hocking Valley Division, 118 miles, and Ohio River Division, 83 miles. Total, 325 miles.

A certificate of consolidation of the Cleveland, Columbus, Cincinnati and Indianapolis, the Cincinnati Hamilton and Dayton, the Cincinnati, Hamilton and Indianapolis, the Cincinnati, Richmond and Chicago and the Dayton and Michigan Railroad Companies, was filed in Columbus, Ohio, on the 8th inst. Thirteen directors will be elected at Cleveland on October 20. Capital stock, $20,000.000, of which $18,500,000, has been issued. The stock of the new company will be issued upon surrender of stock in the old companies. In the distribution of the new stock, stock of the two old roads will be received as worth the same, and the same amount of the new stock be issued to them. It is certified by the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company that its present capital stock is $15,000,000, and its bonded indebtedness $6,275,000. The present capital stock of the Cincinnati, Hamilton and Dayton Railroad Company is $5,500,000; its bonded debt, $10,325,750

At a meeting of the stockholders of the Tennessee Coal and Railroad Company, held at Nashville, Tenn., on the 13th inst., the following board of directors was elected: John H. Inman, C. C. Baldwin, president of the Louisville and Nashville Railroad; Thomas Evans and B. R Smith, of New York; Gen. E. P. Alexander, first vice president of the Louisville and Nashville Railroad, of Louisville; George A. Washington, second vice president of the Louisville and Nashville Railroad, of Tennessee; ex-Gov. James D. Potter, president of the Nashville and Chattanooga and St. Louis Railroad; Nathaniel Baxter, Jr.; Thomas O'Connor, G. M. Fogg, A. S. Colyer, James C. Warner, and A. M. Shook, of Tennessee. The officers are: President, Nathaniel Baxter, Jr.; vice president, A. S. Colyer; general manager, A. M. Shook. The capital stock subscribed is $2,000,000. This is the company which recently purchased the Sewanee coal mines and blast furnaces at Cowan, Tenn., and the branch railroad intersecting the Nashville and Chattanooga Railroad at the latter point.

The incorporators of the Chicago, St. Paul and Omaha Railroad Company, recently organized in Illinois, are George S. Bowen, Elgin, Ill.; Pindar F. Ward, Geneva, Ill.; Holmes Miller, L. D. Brady, Otis N. Shedd, James L. Holden and Isaac N. Hardin, Aurora, Ill. The board will consist of seven members. The company proposes to construct, equip and operate a line of railway from Chicago in a westerly direction to the northern boundary of Illinois. This

line, as projected, will be about 140 miles in length. Another line to be constructed by this company will extend from a point upon the line described, in Du Page County, in a southerly and westerly direction to the western boundary of the State opposite Muscatine. The first of these lines will be designated the main line of the St. Paul division and the second will be designated the main line of the Omaha division of the proposed railway. The latter is projected for a distance of about 150 miles. The company also proposes to construct the South Chicago branch, extending to the eastern line of the State near Lake Michigan, 10 miles; a branch from the main line, near Fox River, to Batavia, St. Charles and Elgin, 20 miles; a branch from the main line in Ogle county to Rockford, 15 miles; a branch from the main line in Ogle County to Polo and thence to the Mississippi Rive, 55 miles; a branch from Plainfield, Will County, to Joliet and thence to the coal fields in Will County, 35 miles; a branch from Lisbon, Kendall County, to Streator, with a sub-branch to Morris, 35 miles; a branch from the main line in La Salle County to Ottawa, 8 miles; a branch from the main line in La Salle County to the towns of La Salle and Peru, 10 miles, and a branch from the main line to Rock Island and Moline, 12 miles. The capital stock is $10,000,000.

The Coal Trade

The leading coal carrying companies make the following reports of their tonnage for the week ending September 3, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad	186,605	5,726,671	4,916,276
Schuylkill Canal	21,269	376,796	280,819
Lehigh Valley	112,102	4,157,012	3,233,831
Del., Lack. & Western	91,489	2 769,185	2,174,595
Shamokin Valley	17,815	710 209	545,674
Central New Jersey.	.....	2,795,155	2,193,157
United R. R. of New Jersey	32,706	1 017,586	714,465
Pennsylvania Coal	33,329	879,857	670,358
Delaware and Hudson	77,876	2,333,341	1 889,487
Huntingdon & Broad Top Mt.	13,448	345,744	298 283
Penn. and New York.	30,543	1,092,915	809 583
Clearfield, Pa.	41,053	1,610,666	1,060,013

The total tonnage of anthracite coal from all the regions for the week ending Sept. 3, as reported by the several carrying companies, amounted to 550,156 tons, against 641,823 tons in the corresponding week last year, a decrease of 91,667 tons. The total amount of anthracite mined for the year is 18,115,457 tons, against 14,351,853 tons for the same period last year, an increase of 3,763,604 tons. The quantity of bituminous coal sent to market for the week amounted to 96,953 tons, against 112,053 tons in corresponding week last year, a decrease of 15,100 tons. The total amount of bituminous mined for the year is 8,234,049 tons, against 2 802,039 tons for the corresponding period last year an increase of 432,010 tons. The total tonnage of all kinds of coal for the week is 647,109 tons, against 753,876 tons in corresponding week last year, a decrease of 106,767 tons, and the total tonnage for the coal year is 21,349,506 tons, against 17,153,892 tons to same date last year, an increase of 4 195,613 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending August 27, was 182,872 tons, of which 143,341 tons were coal and 39,531 tons coke. The total tonnage for the year thus far has been 5,849,323 tons, of which 4,250,434 tons were coal and 1,598,889 coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 3 were 39,080 tons, and for the year to that date 1,365,831 tons, a decrease of 41,190 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 25,840 tons; year, 883,058 tons; increase as compared with 1880, 6,829 tons; Chesapeake and Ohio Canal—week, 6,653 tons; year, 303,501 tons; decrease as compared with last year, 75,548 tons. Pennsylvania Railroad—week, 6,561 tons; year, 177,940 tons; increase compared with 1880, 25,697 tons. The Reading Railroad tonnage for last week ending Sept. 10, was 181,000 tons, of which 57,000 tons were sent to and 54,500 tons shipped from Port Richmond, and 14,000 tons sent to and 13,300 tons shipped from Elizabethport.—[Phila. Ledger, Sept. 12.

Tidewater Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st ult. inclusive, during the years 1880 and 1881, was as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.	Barley, bush
1880.	4,300	16,636,600	20,889,400	47,000
1881.	5,600	9,059,900	10,929,400	48,200
Inc.	1,300	†7,576,700	†9,960,000	Inc. 1,200

†Decrease.

By reducing the wheat to flour the quantity of the latter left at tidewater this year, compared with the corresponding period last year shows a decrease equal to 1,514,040 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tidewater from the commencement of navigation to and including the 31st of August, in the years indicated:

	1879.	1880.	1881.
Canal opened	May 8.	April 20.	May 17
Flour, bbls.	4,100	4,300	5,600
Wheat, bush.	10,916,600	16,636,600	9,059,900
Corn, bush.	8,700,700	20,889,400	10,929,400
Barley, bush.	15,700	47,000	48,200
Rye, bush.	811,200	453,200	131,400
Oats, bush.	776,300	847,700	861,300
Malt, bush.	226,100	571,700	490,800
Feed, lbs.	488,600	.....	141,200

The Framingham and Lowell Railroad, which was opened to the public in 1871, was sold at public auction September 10 at South Sudbury, Mass., on an execution issued in favor of the Boston, Clinton, Fitchburg and New Bedford Railroad Company, for $379,129 35, and $88 24 cost of suit. The franchises and property were sold subject to an existing lease to the Boston, Clinton, Fitchburg and New Bedford Railroad Company, and to a first mortgage made to secure bonds to the amount of $500,000.

Herepath's Railway Journal says it is a remarkable fact that the two best paying lines in England have their termini at Cardiff, and are both mineral lines. The Taff Vale Railway Company have just declared a dividend of 10 per cent., with 6 per cent bonus, which is equal to 16 per cent per annum, while that of the Rhymney Railway Company is 11 per cent.

The location of the line of the Toronto and Ottawa Railway has been completed. The route throughout is described as a good one, and easy of construction. The measured distance between the points above named is 117 miles and from Peterborough to Toronto via Port Hope 94 miles, making a total from Toronto to Perth via Port Hope and Peterborough of 211 miles, which will be 37 miles shorter than via Brockville.

How Queen Victoria Travels.

A late number of the London Times gives an account of the recent trip made by Queen Victoria to Balmoral, etc., in the royal saloons provided for such occasions. Superintendents of the railroads always take charge of the trains whenever the Queen travels, and upon the occasion referred to "the utmost precautions were taken for the safety of Her Majesty during the journey, very detailed instructions being issued to the various railway officials for the purpose, and it was distinctly stated that on the occasion none of the public were to be admitted, under any circumstances, to the stations between Banbury and Edinburgh; that the company's servants were to perform the necessary work on the platforms without noise; and that no cheering or other demonstration was to be permitted, the object being that the Queen might be undisturbed during the night journey. The royal train was provided with a complement of fitters, lampmen and greasers, and was preceded by a pilot engine; it was furnished with continuous brakes and electric communicators. A 'look-out man' was placed on the tender of the engine with instructions to keep his face turned to the rear of the train for the purpose of observing signals, and similar orders were given to the guard in the front van."

Twenty of Marden's patent cars, that can be used as coal cars or changed in a moment to a platform car by an ingenious arrangement, are being built at the Boston and Albany Railroad car shops. They are equipped with the Ames patent drawbar, that is self-shackling.

The famous Rigbi Railway in Switzerland had more than two thousand people to carry up the mountain in a single day, not long ago, and proved inadequate to the task.

It is expected that the first one hundred miles of the Danville, Olney and Ohio River Railroad, the construction of which is being rapidly pushed, will be in operation very shortly.

There is now a surplus in the Treasury of Georgia of $332,000, and it is expected that the balance in the Treasury on the 1st of October will be $561,000. The State is entirely free from debt.

Track laying is now completed on section A, Canadian Pacific Railway, giving a continuous line of rail from Thunder Bay to Eagle Lake, the easterly end of Section B.

The rails are being laid upon the new railroad between Marlton and Medford, Burlington county, N. J., and it is expected that the track will be completed by the 1st of October.

The Rochester and Pittsburg Railroad, which is being pushed with a great deal of energy, is expected to be completed in the autumn of 1882, with a branch to Buffalo.

It is stated that the Minister of Public Works has given orders to survey a direct railway line from Naples to Rome via Gaeta and Terracina.

Philadelphia and Reading Railroad.

The properties of the Philadelphia and Reading Railroad Company, either owned or leased, are as follows:

First—846.3 miles of railroad—306.1 miles double track and 556.2 miles of coal lateral lines and sidings, in all equal to 1708.6 miles of single track with 506 locomotive engines and 20,726 cars of all kinds, and machine and other shops and conveniences necessary for repairs and reconstructions.

Second—156.23 miles of canal and slackwater navigation, with 322 canal barges, 319 mules, and other equipment necessary for working these properties.

Third—14 steam colliers, with tonnage capacity of 15,600 tons, together with 66 coal barges, two schooners and two steam tugs for use at Richmond terminus in distributing coal to the various points along the coast.

Fourth—160,566 acres (251 square miles) of land, 91,149 acres (142 square miles) being anthracite coal lands, which is nearly 30 per cent of all the anthracite coal fields in Pennsylvania. There are 78 workable collieries on the properties owned and controlled by the company, but 63 only were worked last year.

Fifth—15,010 acres of iron ore lands, with five workable ore-banks or mines, representing a cost of $655,819 50.

Sixth—14 iron furnaces for the manufacture of pig metal, two iron-rail mills, and five other manufacturing establishments.

The ownership or control of these various properties, including the company's guaranty obligations, and a considerable investment in stock and bonds of properties controlled by lease or otherwise, represent a capitalized cost of $207,999,321 64.

Pullman Palace Car Company.

The following statement of the Pullman Palace Car Company for the year ending July 31, 1881, was presented at the recent annual meeting of the stockholders in Chicago:

REVENUE.

Earnings (leased lines included)		$2,355,266 33
Our proportion of earnings of other sleeping car associations controlled and operated by this company		481,573 25
Patent royalties		12 234 00
Manufacturing profits, Detroit shops		133,313 27
Profit and loss, including interest, discount and exchange		13,109 23
Total		$2,995,496 08

DISBURSEMENTS.

Operating expenses, including legal expenses general taxes and insurance (leased lines included)	$768,310 19	
Maintenance of upholstery and bedding (leased lines included)	175,499 11	
Our proportion of operating expenses and maintenance of upholstery and bedding in cars of other sleeping car associations controlled and operated by this company	132,600 00	
Rental of leased lines	261 000 00	
Interest on bonds	191,867 01	
Dividends on capital stock	482,166 00	
		2,014,442 67
Surplus for the year, being excess of revenue over ordinary disbursements		$981,053 71

ASSETS.

* 502 cars and equipments, including franchises, cost		$9,020,600 58
* Amount invested in other car associations controlled and operated by this company, cost		2,491,904 05
Stock in Union foundry and Pullman car-wheel works		22,500 00
Real estate and plant, Detroit shops		370,520 84
Real estate and plant, 492 acres of land, Chicago car works, homes for workmen and other improvements at Pullman, Ill		2,545,904 96
Real estate and plant, St. Louis repair shops		43 012 99
Real estate, Chicago		22,001 66
Lumber		613,198 26
Other construction material and operating supplies, including cars in process of construction		841,157 75
Patents, United States and foreign		184,383 43
Furniture and fixtures in the several offices of the company, 52 in number		65,725 69
Cash		87,156 89
Total		$16,308,097 10

LIABILITIES.

Capital stock issued, 80,209 shares, par value $100 each		$8,020,900 00
Fractional scrip		2,900 00
Outstanding bonds—		
Eight per cent currency debenture bonds:		
Third series, due February 15, 1887	$445,000 00	
Fourth series, due August 15, 1882	820,000 00	
Seven per cent currency debenture bonds, due October 15, 1888	908,000 00	
Seven per cent sterling debenture convertible bonds, due April 1, 1885	49,500 00	
		2,222,500 00
Amount received from sale of old cars leased from Central Transportation Company		423,156 80
Balance of accounts payable and receivable		497,933 62
		$11,167,390 42
Surplus—		
Invested in the assets of the company	$5,376,163 16	
Less written off during the year for loss on old cars sold or destroyed, replaced by new; do. on account Atlantic S. S. Co., and adjustment of its account with Erie Railway Co. (our proportion); also for estimated depreciation in B. & O. association cars (our proportion;) also doubtful accounts written off.	235,456 48	
		5,140,706 68
Embraced in the following accounts:		
Guarantee fund account	15,728 55	
Depreciation acc't	960,000 00	
Income account	4,224,978 13	
	$5,140,706 68	
Total		$16,308,097 10

* Total number of cars operated (exclusive of Pullman Southern Car Company), 734.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Sept. 15, 1881.

In the money market this morning call loans ranged from 4 to 6 per cent; time loans were 5@6 per cent, and prime mercantile paper about the same. In the afternoon the quotation for call loans at the Stock Exchange was 6 per cent; and at the close it was 5@6 per cent.

The posted rates for prime bankers' sterling were 4.81@4.84⅛; the actual rates were 4.80@⅛ and 4.83⅛@4.84, with cable transfers 4.84⅛@¾ and prime commercial bills, 4.78½@¾. The actual rates for continental exchange are as follows: francs, 5.25⅝@5.26¼; marks, 93¾@94⅜, and guilders, 39⅝@39⅞.

The Refunding Committee of the City of Williamsport, Penn., are now engaged in exchanging the old Williamsport 6s, for the new 4s. The defaulted interest on the old bonds is paid either in cash or new 4s, at the option of the creditor.

The Sinking Fund Commissioners have unanimously confirmed the action of the Southern Railroad trustees in leasing to Frederick Wolff, for 25 years, the Cincinnati Southern Railroad. The lessee, who, it is said, represents the Erlangers, has agreed to deposit half a million in bonds to secure payment to the present license and for the rolling stock. Possession will probably be given on the 1st of October. The Cincinnati Southern will thus become a part of the system of which the Alabama Great Southern is the main line.

The directors of the Pullman Palace Car Company, at their meeting in Chicago on the 10t

inst., approved an official circular for distribution among the stockholders, setting forth that the money realized from the increase of the capital stock and the surplus revenues of the company have been expended in building car works, &c., at Pullman, Illinois, and in devoting over $1,500,000 to increase the rolling stock and construction material, to its equipment and to the payment of its debenture bonds; that the interrate of the company require a further expenditure of $2,000,000 upon its railway, water, sewerage and other improvements, including 750 more homes for its workmen; that the income from these investments will be a fair return for the outlay, and authorizing 25 per cent increase of the entire capital stock of the company, giving stockholders the option to subscribe at par for the new stock pro rata, all shares subscribed for to be paid for on or before November 16. The new stock will commence earning dividends November 1, 1881.

The closing quotations on Thursday were: Adams Express, 137@138; American Express, 88@89; American District Telegraph, 50@54; Chicago, Burlington and Quincy, 161@162; Canada Southern, 65⅛@65¾; Chicago and Northwestern, 126¼@126⅜; do. pref., 139¾@140; Central of New Jersey, 95¼@95⅝; Chicago and Rock Island, 137@138; Central Pacific, 91⅛@91⅜; Chicago, Milwaukee and St. Paul, 119¾@119⅞; do. pref., 131¾@133; Cleveland, Columbus, Cincinnati and Indianapolis, 91½@92; Columbus, Chicago and Indiana Central, 21½@21¾; Delaware and Hudson Canal, 109⅛@109⅜; Delaware, Lackawanna and Western, 126@126¼; Hannibal and St. Joseph, 250@350; do. pref., 113¼@114; Illinois Central, 131@131⅛; Lake Erie and Western, 54@55; Lake Shore and Michigan Southern, 123⅛@123⅝; Metropolitan Elevated, 83¾@84⅛; Manhattan Elevated, 213¼@217⅛; Michigan Central, 93¼@93⅜; New York Elevated, 107¼@107¾; New York, Lake Erie and Western, 43⅜@43½; New York Central and Hudson River, —@141¾; Ohio and Mississippi, 44½@45; Ohio Central, 28⅛@28½; Texas and Pacific, 52@52⅛; Union Pacific, 123⅜@123⅝; United States Express, 70@70½; Wells Fargo Express, 130@132; Western Union Telegraph, 89⅜@89½; Wabash, St. Louis and Pacific, 50¾@51; do. pref., 88⅛@88⅝.

The following quotations of sales of Railwa and other securities, for the week, are in addition to those given elsewhere in our columns:

Minnesota State Railroad Bonds.

The Supreme Court of Minnesota on the 10th inst. rendered a unanimous decision in which it settles two pre-eminent and principal questions in regard to the Minnesota State Railroad bonds. First, it holds that the question presented to it is primarily whether a writ of prohibition can issue to retain the tribunal created by the law of last winter from action. The Court says it is first met by the objection that the act of last winter is void, because the constitutional amendment of 1860, declaring that no provision shall ever be made for the payment of the State railway bonds without a submission to the people, prohibited the Legislature from passing the act in question, which was a measure making provision for the payment. The validity of the amendment of 1860 is thus directly involved. If valid, it withdrew from the Legislature the power to make provision for the payment of the bonds, while if void, of course, it could interpose no obstruction. If invalid, it is upon the ground that it impairs the obligation of contracts, and so is in violation of section 10 of Article I of the Constitution of the United States. A contract of this character is not a contract within the meaning of the clause of the United States Constitution, because there is no judicial remedy for its enforcement. The Court refers to the preposterous consequence of holding that the hundreds of millions of State bonds in existence had no obligation which could be impaired by legislation because no judicial remedy existed for their enforcement where the Judges, who were contemporaneous with the adoption of the Constitution, held that the clause against impairing the obligation of contracts protected the executory contracts of States, and says that no decision since that time has ever held or intimated the contrary. The analogous cases of municipal bonds are freely referred to. The Court sees no distinction in principle between what a Legislature may do in repealing a law providing for municipal taxation and one providing for taxation directly by the Legislature of each State to pay the obligations of the State. A different Governmental department is intrusted with the duty, but it is as much the duty of the Legislature in the one case as of the Courts in the other.

The Court then proceeds to inquire whether the restraint upon the Legislature, requiring a submission to the people, merely affects the remedy, and concludes that, withdrawing the absolute power from the Legislature, and prohibiting their action without a vote of the people, practically interferes with and impairs the obligations of the contract. Cases are cited in support of this from decisions on Municipal bonds, holding that the addition of the requirement that the consent of an additional party to the performance of a contract, if it is entered into, is null and void as impairing the contract obligation. Having thus arrived at the conclusion that the constitutional amendment is void, the Court devotes the remaining part of the opinion to showing that as the act attempts to shift the responsibility of deciding this question from the Legislature, which ought to have decided it, to the tribunal created for the purpose, it is void, as being a delegation of legislative power.

Illinois Central Railroad.

During the month of August, 1881, the traffic on the lines operated by this company was: (estimated)

In Illinois	$649,984 00
In Iowa (Leased Lines)	182,402 00
Total	$832,386 00

—being the heaviest August traffic the road has ever done.

The traffic for the same month in 1880, on the same mileage, was: (actual)

In Illinois	$594,945 98
In Iowa (Leased Lines)	137,808 71
Total	$732,754 69

During August, 1881, the Land Sales were 1,376.93 acres for $7,224 82 and the cash collected on Land Contracts was $8,301 18.

L. A. Catlin, Secretary.

N. B.—A Dividend of $3 50 per share was payable September first.

Cincinnati Iron Market.

Reported by E. L. Harper & Co.

Cincinnati, Sept. 13, 1881.

The market is stronger than reported last week owing to the advance in prices of manufactured iron. Consumption is great but the stock of raw material is light. We quote as follows:

	No.		Mos.
FOUNDRY.			
Hanging Rock Charcoal	1	26 00@27 00	4
Strong Nutral Coke	1	22 50@23 50	4
American Scotch	1	20 00@21 50	4
GREY FORGE.			
Neutral Coke		20 00@21 50	4
Cold Short		19 00@20 00	4
CAR WHEEL AND MALLEABLE.			
Hanging Rock Cold Blast		36 00@38 00	4
" Warm "		30 00@32 00	4
Lake Superior 1 and 2		32 00@33 00	4
Lake Superior 3 to 6		34 00@36 00	4
Southern Car Wheel		34 00@35 00	4

The work of laying telegraph lines in China is being vigorously pushed. They are working between Soochow and Shanghai, but only for official business.

The Mexican Central Railway Company has received advices from the Mexican Government that the latter has accepted the road from Mexico to Tula—the first 93 kilometres of the main line—and that the Mexican National or Independence Day, September 16, has been appointed for the celebration of the work. In October 150 kilometres of the road will be railed, when the company will be entitled to $1,125,000 in subsidy upon this section.

The Baltimore and Cumberland Valley Railroad, which was opened on the 12th inst., extends from Edgemont on the west side of the Blue Ridge Mountain, to Shippensburg, Cumberland county, Pennsylvania, by way of Waynesboro and Chambersburg, and is an extension of the Western Maryland Railroad in a northwesterly direction. It crosses the Cumberland Valley Railroad at Chambersburg.

The lines of the Philadelphia, Wilmington and Baltimore Railroad formally passed into the control of the Pennsylvania Railroad Company on the 1st inst. Official changes were made some time ago, and the executive duties of the new acquisition are performed by the heads of departments of the Pennsylvania Railroad, whose system is now in full force.

All the telegraph line, property, and estate formerly belonging to the Bankers' and Brokers' Telegraph Company, between the cities of New York and Washington, has been conveyed to the Western Union Telegraph Company for the sum of $120,000. The conveyance was made by John H. Wells and wife.

"The Erlanger system," which has leased the Cincinnati Southern Railroad, is made up of the following roads: the Alabama Great Southern, 290 miles; the Vicksburg and Meridian, 142 miles, and the Vicksburg, Shreveport and Pacific, (in progress), length of road in operation, 73 miles.

The roadbed of the Oregonian Railway Company (narrow gauge) has been graded all the way from Brownsville to Coburg, Lane county, and it is expected trains will be running by October 1st, in time to carry off this year's grain crop.

The product of the Quincy Mining Company for August, is: Barrel work 600,840 lbs.; masses 34,410 lbs.; total 635,250 lbs., or 317 1250-2000 tons, against 400,555 lbs., or 200 555-2000 tons same month last year.

The permanent location of the Memphis and Vicksburg Railroad has been commenced, starting from the west bank of the Yazoo river.

A branch of the Lehigh Valley Railroad is to be built from Landsdown, a depot on that line, to Clinton, N. J.

Fifty miles of track were laid on the Rio Grande Division of the Texas and Pacific Railway during the month of August.

Arrangements are in progress to run the street cars of Rochester by means of compressed air furnished by machinery operated by the Genesee Falls. It has been demonstrated that a street car charged with air compressed to 350 pounds will run twenty miles with a loss of 250 pounds. Stations will be erected throughout the city for the different lines to load, and a complete success is anticipated.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

PAPIN, THE INVENTOR OF THE STEAM-ENGINE.

IN January, 1705, Leibniz sent to Papin a sketch of Savery's engine for raising water. This set Papin with renewed vigor to work, besides stimulating to emulation the breast of his patron, the Landgrave of Cassel. After some consideration he pronounced in another letter to Leibniz that he would surpass Savery's invention. He related how he had thought it best not to let the steam act directly against the surface of the water (as in Savery's machine), but that the pressure of the steam should be imparted to the water through the intermediation of a piston, whose surface, becoming hot, would not produce condensation; and he added that experiment had proved the conjecture to be sound.

His great difficulty now was, not to make pistons fit accurately, but to construct tubes sufficiently strong to bear the pressure of such columns of water as he wished to raise. Leibniz congratulated him when replying in August, and advised him not to try to force water high, but rather to lift it by a series of pumps, each drawing 30 feet, a suggestion which Papin on his part rebutted by observing that one force-pump driving water 500 feet high was more economical than 10 pumps, each raising the water 50 feet. He further lets Leibniz know that he hopes to do away with the delay of letting the cylinder of his engine cool between each stroke (the very first of the improvements subsequently made by Watt), and that he has some idea about the transmission of power to a distance, with which problem, however, he thinks it useless to concern himself, "because by means of the heat-engine one can produce, every where one will, so much power, and so cheaply, that it would be a superfluous expense to carry it elsewhere." Strange commentary, indeed, on the present eager strife of inventors to supersede steam by the electric transmission of power! On Oct. 10, he writes again that he is almost satisfied with his engine, which, though having but one cylinder and two valves, yet furnishes a continuous jet, surpassing Savery's machine, which had two pressure-vessels and four valves; he is only waiting the Landgrave's order, as to how he shall apply his engine to drive a mill.

On the last day of the year 1705 he declares to Leibniz his intention of propelling vessels by steam, as he is persuaded that by this means one could have vessels which would follow their course correctly in spite of tempests and adverse winds. At this idea he labored diligently for the next two years—in fact, so long as he continued to remain at Cassel—his devotion to the object in hand being remitted only for the sake of his correspondence and for the work of publishing his treatise, the "Ars Nova," in which his high-pressure boiler and its applications are described. It was toward the close of this time that (on Feb. 4, 1707,) he communicated to Leibniz the first suggestion of a hot-air engine, afterward realized by Stirling and Ericssen. He was now preparing to leave Cassel, where the patronage of the Landgrave had grown on the one hand slack, on the other irksome, in order to regain the more congenial atmosphere of London and of the Royal Society. He strained every nerve and spent all his little resources to accomplish the building of the steam-propelled boat by which his return to England was to be made famous. He was certain that by this means two men on board his boat might do more than a hundred rowers could.

In July and August of that year he made diligent efforts to obtain permission to descend the river via Munden and Bremen into the Veser, permission which was finally granted by the Elector of Hanover, in spite of the monopoly possessed by the guild of boatmen of Munden to pass boats from the Fulde into the Veser. With a boatman of Munden as captain, he sailed from Cassel on Sept. 24, 1707, with his family. At Munden, however, the guild of boatmen asserted their privileges, the magistrates pronounced the boat confiscated, and a handsome offer of ransom was rejected. Papin pushed forward desparingly for England, only to find himself almost unknown and friendless. The old generation was fast passing away. For two or three years he continued his mechanical inventions, and several times applied through Sloane for a grant of money from the Royal Society to aid him in his work, but in vain. Misunderstanding and misery followed apace. The inventions on which he relied for fame and position were passed by unnoticed. In the loss of his ship he made shipwreck of his life's hopes. He died in London, probably in the early half of the year 1722, but in such obscurity that neither place nor date is with any certainty known.—*Nature.*

THE FALL OF THE STEAM-ENGINE.

THE steam-engine has been coming in for some disparagement at the meeting of the British Association. According to some leading members of the body the steam-engine has had its day—its part is played. It will before long, we are assured, be seen only in museums. It is needless to say, however, that the scientific men of the British Association do not speak lightly of the steam engine for the same reasons which induce Mr. Ruskin to contemn and denounce it. Mr. Ruskin objects to all inventions and appliances which bring crowds of uncultured persons to interfere with the meditative seclusion of the cultured few, or the cultured one; which enable rude inquiring tourists to roam over hillside and lakeside, and "to spoil for him the earth and skies." The scientific men object to the steam-engine and talk slightingly of it because they think it is not up to the work which the age requires; because it spends too much force with too little result. They want a better force than that which drives the steam-engine, more locomotion, quicker travel, involving, of course, greater diffusion than ever of the uncultured among the scenes hitherto claimed by some as sacred to the cultured. For ourselves, we have no rooted prejudice in favor of the steam-engine. We are quite willing that it should go, if only something better, swifter, safer, and less noisy should come to take its place. It had its merits, undoubtedly, and was a very useful piece of mechanism in its day. But if its day be done, we are quite ready to welcome the coming guest and speed the parting one to its place in the South Kensington Museum.—*London Daily News.*

Chief Engineer Montague of the Central Pacific Railroad states that he has received advices from the surveying party under Engineer Warner, which started east from Ogden some weeks since to examine the new line for an extension of the Central Pacific to the Missouri River. He reports finding a favorable line with grades not exceeding 53 feet per mile, with an open and productive

country all the way from Salt Lake to Fort Fetterman via South Pass. Warner's Party will continue on east until met by a party working west. It is claimed that a better road than the present one east of Ogden can be built for one-third the cost.

Western Union Telegraph Company.

FOR THE QUARTER ENDING SEPTEMBER 30, 1881.

EXECUTIVE OFFICE,
WESTERN UNION TELEGRAPH COMPANY.
NEW YORK, September 14, 1881.

In the Report presented by the Executive Committee at the last Quarterly Meeting of the Board held June 8, 1881, the net revenue for the quarter ending June 30 (May being partially and June wholly estimated) were stated at $1,836,391 00.

The official returns for the quarter (ended June 30) showed the net revenues to be $1,842,844 22 or $61,458 22 more than the estimate.

The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended June 30, 1881:

Surplus, April 1, 1881, as per last quarterly report		$1,231,998 58
Net revenues, quarter ended June 30, 1881		1,842,844 22
		$3,074,842 80
From which deducting appropriations for—		
Two dividends of 1½ per cent on capital stock	$2,400,000 00	
Interest on bonded debt	106,788 06	
Sinking funds	20,000 00	
Construction	204,732 62	
Telegraph stocks, &c.	216,063 36	
		2,947,584 04
Leaves a surplus, July 1, 1881, of		$127,258 76

This surplus does not include the cash turned over by the American Union Telegraph Company, amounting to $238,000; nor does it include the new material turned over by that company, and which cost about $225,000, which are held for payment of liabilities of that company until the final balance shall be ascertained.

The net revenues for the quarter ending September 30, instant, based upon official returns for July, nearly complete returns for August, and estimating the business for September, will be about		$1,949,894 61
Add surplus, July 1, as above		127,258 76
		$2,077,153 37
From which appropriating for—		
Interest on bonded debt	$107,000 00	
Construction and purchase of telegraph stocks and properties	300,000 00	
Sinking funds	20,000 00	
		427,000 00
Leaves a balance of		$1,650,153 37
It requires for the payment of a dividend of 1½ per cent on the capital stock		1,200.000 00
Deducting which, leaves a surplus, after paying dividend, of		$450,153 37

In view of the preceding statements, the committee recommend to the Board of Directors for adoption, the following:

Resolved, That a dividend of one and one half per cent on the capital stock of this company be and is hereby declared out of the net revenues of the quarter, payable on and after the fifteenth of October next to stockholders of record, at the close of the stock books on the 20th of September, instant.

Resolved, That for the purpose of such dividend, the books for the transfer of capital stock in this company be closed at three o'clock p. m. on Tuesday, the 20th of September, instant, and be reopened on the morning of the 17th of October following.

Respectfully submitted,
NORVIN GREEN, President.

Commerce of New York.

The foreign imports at New York for the month of August, were:

	1880.	1881.
Entered for consumpt'n.	$20,804,185	$23,688,448
Do. for warehousing	8,688,329	7,354,500
Free goods	9,939,602	11,831,129

Total entered at port	$48,924,596	$48,166,881
Withdrawn fr. wareh'use	10,044,789	9,682,684

The foreign imports at New York for the eight months from January 1, were:

	1880.	1881.
Entered for consumpt'n	$164,803,772	$148,563,427
Do. for warehousing	86,149,879	61,673,279
Free goods	82,755,641	81,836,585
Specie and bullion	14,660,362	35,672,555
Total entered at port	$348,369,154	$327,445,800
Withdrawn fr. wareh'se	57,729,686	64,603,710

The duties received at New York for the eight months ending with August, were:

	1880.	1881.
Six months	$71,088,623 16	$68,641,439 07
July	13,360,394 37	12,079,573 95
August	14,492,361 87	15,204,469 58
Total	$98,891,279 40	$95,925,482 60

The exports from New York to foreign ports for the month of August, were:

	1880	1881.
Domestic produce	$35,937,898	$34,497,968
Foreign free goods	113,355	419,315
Do. dutiable	398,094	301,632
Specie and bullion	400,029	967,789
Total exports	$36,849 375	$36,186,699
Do. exclusive of specie	36,449,347	35,218,960

The exports from New York to foreign ports for eight months from January 1, were:

	1880.	1881.
Domestic produce	$265,802,243	$242,090,097
Foreign free goods	1,774,108	5,820,260
Do. dutiable	8,036,700	4,028,617
Specie and bullion	5,580,011	8,367,988
Total exports	$276,193,062	$261,306,962
Do. exclusive of specie	270,613,051	252,938,974

Propeller for the Erie Canal.

The following is a description of a new propeller which is now being constructed with a view of obtaining the prize offered by the Erie Canal Co.:

The vessel is built like an old-fashioned scow, is 61½ feet long by 30 feet beam, and draws two feet of water amidships. The bottom is V shaped from stem to stern, and has five keels aft of the centre, running out to the stern. Forward of the centre the five keels extend 7½ feet. On the forward deck is placed an upright high-pressure boiler of 15-horse power. Just behind this is the engine, which has a large fly-wheel, 4 feet in diameter. On the deck is a large air-box, extending almost across the boat, from the under side of which four square tubes run down perpendicularly into the water. A large fan is placed on the air-chamber, and the air is forced directly downward into the water between the five keels. The propelling power is given to the boat simply by the air rushing between the keels and pressing the water out at the stern. When in motion the air rushing out gives the boat the appearance of a stern-wheel propeller, although she leaves no perceptible wake. The boat easily makes five miles an hour.

Northern Pacific Railroad.

The report of the directors of the Northern Pacific Railroad Company for the year ending June 30, 1881, which was presented at a meeting of the stockholders held in this city on the 15th inst., shows that the mileage is 758 miles, not including 311 miles used chiefly for construction purposes. The increase in working mileage for the year was 32 miles. The following is a comparative statement of the earnings for the years ending June 30, 1880 and 1881:

	1880.	1881.
Freight	$1,588,556 57	$2,207,299 13
Passenger, express & mail	636,479 32	782,800 25
Miscellaneous	5,149 92	4,420 11
	$2,230,181 81	$2,994,519 49

—showing an increase for the year of $764,337 68, equal to 34.27 per cent. The expenditures in 1880-'81 were:

Operating expenses	$1,791,553 78	
Rentals	152,648 49	
Taxes	77,286 58	
		2,025,390 90
—equal to 67 63 per cent, leaving a balance of		$969,129 19

The main line from Thomson Junction (near Duluth) to a connection with the Oregon Railway and Navigation Company's line at Wallula Junction is 1,684 miles.

Of this distance the following is completed and in operation:

On the eastern end—	
Thomson Junction to a point 25 miles beyond Glendive, in Montana	668 miles
On the western end—	
From Wallula Junction, in Washington Territory, to a point 200 miles east thereof	200 miles
	868 miles.
Leaving to be constructed to complete the line between Lake Superior and the Pacific coast	816 miles.

THE financial statement of the Finance Minister of the Dominion of Canada shows that the total revenue of the government for the year 1880-'81, was $29,712,063 97, the total expenditures $25,579,168 37, and the total surplus $4,132,895 60. In 1879-'80 the revenue was $28,468,505 19 and the expenditures $25,161,712 66, showing a deficit of $1,693,127 47.

THE Toronto, Grey and Bruce Railway has passed into the hands of William Hendrie, of Hamilton, and E. B. Osler and William Ramsay, of Toronto. They command three-fourths of the stock and intend to make the line a first-class one in every respect by the 1st of Nomber.

THE name of the Columbus and Miami Valley Railway Company has been changed to "Columbus and Cincinnati Railway Company." A. F. Gatch is President of the company.

New York, Saturday, September 24, 1881.

Entered at the Post Office at New York, N. Y., as Second-Class Mail Matter.

GEN. THOMAS T. ECKERT, general superintendent of the Western Union Telegraph Company, has explained to F. H. Parker, president of the New York Produce Exchange, some of the causes which have led to complaints about delays in the transmission of messages from the Exchange to the West, concerning which Mr. Parker recently wrote Mr. Eckert, asking that the company provide additional telegraphic facilities. General Eckert considers the facilities of the company for the transmission of despatches to be more than adequate for the demands of ordinary business, but says that unforseen requirements and causes arising from the assassination of the President, the increase in commercial messages and the extended forest fires seriously interfering with the working of the wires, have occasioned the delays complained of. In consequence of the extraordinary demands upon the company the erection of about ten thousand miles of new wire has been undertaken with about as much more planned, and it would seem that every effort is now being made to give ample accommodations to the public.

THE FAITH THAT LEADS THROUGH THE GLOOM.

BOWING reverently before the will of an Infinite power our people with trembling lips and broken voices, but with faith in their country and their countrys' God still held to as in trying days of old, speak in a tender regret of what might have been, but in strong resolve look forward with hope to what shall be. In the terrible struggle of eighty days after a most heroic fight for life in which "The People" My Trust" was the sacred watchword, our honored and beloved President has passed away. He is not dead. Such men do not die. Enshrined in the hearts of their countrymen, their lives are everlasting as are the truths and principles for which they have labored, and their spirits lead on in the grand march over the paths which their wisdom and lofty examples have laid for the advancement of mankind.

The paths which were marked out by President Garfield both in his private and official career are as clearly defined and unmistakable as were the prominent traits of character and granite-founded principles of this noble man. To the nation, from a political and business standpoint, the clearness with which his policy and plans have been made apparent, even during his short labor in executive duties, is proving a strong anchor, and by it the danger of panic and confusion is averted even in the midst of the troubled waters. There is no mistaking his aims. They had been clearly presented before his sudden prostration, and during these weeks of terrible suspense they have been indelibly impressed upon the public mind. His aims and wishes, prayed over and studied by the bedside of the heroic sufferer, are now held in sacred memory by a united people, while the principles he inculcated in private and public life form a nation's cherished heritage. So true is this that those most experienced in the affairs of Government and business alike agree in the opinion that the change in the Executive will be unaccompanied by any marked variation of policy or any important influence upon commercial and financial interests. To this business view is added the reassuring belief that in President Arthur will be found a man of experience and strength to bear the mantle which has fallen with a chastened benediction upon him.

In the life of James A. Garfield, from the time when as a poor boy he struggled manfully for existence, looking for sympathy and encouragement only in the wealth of love of that now almost sainted mother's heart, to the hour when he passed from a high and honored sphere to a higher and more honored, leaving behind him a mourning world; all through this active, earnest, noble life there has been a development of character and a presentation of principles which stand as magnificent examples of the possibilities of a true Christian manhood in private and in public life. The good which he has done cannot be measured. It is bearing rich fruit in these hours of mourning, and it will continue to influence his fellow men to deeds of patriotism and heroic strength and to a more faithful love of truth and duty long after his life's record has added to history one of its most sublime and touching pages.

The hearts of the people have been touched in the tenderest manner by the glimpses of home-life which this terrible trial has given. The purity, the devotion and the refined simplicity which have been so constantly exhibited from the time the Presidential party left their Ohio home to the time in which we see the sadly broken circle returning over a pathway strewn with flowers but draped in mourning, have given to the world a nobler ideal of home-life and a higher conception of the possibilities of true womanhood and the marvellous power of a noble hearted mother's and wife's devotion. In these busy days down here in the whirl and strife of money handling it is well that the thoughts of men are turned reverently toward that gray haired mother in the West who waits the return of her son with breaking heart but with unshaken faith in the wisdom of that Providence which has led her in such varied and honored ways. In looking upon her and remembering the help and training she gave to her boy, can be seen the characteristics and the means by which this magnificent type of a true American gentlemen was developed. The hearts of men turned to her will be turned again more tenderly than ever before to other mothers throughout the land, and a stranger appreciation will be given of the strength of home and social influence.

While the nation is wearing its deepest mourning and drinking of a bitter cup which it had prayed might pass away untasted, there is brought to mind that trying day, when after the assassination of President Lincoln the words of James A. Garfield stilled the riotous crowd gathered in Wall street. The words come back to-day with a strange power like a divine message from one who looks down upon his mourning countrymen and with a superior wisdom would quiet the troubled waters and strengthen the faith and courage of our people:

"Fellow citizens—Clouds and darkness are round about him; His pavillion is dark waters and thick clouds of the skies! Justice and judgment are the establishment of His throne! Mercy and truth shall go before His face! Fellow citizens, God reigns, and the government at Washington still lives."

AT a meeting of stockholders of the Greenwood, Laurens and Spartanburg Railroad, (which was to have been prosecuted as a connection of the Virginia Midland before the control of the latter was sold to the Richmond and Danville Railroad Company) held at Laurens, S. C., on the 16th inst., E. F. Verdery, of Augusta, was elected

president. It was unanimously resolved "that it is the full purpose of the stockholders of the Greenwood, Laurens and Spartanburg Railroad to build said road as soon and as fast as the means can be procured to build the same."

Organization.

At a meeting of the directors of the Portsmouth, Great Falls and Conway Railroad at Portsmouth, N. H., on the 15th inst., the following officers were elected for the ensuing year: President, E. B. Phillips; treasurer, N. G. Chapin; clerk, Wallace Hackett.

Articles of association of the Cincinnati and Cairo Narrow Gauge Railroad Company have been filed with the Secretary of the State of Indiana. The road will extend entirely across the southern portion of the State, having a length of 220 miles. The capital stock is $3,000 000: The directors are Enoch Lockhart, Frank Clarkson, J. C. Albert, James J. Brown, C. Barfield, W. H. Irwin, R. N. Barbour, W. H. Slaughter and G. W. Gavet.

At a meeting of the stockholders of the Fort Scott division of the Lexington, Lake and Gulf Railroad Company, recently held at Fort Scott, Kan., the following Board of Directors was elected: B. J. Waters, A. A. Harris, F. F. Robley, D. A. Pritchard, W. C. Hickman and J. B. Bayliss. The board afterwards organized by reelecting B. J. Waters president. This road is to run from Fort Scott via Butler, Mo., thence to a point on the Chicago and Alton Railroad. The same parties afterwards organized a company, with the same officers, called the Chicago, Fort Scott and Oklahoma Railraad Company, to run from Fort Scott, through the counties of Allen, Wilson, Chattauqua, Cowley and Sumner, to Indian Territory line.

Articles of association of the Cerro Gordo Short Line Railroad Company were filed in the office of the Secretary of State of Illinois on the 17th inst. It is proposed to construct a railroad by the most practicable route from the town of Maroa, in the county of Macon, to the city of Charleston, in the county of Coles. The capital stock is $1,000,000. The incorporators are: Thomas W. Harris, E. H. Jeffries, V. B. Clifton, H. O. Gaston, W. L. Pitts, all of Piatt county; John H. Crocker of Maroa, and James R. Cunningham of Charleston. The first five of these constitute the board of directors.

A company called the Land Mortgage Investment and Agency Company of America has been organized in England, with an authorized capital of $5,000,000, for the purpose of investing in land in the United States and Canada. The company was formed at the instance of Austin Corbin, president of the Long Island Railroad Company, and a part of its purpose is the development of unimproved lands on Long Island. The plans for the improvement of the Island have not been completed, but contemplate the building of summer resorts on both shores of the island and the improvement of the interior for farming purposes.

At the annual meeting of the stockholders of the Northern Pacific Railroad Company, held in this city on the 15th inst., the following directors were elected: Frederick Billings, Ashbel H. Barney, John W. Ellis, Rosewell G. Rolston, Robert Harris, Thomas F. Oakes, Artemus H. Holmes and Henry Villard, New York; J. L. Stackpole, Elijah Smith and Benjamin P. Cheney, Boston; John C. Bullitt, Philadelphia, and Henry E. Johnston, Baltimore. Subsequently Henry Villard was elected president, Thomas F. Oakes vice president, A. J. Thomas second vice-president. Robert Lenox Belknap, treasurer, and Samuel Wilkinson, secretary.

A charter was granted at Harrisburg, Penn, on the 16th inst. to the Big Level and Bradford Railway, which is to connect with the Philadelphia and Erie Railroad and with the Pittsburg, Bradford and Buffalo Railroad near Kane, Pa., and with the New York, Lake Erie and Western Railroad north of Howard Hill. The length is fourteen miles and the capital stock $250,000. A charter was also granted to the Kinzua Railroad, which is to run a line to connect with the Big Level and Bradford Railroad near Howard Hill, and with the Bradford, Bordell and Smethport Railroad near Simpson Station. The length of the road is to be fourteen miles and the capital stock $150,000. Elisha K Kane, of Kane, is President of both roads and holds most of the stock.

At a meeting of the stockholders of the Baltimore and Western Railroad Company, recently held at Capon Springs, Va., the following gentlemen were elected directors: P. B. Borst, Benjamin F. Grayson, Sr., Thomas M. Almond, B. C. Rust, S. A. McMechen, Dr. Thomas A. Ashby and B. K. Jamison. The officers are: President, P. B. Borst; treasurer, B. K. Jamison, of Philadelphia; secretary, B. C. Rust. This road as proposed, it is stated will extend east to Washington and Baltimore, through Virginia and Maryland. It is said by those in the interest that "in order to secure as rapidly as possible a continuous line from the West to tidewater, the company will begin work in the Valley of Virginia, and connect with the Shenandoah Valley Railroad and the Valley Railroad or the Strasburg Branch of the Midland Railroad. 89 miles from Alexandria, at Strasburg, now controlled by the Danville or Clyde syndicate The line will be 300 miles long from tidewater at Washington to the Ohio river in Jackson county, W. Va. A branch will be constructed to Point Pleasant, in Mason county. The grade will be 50 feet to the mile coming east and 75 feet going west. The distance from tidewater to the southern point of the Cumberland coal basin, in Tucker county, via Cedar Creek line, will be 146 miles, where the road will cross the West Virginia Central and Pittsburg Railroad, now being constructed. The Baltimore and Western Railroad, owing to the directness of the route and shortness of the line, must secure the transportation of a large portion of the coal from the south point of the Cumberland coal fields to Alexandria, Washington city and Baltimore. It will also connect with the Pittsburg and Charleston Railroad and form a short line from Washington to Pittsburg."

Interest and Dividends.

The Denver and Rio Grande Railway Company has declared a dividend of 1½ per cent, payable October 11, to stockholders of record September 24.

The Western Union Telegraph Company has declared a quarterly dividend of 1¼ per cent, payable October 15.

A quarterly dividend of 1¼ per cent on the capital stock of the Missouri Pacific Railway Company will be paid Oct. 1.

The Railway Car Trust of Pennsylvania has declared a quarterly dividend of 1¼ per cent on series A, B, C, D, and E, payable 1st October next.

The Georgia Railroad and Banking Company have declared a dividend of $2 50 per share on the capital stock, payable Oct. 15 to stockholders of record Oct. 1.

The Lehigh Valley Railroad Company has declared a quarterly dividend of 1½ per cent, payable on October 15.

The Chicago, Milwaukee and St. Paul Railroad Company has declared a dividend of 3½ per cent on the common and preferred stock, payable Oct. 15.

The New York Central and Hudson River Railroad Company has declared a quarterly dividend of 2 per cent, payable October 15.

The Chicago, St. Paul, Minneapolis and Omah Railway Company has declared a dividend of 1¼ per cent on the preferred stock, payable October 20, to stockholders of record September 30.

The Dubuque and Sioux City Railroad Company has declared a semi-annual dividend of 3 per cent, payable October 15, to stockholders of record September 30.

The East Tennessee, Virginia and Georgia Railroad Company will pay 3 per cent upon all the income bonds of the company, out of the net earnings, on presentation of the bonds at the Metropolitan National Bank of New York on the 1st of October.

Railroad Earnings.

The earnings of the St. Paul, Minneapolis and Manitoba Railway for the two weeks ending September 14, 1880, were $229,870 20, against $221,045 39 for the corresponding two weeks in September, 1880, an increase of $108,824 81. For the current year to September 14, 1881, the earnings were $2,980,593 80, against $2,063,715 59 for the corresponding period of the previous year, an increase of $916,878 21.

The earnings of the Flint and Pere Marquette Railroad for the week ending September 14th, 1881, were $36,208 55, against $32 418 35 for the corresponding week in 1880, an increase of $3,790 20. From January 1 to September 14, 1881, $1,270,833 60; do. 1880, $1,051,396 72—increase, $219,436 85.

The earnings of the Great Western Railway of Canada for the week ending September 9, 1881, were $100,480; do. 1880, $105,452—decrease, $4,972.

The earnings of the Missouri, Kansas and Texas and Leased lines for the second week in September, 1881, were $191,161; do. 1880, $131,989—increase, $59,263. From January 1, to September 14, 1881, $5,115,161; do. 1880, $3,854,719—increase, $1,230,-442.

The earnings of the Wabash, St. Louis and Pacific Railway for the second week in September, 1881, were $417,345; do. 1880, $306,788—increase, $110,-557. From January 1 to September 14, 1881, the earnings were $9,659,803, against $7,113,114 for the corresponding period in 1880, an increase of $1,546,-689.

The estimated earnings of the Hannibal and St. Joseph Railroad Company for the second week in September, 1881, were $49,721, and for corresponding week of 1880, $54,334; decrease, $4,613. From January 1 to September 14, 1881, $1,522,949; corresponding period in 1880, $1,707,615, decrease, $184,-666.

The earnings of the Burlington, Cedar Rapids and Northern road for the week ending Sept. 14, were: 1881, $52,140 84; 1880, $45,498 32; increase, $6,642 52. From January 1 to September 14, 1881, the earnings were $1,481,849; do. 1880, $1,366,722—increase, $115,'27.

The earnings of the St. Louis, Iron Mountain and Southern Railway for the second week in September, 1881, were $181,000; do. in 1880, $178,830. From January 1, to September 14, 1881, $4,702,555; do. in 1880, $3,796,004—increase, $906,551.

The earnings of the Denver and Rio Grande Railway for the second week of September, 1881, were $140,172; do. in 1880, $86,747—increase, $53,425. From January 1 to September 14, 1881, the earnings were $3,998,600, against $2,002,954 for the same time in 1880, an increase of $1,995,846. Miles of road operated in 1881, 933; do. in 1880, 541—increase, 392.

The earnings of the Louisville and Nashville Railroad for the second week in September, 1881, were $226,700; do. in 1880, $201,000—increase, $25,600.

From January 1 to September 14, 1881, $2,157,000; corresponding period of 1880, $1,914,200—increase, $242,800.

The earnings of the Chicago & Northwestern Railway the second week in September, 1881, were $482,399.50; do. 1880, $454,017.76—increase, $28,381.74.

Personal.

Col. Orland Smith has been re-elected General Manager of the Columbus, Hocking Valley and Toledo Railroad.

Mrs. Abraham Lincoln, who is going to Washington November 1, is now better in health than she has been for four years.

Franklin B. Gowen, one of the Receivers of the Philadelphia and Reading Railroad and Coal and Iron Company, has returned to Philadelphia from his recent visit to Europe.

Chief Justice Daly, of New York, President of the American Geographical and Statistical Society, has been elected one of the Vice Presidents of the Geographical Congress now in session at Venice.

Henry Villard, President of the Northern Pacific Railroad Company and of the Oregon Railway and Navigation Company, left this city with a party of friends on Monday night on a tour of inspection on the Pacific coast.

B. J. Gifford of Rantoul, Ills., has been elected president of the Cleveland and Marietta Railroad Company, vice Isaac Morton resigned. H. E. Bullock is secretary and treasurer of the company. The headquarters of the road will be at Cambridge.

The question of the appointment of a receiver of the Ohio and Mississippi Railroad, in place of John King, Jr., has been postponed until the 28th inst., when the matter will be argued before Judges Drummond and Gresham, of the United States Circuit Court, and a third Judge to be selected by these two.

John W. Brooks, of Boston, whose death at Heidelberg, on the Rhine, on the 16th inst. is announced by cable, was in the 63d year of his age. He was for many years identified with the Western Railroads, having held the position of President of the Michigan Central, and the Burlington and Missouri River Railroad Companies. He is said to have been worth $2,000,000.

At the regular monthly meeting of the directors of the Baltimore and Ohio Railroad Company in Baltimore on the 14th inst., Geoge W. Doblin and Jas. Carey Coale were elected directors in place of John King, Jr., and William Donnell, resigned. John W. Davis was confirmed as assistant to first vice president. George W. Frick was appointed general manager of the express and telegraph business of the company. The agreement made August 23d, 1881, between the Baltimore and Ohio Railroad Company and John S. Barbour, involving the sale of part of the Company's interest in the Virginia Midland system, was unanimously ratified.

The track of the Baltimore and Delta Narrow Gauge Railroad has been finished three miles from Baltimore on the way to Towsontown. The State Ridge and Delta Railroad, chartered under the laws of Pennsylvania, will extend from the Maryland line to Delta, and has transferred its franchise to the Baltimore and Delta Railroad Company, so that the latter has now the right to build its line to Peach Bottom Road.

The State commissioners of the North Carolina Railroad, after an investigation of the progress being made, have agreed to give the Clyde syndicate an extension of time for the completion of the road, satisfied that the work is being pushed forward with diligence and energy.

Vermont Central and Vermont and Canada Railroads.

A correspondent of the Boston Journal, writing from St. Albans, Vt., under date of Sept. 14th says that the special masters who were appointed under an order of the State Supreme Court in the case of James R. Langdon et al. v. the Vermont and Canada Railroad Company et al., to ascertain and report the amount of the trust indebtedness of the receivers and managers of the Vermont Central and Vermont and Canada Railroads, have concluded their public hearing and are now at work upon their report. The masters have been in open session some seven days, and during that time a large number of bondholders have appeared before them for the purpose of proving their bonds. The masters have recorded each bond in a book prepared for the purpose, and have stamped the same with an official seal. The jurisdiction of the masters extends back to 1865, at which time the first equipment loan, amounting to $70,000, was issued. Their field of inquiry extends from 1865 down to the present time, and covers the period during which the "trust debt" has been created. The kind and amount of bonds that have been presented to the masters for "proving" are as follows:

First equipment bonds	$568,150
Second equipment bonds	270,000
Third equipment bonds	452 000
Third equipment bonds, second issue	423,500
Vermont Central income and extension bonds	918,700
Vermont Central guaranteed by Vermont and Canada	771,000
Stanstead, Shefford and Chambly bonds	311,500
	$3,714,850

The total amount of bonds authorized to be issued was as follows:

Equipment bonds	$2,000,000
Vermont Central income and extension	1,000,000
Vermont and Canada guaranteed	1,000,000
	$4,000,000

This leaves a balance of bonds outstanding amounting to some $286,000 not presented to the masters. The floating debt, as presented to the masters by the receivers and managers, was in round numbers $1,000,000. The Central Vermont Railroad Company proved its account for advance, made to the trust for an amount approximating $700,000. The foregoing figures constitute the "trust debt," of which the masters have taken cognizance. The following is a recapitulation of the foregoing amounts, which go to make up the trust debt:

Equipment bonds	$2,000,000
Income and extension	1,000,000
Vermont Central guaranteed	1,000,000
Stanstead, Shefford and Chambly bonds	400 000
Floating debt	1,000,000
Central Vermont advances	700,000
Total trust indebtedness	$6,100,000

No interest has been paid on any of the above bonds since 1876. Among the duties pertaining to the work of the masters is that of reckoning the interest on these bonds since the default was made, and adding the same to the trust indebtedness. The bonds are 8 per cents, and the interest due on them for the six years intervening 1876 to 1881, will amount to nearly $2,000,000. This, added to the principal of the trust debt, makes nearly $8,000,000 which the trust will be liable for.

The principal object of the bill brought by James R. Langdon, Vice President of the Central Vermont Railroad Company, against the Vermont and Canada Railroad Company and others, was in brief this: That the amount due the different classes of claimants—bondholders, floating debt holders, the Central Vermont Railroad Company—should be ascertained, and also the order in which they should be paid, the security to which each is entitled, and the mode and manner in which the property that is the subject matter of the litigation should be appropriated for their payment. The Supreme Court in December last decided that an apportionment and distribution of the property in litigation, or the avails thereof, among those entitled to it, should be made. To carry this opinion into effect a mandate was made by the Supreme Court that the cause be remanded to the Franklin County Court of Chancery, and that it be referred to special masters to ascertain and report the amount due of principal and interest on all bonds issued by the receivers and managers, and also the amount of the trust indebtedness, so-called. It is expected that the masters will file their report in court by Oct. 1, and that at the January term of court a disposition of the cases will be made. Here then, are claims of over $8,000,000 which the Supreme Court affirms is the first lien on the Vermont Central and Vermont and Canada Roads. It is probable that when the masters' report is reached by the court a mandate will be issued making provision for the payment of this indebtedness.

John W. Mass, General Freight and Passenger Agent of the Atlantic and Pacific Railroad Company, is authority for the following statement concerning the progress of that road, which is now in course of construction towards the Pacific coast from Albuquerque. The road, he says, is now built 230 miles west of Albuquerque, and is in running order that distance. The present terminus of the track is at Navajo Springs, about twenty miles beyond Allentown. They will be at Brigham City, 285 miles from Albuquerque, by the first of November. The road will be pushed from now out rapidly forward, and by next season, it will be completed to the Big Colorado river, a distance of 565 miles from Albuquerque.

The Knoxville and Southern Railroad (Emory Gap connection) has been sold to the Clyde syndicate. In consideration of the transfer the syndicate deposited $7,500 out of which is to be paid all the subscribed stock and all liabilities. The purchasers bind themselves to put the entire line, from Knoxville to Emory Gap, under contract within six months from September, and to complete it as a five foot gauge road in thirty months from same date.

The Baltimore and Delta Narrow Gauge Railroad is being pushed to completion, and the president expects that travel will commence from Towsontown to Baltimore by the 1st of November.

The construction of the Shenandoah Valley Railroad is being actively pushed. Most of the masonry and grading between Waynesboro' and Big Lick is about done. It is generally thought that by January 1, 1882, cars will be running from Waynesboro' to North river, a distance of 42 miles.

AMERICAN RAILROAD BOND LIST.

Asterisk (*) affixed to rate of Interest signifies "Payable in Coin."

Description of Bonds.	Amount.	Rate.	Interest Payable. When.	Interest Payable. Where.	Due.	Price.
